

LIONTRUST

GF STRATEGIC BOND FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF Strategic Bond Fund is a sub-fund of Liontrust Global Funds plc. The Management Company is Bridge Fund Management Limited. This document is based upon the A1 EUR Accumulating share class (ISIN: IE00BYWRQF39), which is the representative class for all share classes listed in this document.

Objective

- The Fund aims to maximise total returns over the long term (at least 5 years) through a combination of income and capital.

Policy

- The Fund is actively managed without reference to any benchmark meaning that the Investment Adviser has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.
- The Fund will seek to achieve its objective by investing in bond and credit markets worldwide. The Fund invests in a wide range of bonds issued by corporates and governments, from investment grade through to high yield.
- The Fund invests in developed and emerging markets, with a maximum of 40% of its net assets invested in emerging markets.
- Investments may be made in "hard" currencies, such as US Dollar, Euro and Sterling, and up to 25% of the net assets of the Fund may be invested in soft currencies, such as those of emerging markets.
- Where the Fund invests in non-US Dollar assets, the currency exposure of these investments will generally be hedged back to US Dollar. Up to 10% of the Fund's currency exposure may not be hedged, i.e. the Fund may be exposed to the risks of investing in another currency for up to 10% of its assets.
- The Fund may invest both directly, and through the use of derivatives. The use of derivatives may generate market leverage (i.e. where the Fund takes market exposure in excess of the value of its assets).
- In addition, the Fund may invest in cash or cash equivalents, such as deposits and Money Market Instruments, for cash management purposes.
- Within the limits stated above, there are no geographical or economic sector restrictions on the Fund's investments.
- The fund manager considers environmental, social and governance ("ESG") characteristics of issuers when selecting investments for the Fund.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11.59a.m. (Irish time) for execution at midnight valuation point. Further details can be found at www.liontrust.co.uk.

Investment process

- The Fund seeks to capture the inefficiencies in the fixed income market through:
 - A top-down analysis for making strategic decisions: assessing the attractiveness of different areas of the global bond and credit markets, as well as regions, countries and currencies, by reference to the political environment and macro-economic variables as well as forward-looking surveys and indicators. This analysis determines the top-down shape of the Fund.
 - A detailed bottom-up analysis: assesses the creditworthiness of each potential/existing investment, as well as other financial variables.
- Before being selected for the portfolio, a number of factors are considered for each investment, such as expected total return relative to the assessed risk, duration and sustainability of cash flows.
- For each investment, fundamental, ESG, valuation and technical factors are considered to ensure consistency in decision making and to provide a flexible approach to bond investment.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the higher of the actual historical annualised volatility and the translated annualised volatility of the Fund based upon the internal Value at Risk limit.
- The Fund is categorised 4 primarily for its exposure to a diversified portfolio of debt instruments along with a number of derivative positions.
- The SRRI may not fully take into account the following risks:
 - Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result;
 - the creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay.
- The Fund can invest in derivatives. Derivatives are used to protect against currency, credit or interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.
- The Fund uses derivative instruments that may result in higher cash levels. Cash may be deposited with several credit counterparties (e.g. international banks) or in short-dated bonds. A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- The Fund invests in emerging markets which carries a higher risk than investment in more developed countries. This may result in higher volatility and larger drops in the value of the fund over the short term.
- The Fund has both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- The Fund may encounter liquidity constraints from time to time. Participation rates on

advertised volumes could fall reflecting the less liquid nature of the current market conditions.

- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

LIONTRUST

GF STRATEGIC BOND FUND
