

Credit Suisse Nova (Lux) European Senior Loan Fund

Class AH USD

Investment policy

The aim of the Fund is to provide a high level of risk adjusted income by investing in higher yielding, secured and unsecured floating rate senior loans and other secured and unsecured senior floating rate debt instruments issued by mainly European corporations and other businesses in any currency. The Fund can also invest in certain derivative instruments. The Fund invests in instruments which are typically rated below investment grade credit quality (BB+ or below) or, if not rated, will be of equivalent credit quality. The underlying portfolio seeks to diversify its investments across issuers and industries at all times.

Potential risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. Part of the Fund's investments may have considerable credit risk.
- Liquidity risk: Assets cannot necessarily be sold at regular cost in an adequately short timeframe. The Fund's investments may be prone to very limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Valuation risk: The value of certain assets held by the Fund may be inherently difficult to establish and is potentially the subject of substantial uncertainty.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The Subfund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.
