

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### DPAM B Bonds EUR Quality Short Term

(a sub-fund of DPAM B SA, a public SICAV under Belgian law)

managed by DPAM SA

Class M - ISIN: BE6299362853

## Objectives and investment policy

### Objective

- The objective of the fund is to offer you exposure to debt securities denominated in euros (i) whose issuers have a minimum 'investment grade' rating and (ii) that have a residual term of no more than three years. The fund is actively managed. No benchmarks are used in the management of the fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

The fund does not aim for sustainable investment but promotes environmental and social aspects within the meaning of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector.

### Investment policy

- The fund invests mainly, without any sector or geographical restriction whatsoever, in fixed or floating rate bonds and/or debt securities or analogous securities denominated in euros. The securities or, failing this, the issuers, must have a minimum rating of BBB-/Baa3 ('investment grade') on the scale used by S&P and Moody's rating agencies and the residual term of which does not exceed 3 years at the time of acquisition. The fund applies binding investment restrictions in terms of a company's exposure to certain controversial activities and behaviours (portfolio compliance with certain global standards, including the United Nations Global Compact, exclusion of stocks whose activity consists of the manufacture, use and possession of anti-personnel mines, cluster munitions, depleted uranium ammunition and armour). More information on the product can be found on the website [www.dpamfunds.com](http://www.dpamfunds.com).

### Subscription/Redemption

- All subscription or redemption requests may be made prior to 3 pm (Belgian time) on each business day to Banque Degroof Petercam SA.

### Types of Units

- The units of the fund are distribution units, issued in the form of shares, which give the right to a dividend.

### Derivative products

- The fund may, on an optional basis, use derivatives such as futures and/or forwards in order to achieve the investment objectives and/or for hedging purposes (hedging of or exposure to the risks associated with certain markets).

### Investment holding period

- This fund may not be appropriate for investors who intend to withdraw their capital within 3 years of the initial investment.

## Risk and reward profile

- As any investment is risky by nature, the return (performance) thereof is potential only. The risk and reward profile of your investment is reflected by a synthetic indicator which ranks the fund over a risk/return scale from the lowest (1) to the highest (7) risk category.
- The computation of this risk/reward profile is based on the portfolio's net asset value fluctuations (volatility) recorded over the past 5 years (or on simulations based on an appropriate benchmark for funds or share classes of less than 5 years). It gives an indication of the fund's potential performance and of your capital risk exposure, but it does not guarantee that the risk/reward profile currently published will remain unchanged.
- Historical data, such as those used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the fund.
- The lowest risk/return category (level 1) does not mean a risk-free investment.
- The risk/return profile mentioned herein is essentially due to the presence of investment grade bonds with a remaining maturity of three years at most in the portfolio.
- The capital invested in this fund is neither guaranteed nor protected. You may therefore lose all or part of your investment.

Certain risks are not (or not adequately) reflected in the risk and reward profile mentioned herein. Amongst those risks, the following could have a material impact on the risk and reward profile of the fund:

- Liquidity risk: the fund invests primarily in investment grade corporate bonds with short maturities that are considered readily marketable. Liquidity may fall during periods of market tension and transaction costs may rise significantly.
- Concentration risk: since the fund's portfolio largely consists of debt securities issued or secured by euro zone member States, it is likely to be more particularly sensitive to the economic performance of the euro zone.
- Inflation risk: the fund invests primarily in fixed income securities. A rise in inflation could cause the value of the assets in the portfolio to fall.
- Sustainability risk: environmental and/or social aspects are taken into consideration during the fund's investment selection process. Nevertheless, the risk of sustainability remains. As a result, the fund may have greater exposure to companies that have a negative sustainability impact.

## Charges

The charges are used to pay the costs of running the fund (including the marketing and distribution costs thereof). These costs reduce the potential growth of your investment.

### One-off charges taken before or after you invest

<b>Entry charge</b>	2.00%
<b>Exit charge</b>	N/A.

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

<b>Ongoing charges</b>	0.36%
------------------------	-------

### Charges taken from the fund under certain specific conditions

<b>Performance fee</b>	N/A.
------------------------	------

- The entry charges mentioned herein are maximum figures. In certain circumstances, these charges may be lower. Please contact your distributor or usual advisor to obtain the amount of charges effectively applied.
- The amount of ongoing charges mentioned herein is based on an estimate of the total expected annual costs. This amount may vary from quarter to quarter. These charges include transaction fees incurred by the fund when it subscribes to and/or sells units of another fund, but do not include either (i) the fees incurred by the fund when it makes investments other than subscriptions/sales of units of funds or, where applicable, (ii) the performance fee.
- Specific costs may be charged in case of sub-fund conversion.
- For more information on all the charges and the way they are calculated, please refer to the "Fees and costs" section of the prospectus.
