### Risk Warnings

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date. Changes in interest rates will result in fluctuations in the value of the fund. The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund. The fund may invest in distressed securities which carry a significant risk of capital loss. Investments in debt instruments which are of lower credit quality may result in large fluctuations in the value of the fund.

### Fund Strategy

We believe increasingly dynamic and complex short-term high yield fixed income markets create opportunities for investors that are best captured by independent specialist decision makers interconnected as a global team. The team employs a total return approach which blends top-down risk positioning and bottom-up fundamental research to deliver consistent risk-adjusted returns over a market cycle. This is accomplished through an emphasis on higher quality issuers whose ability to refinance debt doesn't depend on a positive macroeconomic environment or market conditions. The combination of diligent security selection which integrates a quantitative and qualitative fundamental analysis designed to mitigate downside risk and volatility.

**Past performance does not predict future returns.** Each period starts at the end of the indicated month. The first indicated month may not represent a full month and may start only on the launch/restructuring date indicated in the headline.

### Invesco's Commitment to ESG Investing

At Invesco, we've been implementing ESG strategies for more than 30 years, with an approach that is both investor-led and investor-driven. We integrate ESG risk and opportunity factors directly into our investment decisions across asset classes. We believe that incorporating environmental, social and governance (ESG) practices into our investment activities can positively impact the value we provide clients - and help ensure a sustainable environment for future generations.

### SFDR (Sustainable Finance Disclosure Regulation)

The Fund complies with Article 8 with respect to the EU's Sustainable Finance Disclosure Regulation\*. As such, the fund promotes, among other characteristics, environmental or social characteristics or a combination of those characteristics. In addition, the companies in which the fund invests follow good governance practices. \*Regulation (EU) 2019/2088 on sustainability - related disclosures in the financial services sector.

### Exclusion Framework

The Fund embeds an exclusionary framework to specific activities based on UN Global Compact, severe governmental sanctions, revenue thresholds for certain activities linked to environmental and/or social criteria, as well as ensuring that companies follow good governance practices. The list of activities and their thresholds are listed below:

<b>UN Global Compact</b>	- Non-Compliant
<b>Country sanctions</b>	- Severe violations
<b>Controversial weapons</b>	- 0% of revenue including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the Non-Proliferation Treaty (NPT)
<b>Coal</b>	- Thermal Coal extraction: $\geq 5\%$ of revenue - Thermal Coal Power Generation: $\geq 10\%$ of revenue
<b>Unconventional oil &amp; gas</b>	- $\geq 5\%$ of revenue on each of the following: Arctic oil & gas exploration; Oil sands extraction; Shale energy extraction;
<b>Tobacco</b>	- Tobacco Products production: $\geq 5\%$ of revenue - Tobacco related products and services: $\geq 5\%$ of revenue
<b>Others</b>	- Recreational cannabis: $\geq 5\%$ of revenue
<b>Good governance</b>	- Ensure that companies follow good governance practices in the areas of sound management structures, employee relations, remuneration and tax compliance

Any investment decision should take into account all the characteristics of the fund as described in the legal documents. For sustainability related aspects, please refer to: <https://www.invescomanagementcompany.lu>.

At Invesco we have looked to put in place minimum safeguards across multiple sub-funds of Invesco Funds (as listed above) to allow them to meet Article 8 requirements of the SFDR Regulation as of 2 November 2021. To be classified as a so-called Article 8 product, the sub-funds need to promote, among other things, environmental and/or social characteristics while also ensuring that investee companies follow good governance practices. In order to meet such requirements, it was determined that we would look to exclude certain activities based on certain thresholds, which may be updated from time to time. For further details please refer to the website of the management company at <https://www.invescomanagementcompany.lu>.

As noted above this is a proprietary framework developed by Invesco in line with Article 8 requirements of the Regulation (EU) 2019/2088 on sustainability. The framework is developed, maintained and monitored by Invesco. In order to assess companies against the noted criteria, Invesco uses a combination of Sustainalytics and ISS (Institutional Shareholder Services) to assess compliance, however, this can be supplemented with other service providers where appropriate. While there is a broad coverage across the various systems, there is no one system that has complete coverage of the entire investment universe. As a result, investment teams will be responsible for conducting an assessment of companies for which data is not available, under the appropriate supervision and oversight of our investment compliance and ESG teams.
