DIGITAL FUNDS Stars Europe (a sub-fund of DIGITAL FUNDS) - class D1 (ISIN: LU1731919525)

This sub-fund is managed by J.Chahine Capital.

Objectives and investment policy

The objective of DIGITAL FUNDS Stars Europe is to outperform the broad European markets, through the use of a model to identify the "stars" performers. The sub-fund will invest at least 80% in stocks from the EU country members, Norway and Switzerland followed by at least 3 brokers and whose capitalisation exceeds 100 million EUR. The sub-fund will be invested across all markets capitalisation spectrum including large capitalisation companies. Such companies of the Stoxx 50 will not exceed 50% of the net assets. The sub-fund may enter into transactions which are undertaken for purposes other than hedging provided those transactions have no negative effect on the quality of the investment policy. The sub-fund exposure to the stock market will remain between 80% and 100%. The sub-fund will use the Price Momentum which is a statistical concept to measure the significance of a price movement relative to the market. An allocation of small and mid caps is incorporated into the portfolio. The benchmark is MSCI Europe Small Cap.

Investors may demand to redeem their units every normal bank business day in Luxembourg.

The revenues of the fund will be distributed yearly after the financial year end.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

More about this rating

- The risk category is based on return volatility over the last five years. The method used for this estimation depends on the type of fund.
- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may vary over time.
- The lowest category does not mean 'risk free'.

Why is this fund in Category 6?

The fund invests in the all cap universe diversified across various sectors and may be subject to high fluctuations in value. Small and Mid stocks can be more volatile than blue-chip stocks. The risk category is therefore driven by small, mid and large cap stock fluctuations.

Further material risks:

- A portion of the fund is invested in less liquid instruments whose prices could fluctuate in certain market conditions
- Small use of over-the-counter instruments exposes the fund to small potential counterparty default risk
- Operational risk inherent in operating this fund (mainly potential valuation and transaction processing failures) is borne by the Fund Management Company which is governed and supervised by independent functions and external auditors as well as regulators
- No Capital Guarantee exists for this product so investors can lose the whole of their investment
