## Investment Objective and Policy

**Investment Objective:** The objective of the Fund is to track the performance of global investment grade fixed rate bond markets.

**Investment Policy:** The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the global investment grade, fixed-rate bond markets. The benchmark includes government, government-related and corporate bonds, as well as asset-backed, mortgage-backed and commercial mortgage-backed securities from both developed and emerging markets issuers. Index constituents may on occasion be rebalanced more often than the Index Rebalance Frequency, if required by the Index methodology, including for example where corporate actions such as mergers or acquisitions affect components of the Index.

Hedged Share Classes are made available to reduce the impact of exchange rate fluctuations between the currency of the Class and the currency in which the underlying assets are denominated. Investors should note that the hedged Share Classes (designated as such in this Supplement) will be hedged back to the currency of the relevant Class. Consequently the hedged Share Classes should more closely track the corresponding currency hedged versions of the Index ("**Currency Hedged Index**").

The Investment Manager and/or Sub-Investment Managers, on behalf of the Fund, will invest using the stratified sampling strategy as further described in the "**Investment Objectives and Policies – Index Tracking Funds**" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager and/or Sub-Investment Managers also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. The bond securities in which the Fund invests will be primarily listed or traded on Recognised Markets in accordance with the limits set out in the UCITS Regulations. Details of the Fund's portfolio and the indicative net asset value per share for the Fund are available on the Website daily.

**Currency Hedging:** The Fund will use financial derivative instruments ("FDIs"), including forward foreign exchange contracts, to hedge some or all of the foreign exchange risk for hedged Share Classes. Currency hedging transactions in respect of a hedged Share Class will be clearly attributable to that Class and any costs shall be for the

account of that Class only. All such costs and related liabilities and/or benefits will be reflected in the net asset value per Share of the Class. Over-hedged or under-hedged positions may arise unintentionally due to factors outside the control of the Investment Manager and/or Sub-Investment Managers but will be monitored and adjusted on a regular basis.

## Permitted Investments

**Bonds:** The securities in which the Fund invests may include government and government-related bonds, corporate bonds, asset-backed securities, mortgage-backed securities, commercial mortgage-backed securities, covered bonds and collateralised bonds. The Fund may also invest in Bonds acquired on the CIBM.

**Other Funds / Liquid Assets:** The Fund may invest up to 10% of its net assets in other regulated open-ended funds (including Money Market Funds) where the objectives of such funds are consistent with the objective of the Fund and where such funds are authorised in member states of the EEA, United Kingdom, USA, Jersey, Guernsey or the Isle of Man and where such funds comply in all material respects with the provisions of the UCITS Regulations. The Fund may hold ancillary liquid assets such as deposits in accordance with the UCITS Regulations.

**Derivatives and TBA Securities:** The Fund may use FDIs for currency hedging and efficient portfolio management purposes. Any use of FDIs by the Fund shall be limited to futures and forward foreign exchange contracts (including non-deliverable forwards). Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund; or the minimisation of tracking error, i.e. the risk that the Fund return varies from the Index return. FDIs are described in the "**Investment Objectives and Policies – Use of Financial Derivative Instruments**" section of the Prospectus.

The Fund may take exposure to mortgage-backed securities through "To Be Announced" ("**TBA**") securities. TBA securities are further described in the "**Investment Objectives and Policies – Use of TBAs**" section of the Prospectus.

## Securities Lending, Repurchase Agreements & Reverse Repurchase Agreements

The Fund does not currently participate in a securities lending programme, though it is entitled to do so. The Fund also does not intend to engage in repurchase agreements and reverse repurchase agreements. Should the Directors elect to change this policy in the future, due notification will

be given to Shareholders and this Supplement will be updated accordingly.

## Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “**Risk Information**” section of the Prospectus. In addition, the following risks are particularly relevant for the Fund.

**Index Tracking Risk:** The Fund’s return may not match the return of the Index. It is currently anticipated that the Fund will track the Index with a potential variation of up to 1% annually under normal market conditions. The Fund’s ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager and/or Sub-Investment Managers may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund’s return and that of the Index.

**Liquidity Risk & ETF Liquidity Risk:** Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund’s holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. Where the fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads of the Fund may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices that are materially different to the last available NAV.

**Duration / Interest Rate Risk:** Changes in interest rates are likely to affect the value of bonds and other debt instruments. Rising interest rates generally result in a decline in bond values, while falling interest rates generally result in bond values increasing. Investments with longer maturities and higher durations are more sensitive to interest rate changes, therefore a change in interest rates could have a substantial and immediate negative effect on the values of the Fund’s investments.

**Mortgage related and Other Asset Backed Securities Risk:** Investments in mortgage-related and other asset-backed securities are subject to the risk of significant credit downgrades, illiquidity, and defaults to a greater extent than many other types of fixed-income investments. During periods of falling interest rates, mortgage- and asset-backed securities may be called or prepaid, which may result in the Fund having to reinvest proceeds in other investments at a lower interest rate. During periods of rising interest rates, the average life of mortgage- and asset-backed securities may extend, which may lock in a below-

market interest rate, increase the security’s duration and interest rate sensitivity, and reduce the value of the security. Enforcing rights against the underlying assets or collateral may be difficult, and the underlying assets or collateral may be insufficient if the issuer defaults.

**Derivatives Risk:** The Fund may use FDIs for efficient portfolio management purposes as described in the derivatives section under Permitted Investments above. The Fund’s use of FDIs involves risks different from, and possibly greater than, the risks associated with investing directly in securities.**Share Class Risk:** There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Managers will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

**Currency Hedging Risk:** Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

**Emerging Markets Risk:** Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

**PRC Investments Risk:** In addition to the risks of investing in emerging markets, risks of investing in PRC Investments markets include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding new treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, custody risks including a lack of sufficient segregation of assets from those of the applicant for the CIBM Direct Access Programme and Sub-Custodian and tax uncertainty.

**Integrating Sustainability Risk:** Sustainability Risk has not been integrated into the Fund’s investment process. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund. Where a Sustainability Risk event occurs, this Fund may be more impacted than an equivalent Fund that integrates Sustainability Risk. Shareholders should refer to the “**Index**”

Sub-Investment Managers and communicated to investors prior to investment. Following the closing date of the Initial Offer Period, the Shares will be issued at the Dealing NAV.

### Investor Profile

The typical investors of the Fund are expected to be institutional, intermediary and retail investors who want to take a short, medium or long term exposure to the performance of global investment grade fixed rate debt markets and are prepared to accept the risks associated with an investment of this type and the expected low to medium volatility of the Fund.

### Subscriptions, Redemptions & Conversions

Investors may subscribe for or redeem Shares in the Fund on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges and in accordance with the provisions in the **“Purchase and Sale Information”** section of the Prospectus.

For subscriptions, consideration, in the form of cash or cleared in kind securities, must be received by the Settlement Deadline. For redemptions, a written redemption request signed by the Shareholder is required to be received by the Administrator by the Dealing Deadline on the relevant Dealing Day.

Shareholders should refer to the terms of the **“Purchase and Sale Information”** section of the Prospectus for information on Share conversions.
