

Tosca UCITS Fund

a Sub-Fund of MontLake UCITS Platform ICAV managed by Waystone Fund Management (IE) Limited (formerly MontLake Management Limited)

GBP Founder Class Shares (IE00BFY6PC57)

Objectives and Investment Policy

Investment Objective

The investment objective of the Sub-Fund is to increase the value of your shares over the long term.

Investment Policy

The Sub-Fund will primarily invest in shares of companies listed on markets around the world in the mid to large capitalisation sectors of the markets. The Sub-Fund is not focused on any one company or region, but will be concentrated on companies which have a significant level of business in financial services and associated business sectors such as banks, e-commerce companies, real estate investment trusts and insurance institutions. The Sub-Fund may also invest in debt securities issued by such companies.

Investment may be both long and short, so the Sub-Fund may either purchase a security and hold it in expectation that the price of the security will go up (a long position), or else contract to sell a security it does not own in expectation of buying the security later at a lower price (a short position) and profiting from the fall in value. Any short positions will be taken only through the use of derivatives.

Under normal market conditions, it is expected that the Sub-Fund may have up to 112.5% of its net asset value in long positions and up to the same amount in short positions at any one time.

Investment may also be made in convertible bonds (a convertible bond is a type of debt security that can be converted into shares in the issuer), and the Sub-Fund may invest indirectly by using securities issued by investment banks and other intermediaries with a value linked to an underlying share instead of the shares themselves in certain markets where direct investment by foreign investors may be restricted.

The Sub-Fund may invest in equity indices to gain exposure to its target markets, and may also use both equity and credit indices for portfolio hedging purposes through the use of derivatives. Examples of these indices include major indices in global equity and credit markets, such as the FTSE indices, the MSCI family of indices, the CBOE volatility indices, the S&P indices, the Dow Jones Stoxx indices and the CDX and iTraxx indices.

The derivatives used by the Sub-Fund may include futures, swaps (including total return swaps), options (including options to enter into a

swap or swaptions) and contracts for difference. The Sub-Fund may buy and sell foreign exchange either spot, forward or via derivatives, with the objective of hedging portfolio FX exposures.

A derivative is a contract the value of which depends on the change in price of an agreed-upon underlying financial asset, index or security. Some derivatives give the holder the economic effect of a long or short position in the underlying asset without actually having to buy or sell it directly. Other derivatives may give the holder the right to buy or sell an underlying asset.

The Sub-Fund may also invest in open-ended exchange traded funds and both open-ended and closed-ended collective investment schemes which enable the Sub-Fund to achieve its investment objective. The Sub-Fund may also invest in cash, government bonds and money market instruments for cash management purposes.

Subscription and Redemption

You may sell your shares in the Sub-Fund on any day that banks are open in Ireland and the United Kingdom. You must submit your application to the Sub-Fund's Administrator before 1.00 p.m. three business days before the day on which you want to sell.

Income

Your shares do not pay income, but instead the Sub-Fund reinvests such income to grow your capital.

Fund Currency

As your shares are denominated in GBP and the Sub-Fund is valued in USD, forward contracts are used to attempt to eliminate the effects of changes in the currency exchange rates.

Benchmark

The Sub-Fund is actively managed, meaning the Investment Manager actively selects and invests the securities in which the Sub-Fund invests with the aim of meeting the investment objective of the Sub-Fund, and is not managed with reference to any benchmark.

Investment Horizon

Recommendation: the Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

Why is the Sub-Fund in the specific category?

The risk category for this Sub-Fund is set at 7. It is calculated in line with EU regulations and is based on the risk limit for the Sub-Fund.

Risk Disclaimer

A **category 1** Sub-Fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **category 7** Sub-Fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 Sub-Fund is not twice as risky as a category 1 Sub-Fund. The risk category shown is not guaranteed and may change over time.

When categorising the Sub-Fund, it may happen that not all material risks were fully captured in the methodology:

Credit and Counterparty Risk: A counterparty may fail in paying the proceeds of sale for assets sold by the Sub-Fund or may fail in delivering

securities purchased by the Sub-Fund. The Sub-Fund may also incur the risk that a counterparty may fail to settle a transaction in accordance with its terms and conditions because the contract is not legally enforceable or because it does not accurately reflect the intention of the parties or because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Sub-Fund to suffer a loss.

Short Selling Risk: The Sub-Fund may create synthetic short positions through the use of derivatives. Short positions behave differently from long positions, and the Sub-Fund can for example come under pressure to close out short positions at short notice, and before an offsetting long position can mature. This can create unexpected losses from positions that might otherwise have been seen as low risk or well hedged.

Leverage Risk: The use of derivatives, the terms of which have the effect of magnifying the outcome of an investment in the underlying asset, to create leverage means that as well as the profits, the losses from the investment can be greater than if the investment is made directly into the underlying shares. In addition, unless the losses are capped in some way or offset by another investment, such losses could theoretically be unlimited.

For a more detailed explanation of risks, please refer to the "Special Considerations and Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after the investment	
Entry charge	None
Exit charge	None
This is the maximum that may be deducted from the investor's money before it is invested or before the proceeds of the investment are paid out.	
Charges debited to the Fund over a year	
Ongoing charge	4.39%
Charges debited to the Fund under certain specific conditions	
Performance fee	The performance fees are calculated in accordance with the methodology described in the prospectus using a rate of 20.00% of any returns the Fund achieves above the previous highest NAV. In the Fund's last financial year the performance fee was 0.20% of the Fund.

Any entry/exit charge shown is a maximum figure. Where charges are shown in some cases you might pay less; you can find this out from your financial advisor or distributor.

The ongoing charges figure is based on expenses for the twelve months ending December 2020. This figure may vary from year to year. It excludes portfolio transaction costs and performance fees.

You can find out more details about the charges and how they are calculated by looking at the Sub-Fund's prospectus and supplement which are available at www.montlakeucits.com.

Past Performance

% ■ GBP Founder Class Shares (IE00BFY6PC57)

The past performance takes account of all charges and costs.

Past performance is not a reliable indicator of future results.

The Sub-Fund came into existence in 2018.

This Share class was launched on 4 April 2019.

The value of the Share Class is calculated in GBP.
