(the "Sub-Fund") a Sub-Fund of PrivilEdge (the "SICAV")

Objectives and Investment Policy

Objectives and Investment Policy

The Sub-Fund is actively managed in reference to a benchmark. The MSCI Europe ND (the "Benchmark") is used for performance comparison, for internal risk monitoring purposes, as well as for performance fee calculation. The Sub-Fund's securities will generally be similar to those of the Benchmark. Security weightings are expected to differ only to a certain extent. This may limit the outperformance of the Sub-Fund compared to that of its Benchmark. The Investment Manager may nonetheless select securities not included in the Benchmark in order to take advantage of investment opportunities. The degree to which the Sub-Fund may resemble the composition and risk characteristics of the benchmark will vary over time but the Investment Manager has broad discretion to deviate from the Benchmark's securities, weightings and risk characteristics. The Sub-Fund aims to generate capital appreciation over the long term and to outperform the MSCI Europe Index (Total Return Net). It mainly invests in a blended value and growth style

portfolio of equity securities of companies having their registered office or carrying out their primary economic activity in Europe. In selecting investments, the Investment Manager will try to build a broadly diversified portfolio with generally more than 200 companies that appear to be attractively valued and fundamentally sound. At least 75% of the Sub-Fund's net assets will be exposed to equity of corporate issuers having their registered office in Europe, including the United Kingdom.

This indicator (SRRI) represents the annualized historical volatility of the Sub-Fund over a 5-year period. Where there are less than 5 years worth of data, missing returns are simulated using an appropriate benchmark. The SRRI may change over time and should not be used as an indicator of future risk or returns. Even the lowest risk classification does not imply that the Sub-Fund is risk-free or that capital is necessarily guaranteed or protected.

Category

The Sub-Fund invests in a diversified portfolio of equity securities based in Europe.

Are there any other particular risks?

The following risks may be materially relevant but may not always be adequately captured by the synthetic risk indicator and may cause additional loss:

- Active management risk: Active management relies on anticipating various market developments and/or security selection. There is a risk at any given time that the fund may not be invested in the highest-performing markets or securities. The fund's net asset value may also decline.
- Model Risk: Models may be misspecified, badly implemented or may become inoperative when significant changes take place in the financial markets or in the organization. Such a model could unduly influence portfolio management and expose to losses.
- Financial, economic, regulatory and political risks: Financial instruments are impacted by various factors, including, without being exhaustive, the development of the financial market, the economic development of issuers who are themselves affected by the general world economic situation, and economic, regulatory and political conditions prevailing in the relevant country.
