Janus Henderson  
INVESTORS

A sub fund of Janus Henderson Capital Funds plc

## Objectives and Investment Policy

The Fund aims for a total return (capital growth and income) on your investment over time. The Fund focuses on investments worldwide in the shares of companies engaged in or related to the property industry, or companies which own significant property assets.

The Fund also invests in 'REITs', (a type of investment trust) that invest in income-producing property-related assets (e.g., office buildings, shopping malls, apartments).

The Fund may invest in markets in countries that are still developing. The Fund may invest in companies of any size, including small-capitalisation securities (smaller companies).

The Fund may use financial derivatives (complex financial instruments) with the aim of risk or cost reduction within the portfolio. To a lesser extent, derivatives may also be used to generate additional returns or income for the Fund.

The Fund may invest in other types of eligible investments which are disclosed in the Prospectus.

You may sell your shares generally daily (i.e. on a business day for the Fund).

This share class does not pay you an income but instead reinvests it to grow your capital.

## Risk and Reward Profile

The category is calculated based on historical data and is based on price movements in the share class (volatility), and may not be a reliable indicator of future risk. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean the investment is risk-free.

This share class is in category 5 because of rises and falls in its value in the past.

The risk category does not take into account the following risks of investing in this share class:

**Component Fund:** This fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.

**Investment Risk:** The value of an investment and any income from it can go up or down, and the Fund may not achieve its investment objective. When you sell your shares they may be worth less than you paid for them.

**Equities:** Shares can lose value rapidly and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

**REITs:** The Fund invests in real estate investment trusts (REITs) and other companies or funds engaged in property investment, which involve risks above those associated with investing directly in property. In particular, REITs may be subject to less strict regulation than the Fund itself and may experience greater volatility than their underlying assets.

**Investment Focus:** The Fund is focused towards particular industries or investment themes and may be heavily impacted by factors such as changes in government regulation, increased price competition, technological advancements and other adverse events.

**Derivatives:** The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Exchange Rates:** If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

**Charges to Capital:** Some or all of the Annual Management Charge and other costs of the Fund may be taken from capital, which may erode capital or reduce potential for capital growth.

For a more detailed explanation of risks, please refer to the "Risk Factors and Special Considerations" section of the Prospectus.
