As standard, Fidelity aims to meet all applicable tax reporting requirements for all Funds within the umbrella. Applications are made throughout the year depending on the time scale required by each applicable local tax authority of the relevant country that the fund is registered in.

Investment Objective

The fund's objective is to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the S&P 500 Index. Sustainability Risks are not currently integrated for this fund as the integration of Sustainability Risks is not part of the Index methodology. For currency hedged share classes, the return will be hedged to the base currency of the relevant share class. For full details of the objectives please refer to the Key Information Document (KID) and the Prospectus.

Index Description

The Index measures the performance of 500 stocks from top US companies in leading industries of the US economy which comply with S&P's size, liquidity and free-float criteria. These criteria are designed to identify those companies whose securities make up 85% of the publically traded market (i.e., the large and mid-capitalisation companies). Full details of the criteria are available on the index provider's website at <http://us.spindices.com/indices/equity/sp-500>.

Important Information:

Before investing you should read the Key Information Document (KID). The value of investments and any income from them may go down as well as up and an investor may not get back the amount invested. Where an investor's own currency is different to the currency of the fund's investments, the fund's returns can be affected by fluctuations in currency exchange rates. The use of financial derivative instruments may result in increased gains or losses within the fund. Funds are subject to charges and expenses. Charges and expenses reduce the potential growth of your investment. This means you could get back less than you paid in. The costs may increase or decrease as a result of currency and exchange rate fluctuations. Please refer to the Prospectus and KID of the fund before making any final investment decisions. When referring to sustainability-related aspects of a promoted fund, the decision to invest should take into account all characteristics or objectives of the promoted fund as detailed in the prospectus.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging may be used to minimise the effect of this but may not always be successful.
