FUND CHARACTERISTICS

Annualised Dividend Yield:	5.9%			
Equity Exposure:	47.7%			
Fixed Income Exposure:	51.8%			
Cash and Cash Equivalents	0.0%			
Exposure *:	0.0%			

Income may fluctuate and is not guaranteed. Yield is an annualised share-class yield based on the previous month's dividends paid by the Fund. The Fund intends to pay dividends from income and profits, but if these are insufficient, they may be paid from share capital. Dividends are calculated gross (before deduction of fees, expenses and taxes), and while this increases the dividend, it may erode capital. Hedged and wink this include the divident of the provide the divident of the provident of the divident of the dividen exposure can exceed 100% because of the use of derivatives

FEES AND PRICING

Minimum Investment: USD 5,000 Management Fee: 0.50% p.a. Ongoing Charges Figure *: 1.27%

*The ongoing charges figure excludes Fund transaction costs, except In the case of depositary fees and an entry/exit charge paid by the Fund when buying or selling Shares in another collective investment undertaking. A detailed description of the charges that apply is set out in the section "Charges and Expenses" in the Prospectus. The ongoing charges figure may change over time. Charges applied will reduce the return potential of investments. | If an investor's own currency is different from the currency shown, costs could increase or decrease due to currency or exchange related fluctuations.

SUMMARY OF INVESTMENT OBJECTIVE AND POLICY

The Wellington Multi-Asset Total Return Income Fund seeks to provide a combination of long-term total returns with regular income, while actively managing downside risk. The Portfolio Manager will actively manage the Fund and seeks to achieve the objective by investing in a broad array of global assets such as equities, government bonds and investment-grade and high-yield credit. The Portfolio Manager believes a consistent income combined with long-term capital growth can be achieved through the active management of assets and market exposures within a disciplined risk-control framework. The Fund is not constructed relative to a benchmark and does not use a benchmark for performance comparison purposes

Historical data may not be a reliable indication for the future. Risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'. Please refer to page 2 for more details about risks

WHAT ARE THE RISKS?

CAPITAL: Investment markets are subject to economic, regulatory, market sentiment and political risks. All investors should consider the risks that may impact their capital, before investing. The value of your investment may become worth more or less than at the time of the original investment. The Fund may experience a high volatility from time to time **CREDIT:** The value of a bond may decline, or the issuer/guarantor may fail to meet payment obligations. Typically lower-rated bonds carry a greater degree of credit risk than higher-rated bonds.

CURRENCY: The value of the Fund may be affected by changes in currency exchange rates. Unhedged currency risk may subject the Fund to significant volatility

DERIVATIVES: Derivatives may provide more market exposure than the money paid or deposited when the transaction is entered into (sometimes referred to as transaction is entered into (sometimes referred to as Leverage). Market movements can therefore result in a loss exceeding the original amount invested. Derivatives may be difficult to value. Derivatives may also be used for efficient risk and portfolio management, but there may be some mismatch in exposure when derivatives are used as hedges.

EMERGING MARKETS: Emerging markets may be subject to custodial and political risks, and volatility. Investment in foreign currency entails exchange risks. EQUITIES: Investments may be volatile and may fluctuate according to market conditions, the

performance of individual companies and that of the broader equity market. HEDGING: Any hedging strategy using derivatives may

not achieve a perfect hedge.

INTEREST RATES: The value of bonds tends to decline as interest rates rise. The change in value is greater for longer term than shorter term bonds.

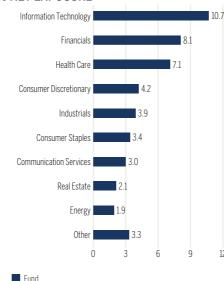

LEVERAGE: The use of leverage can provide more market exposure than the money paid or deposited when the transaction is entered into. Losses may therefore exceed the original amount invested.

SMALL AND MID-CAP COMPANY: Small and mid-cap companies' valuations may be more volatile than those of large cap companies. They may also be less liquid. SUSTAINABILITY: A Sustainability Risk can be defined as an environmental, social or governance event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of an investment.

Before subscribing, please refer to the Fund offering documents/prospectus for further risk factors and pre-investment disclosures. For the latest NAV, please visit www.fundinfo.com.
