Market Capitalisation Risk: The Fund will general invest in small market capitalization companies for which effective sales of securities may be more difficult and there may be greater price volatility

OBJECTIVE AND INVESTMENT POLICY

Investment Objective

The investment objective of this actively managed Fund is to outperform the MSCI World Small Cap Index (the "Benchmark"). There is no guarantee that the investment objective will be achieved. The Fund is actively managed by the Investment Manager, meaning that investment decisions are made on a fully discretionary basis. Accordingly, the portfolio holdings may deviate from the Benchmark. This deviation may be significant.

Investment Policy

The Fund invests:

- Primarily in equities and equity-related securities of, or linked to, small market capitalisation companies that are included in the country indices represented within the Benchmark.
- Up to 30% of its total assets in equities and equity-related securities of companies established in countries not represented within the Benchmark.

The Fund will not engage in transactions in FDIs.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 to 5 years.

For full investment objectives and policy details, please refer to the Prospectus and Supplement.

Income

Income from the Fund's investments will not be paid out in dividends (except for the distributing AUD and D2 Class Shares, which will distribute income in accordance with the distributing policy set out in the Supplement).

You may sell your shares on any bank business day in Dublin, Ireland.

RISK AND REWARD PROFILE

The risk category shows how much the Fund has risen and fallen in the past 5 years, and therefore how much the Fund's returns have varied. It is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. To the extent this share class has no or limited historical data, Benchmark performance data is used to supplement such historical data. The risk category is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean risk-free.

The Fund is ranked 6 due to its exposure to equity markets, which means the Fund may experience significant volatility.

Currency Risk: The base currency of the Fund is US Dollars. The non-US Dollar share classes of the Fund may be affected unfavourably by fluctuations in currency rates.

Liquidity Risk: Some of the Fund's investments may be difficult to buy or sell. This might affect the price at which the investments can be sold, which would affect the Fund's value.

Counterparty Risk: There is a risk that counterparties to some of the Fund's investments may not perform their obligations and that transactions may not settle.

Market Capitalisation Risk: The Fund will generally invest in small market capitalisation companies for which effective sales of securities may be more difficult and there may be greater price volatility.

For a more detailed explanation of these and other risks, please refer to the Prospectus and Supplement.
