

Performance Update

Scientific Beta HFE Japan Equity 6F EW UCITS ETF

Applications for shares in the Fund should not be made without first consulting the current Prospectus and the Key Information Document ("KID") or Key Investor Information Document ("KIID"), which are available in English and in the official language of your local jurisdiction at www.fundlogic.morganstanley.com/ or free of charge from the registered office of MSIM Fund Management (Ireland) Limited (MSIM FMIL), 24-26 City Quay, Dublin 2, D02 NY19, Ireland. A summary of investor rights is available in English at the same website.

If the board of directors of the Company and/or Morgan Stanley decide to terminate the arrangement for marketing that Fund in any EEA country where it is registered for sale, they will do so in accordance with the relevant UCITS rules.

Investment in the Fund concerns the acquisition of shares in the Fund and not in a given underlying asset such as building or shares of a company, as these are only the underlying assets owned by the Fund.

Investment Objective

The Scientific Beta HFE Japan Equity 6F EW UCITS ETF (the "JHEF ETF") aims to deliver medium to long term capital appreciation by providing Shareholders with a return equivalent to the performance of the Scientific Beta Japan HFI Multi-Beta Multi-Strategy Six Factor EW Market Beta Adjusted (Leverage) (Six-Factor) Index ("Index") Net Return.

About the Index

The Index is designed to create exposure to a portfolio of equities and equity related securities, which are listed or traded on any stock exchange that is located in Japan, through equally-weighted allocations to 6 subindices.

Each sub-index will reflect one of the six following investment styles:

Value (investing in equities and equity related securities with high book to market value ratio)

Momentum (investing in equities and equity related securities that have outperformed in the past)

Low volatility bias (investment in equities and equity related securities with low volatility)

Size (investment in mid or small capitalisation equities and equity related securities)

Profitability (investment in equities and equity related securities that have a high gross profitability ratio, defined as the ratio of the previous fiscal year's gross profit to total assets of the relevant issuer)

Investment (investing in equities and equity related securities whose issuer has low asset growth rate)

In order to ensure that each of the sub-indices is diversified, an equally weighted combination of five diversification based weighing schemes (Max De-concentration, Max De-correlation, Min Volatility, Max Sharpe Ratio, Diversified Risk Weighted) is applied to the respective portfolio of equity and equity related securities selected for that sub-index.

The Index is calculated daily. Constituents and weightings are determined quarterly. These are available, as well as a detailed description of the methodology, at www.scientificbeta.com.

The JHEF ETF

The JHEF ETF enables an investor to gain exposure to the performance of the index in a cost effective manner.

Key Product Risks

- No capital protection: investors may lose their entire investment by investing it in the JHEF ETF
- The JHEF ETF is exposed to market risk and risks arising from equity factor exposure
- Whilst Scientific Beta use transparent methodologies to construct their indices, they are still subject to model risk
- The use of derivative instruments is central to the investment policy of the ETF. The ability of the ETF to meet its objective is dependent on the ability of the counterparty to meet its obligations. In the event of counterparty default, the ETF will be exposed to the economic value and market risk associated with the funding assets it holds and the ability of the ETF to deliver the return of the Index may be negatively impaired

Tracking Error ⁴	0.04%	-

Source: Bloomberg

The above figures refer to the past. Past performance shown is net of fees. Returns may increase or decrease as a result of currency fluctuations

1. Calculated for both the JHEF ETF and the Index from the change of the underlying index of the JHEF ETF (19-Apr-2018)

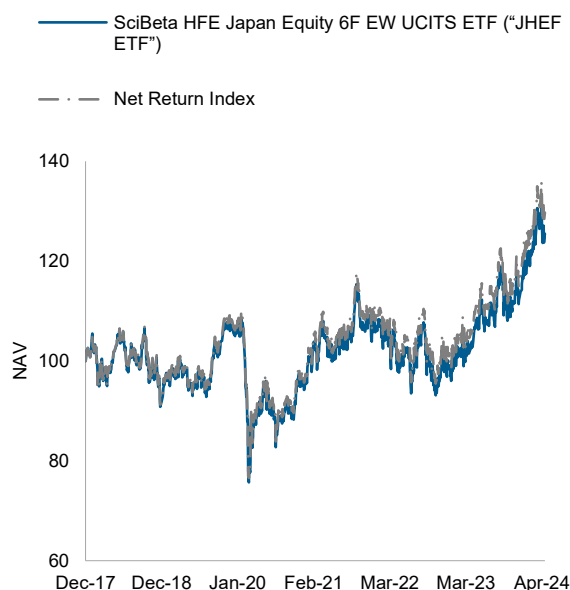

2. Inception Date 7-Dec-17

3. Volatility is computed as the standard deviation of the daily return.

4. The tracking error is computed as the annualised standard deviation of the spread in performance between the return of the fund and the Index as its benchmark. The weekly tracking error is computed since the change of the underlying index (19-Apr-2018)

5. For the Net Return Index above and in the chart; from inception until 19-Apr-2018 is with reference to Scientific Beta Japan HFE Multi-Beta Multi-Strategy Equal Weight (Six-Factor) Index and thereafter to Scientific Beta Japan HFI Multi-Beta Multi-Strategy Six Factor EW Market Beta Adjusted (Leverage) (Six-Factor) Index

Risk Warning

Past performance does not predict future returns. There can be no assurance that the Fund will achieve its investment objectives. As such, no representation is being made that any account will or is likely to achieve profits or losses similar to those shown. The information presented does not constitute, and should not be construed as, investment advice or recommendations with respect to the securities or investments mentioned herein or to participate in any particular trading strategy.

Investments may be in a variety of currencies and therefore changes in rates of exchange between currencies may cause the value of investments to decrease or increase. Investments in derivative instruments carry certain inherent risks such as the risk of counterparty default, and before investing you should ensure you fully understand these risks. Use of leverage may also magnify losses as well as gains to the extent that leverage is employed. These investments are designed for investors who understand and are willing to accept these risks. Performance may be volatile, and an investor could lose all or a substantial portion of his or her investment.

Any estimates, projections or predictions (including in tabular form) given in this communication are intended to be forward-looking statements. Although Morgan Stanley believes that the expectations in such forward-looking statements are reasonable, it can give no assurance that any forward-looking statements will prove to be correct. The trademarks and service marks contained herein are the property of their respective owners.

Selling Restrictions

The Fund may only be offered and distributed to investors in accordance with all relevant local laws and regulations. The distribution of this presentation and the offering or purchased of interests in the Fund may be restricted in certain countries. This communication is only intended for and will be only distributed to persons resident in jurisdictions where such distribution or availability would not be contrary to local laws or regulations. It is the responsibility of any persons in possession of this document and any persons wishing to purchase interests in the Fund to inform themselves of, and to observe, all applicable laws and regulations of any relevant country.

For Investors in France: The Offering Documents are also freely available upon request from BNP Paribas Securities Services, the centralising agent of the Fund in France: 3 rue d'Antin, 75002 Paris, France.
