

Summary of fund objective

The Fund is actively managed. The Fund aims to achieve a positive total return over a market cycle, integrating a Sustainable Responsible Investment approach. The Fund seeks to achieve its objective by gaining exposure primarily to a flexible allocation of equities and debt securities globally, which meet the Fund's criteria on sustainability. For the full objectives and investment policy please consult the current prospectus.

Risk Warnings

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Changes in interest rates will result in fluctuations in the value of the fund. The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund. The Fund may invest in a dynamic way across assets/asset classes, which may result in periodic changes in the risk profile, underperformance and/or higher transaction costs. The lack of common standards may result in different approaches to setting and achieving ESG objectives. In addition, the respect of the ESG criteria may cause the Fund to forego certain investment opportunities.

Fund Strategy

The fund follows a multi-stage process which is purely systematic, rule-based and designed for the broadest possible collection of diversified risk premiums. The fund only invests in liquid assets, such as listed equities, government bonds and exchange traded futures. The fund incorporates key aspects of ESG, e.g. ESG integration, exclusions and a best-in-class approach. Additionally, the investment team applies a UN Global Compact screening and excludes controversial activities, i.e. weapons, fossil energy and tobacco. Furthermore, the investment team aims to create additional value by applying a tactical asset allocation. As a last step, the team uses sophisticated risk management techniques based on state-of-the-art statistical models aiming to mitigate drawdowns and limiting the portfolio's volatility.

Past performance does not predict future returns. Each period starts at the end of the indicated month. The first indicated month may not represent a full month and may start only on the launch/restructuring date indicated in the headline.

Important Information

¹The minimum investment amounts are: EUR 500 / USD 650 / GBP 400 / CHF 650 / SEK 4,500. Please contact us or refer to the most up to date Prospectus for details of minimum investment amounts in other currencies.

²As a result of the introduction of a material change in the fee structure, the ongoing charges figure is estimated based on the expected total of charges. This figure may vary from year to year. It excludes portfolio transaction costs except in the case of an entry or exit charge paid by the Fund when buying or selling shares/units in another fund.

Invesco Sustainable Allocation Fund invests globally in equities and interest-bearing securities. The equity and bond allocation is consistently adjusted to changed market situations in the context of tactical considerations, which is dependent on the appraisal of portfolio management. Environmental, Social and Governance (ESG) criteria are the basis of the portfolio composition. The first step of the equity portfolio construction process is to identify the investment universe which is determined by the underlying ESG criteria. Companies may be either excluded or selected on the basis of weighted positive and negative criteria (best-in-class) and a combination of both methods is used. Companies are analysed on the basis of various criteria for all relevant ESG fields, which include environment, corporate governance, human rights and labour conditions. Once the investment universe has been identified, the stock selection process takes place. The Invesco stock selection process is designed to identify attractive and unattractive stocks by providing an impartial assessment of the expected relative price performance of each stock. This is achieved using Invesco's proprietary factor-based stock selection model. On the fixed income side, a country sustainability rating tool provides a detailed assessment of how well countries are addressing the various environmental, social and governance (ESG) risks they face. The ratings enable to integrate ESG issues into sovereign fixed income investments and are designed to help to understand and manage ESG risks across their sovereign bonds and other related investments. Where individuals or the business have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice. This marketing communication is not an invitation to subscribe for shares in the fund and is by way of information only, it should not be considered financial advice. Persons interested in acquiring the fund should inform themselves as to (i) the legal requirements in the countries of their nationality, residence, ordinary residence or domicile; (ii) any foreign exchange controls and (iii) any relevant tax consequences.
