FRANKLIN
TEMPLETON

Legg Mason Martin Currie Global Emerging Markets Fund

Class A US\$ Accumulating

ISIN: IE00BF5LJ272

A sub-fund of: Legg Mason Global Funds plc

Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to achieve growth of the fund's value in the long term.

Investment Policy

- The fund will invest at least 80% of its assets in shares of companies that are located in or derive the predominant portion of their revenue from countries included in the MSCI Emerging Markets Index.
- Such investment may be directly in such shares or indirectly via depository receipts (financial instruments issued by an institution, on a local exchange, to represent a foreign company's shares that could be difficult to trade on the company's home exchange) or derivatives (financial instruments whose value is derived from the value of other assets).
- The fund may invest a maximum percentage of its assets in shares of Chinese companies equal to the percentage of shares of Chinese companies in the MSCI Emerging Markets Index plus 10%.
- The fund will typically invest in 40 to 60 companies.
- The fund may invest in derivatives, to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth for the fund.

Benchmark: MSCI Emerging Markets (Net Dividends) Index

Manager's Discretion: The fund is actively managed. The investment manager seeks to have the fund outperform the benchmark over rolling 3-

year periods (meaning over any 3-year period starting on any date since the inception of the fund). There is no guarantee that this will be achieved. The benchmark is also relevant in defining the geographic scope of at least 80% of the fund's investments, and in determining the fund's maximum exposure to Chinese equities, as disclosed under "Investment Policy" above. While many of the fund's investments will be components of the benchmark, the weightings of the fund's holdings may differ materially from the weightings in the benchmark. The investment manager will also invest in securities that are not included in the benchmark. The fund's percentage exposures to sectors and industries may differ materially from those of the benchmark.

Fund's Base Currency: US Dollar

Share Class Currency: US Dollar

Transaction Costs: The fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

Dealing Frequency: You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is USD 1,000.

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of companies from various emerging market countries and sectors has historically been subject to large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Investment in China: The fund invests in China and is subject to the risk of significant change in political, social or economic policy in China, which may negatively affect the value of such investments.

Investment in smaller company shares: The fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the fund may not be able to minimise a loss on such shares.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Charges

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	1.99%
Charges taken from the fund under certain specific conditions
