Invesco Global Small Cap Equity Fund

Z (EUR)-AD Shares 31 March 2024

This marketing communication is for Professional investors in Continental European countries as defined in the important information section, and Dubai. Investors should read the legal documents prior to investing. This document may also be used by financial intermediaries in the United States as defined in the important information section.

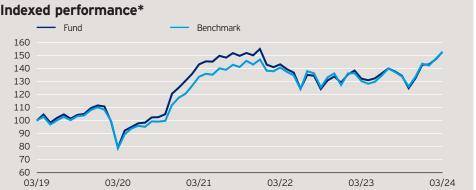

Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. This is a small companies fund, you should be prepared to accept a higher degree of risk than a fund that invests in larger companies. As a portion of the Fund may be exposed to less developed countries, you should be prepared to accept large fluctuations in the value of the Fund.

Fund Strategy

The fund delivers a globally diversified strategy. We believe that smaller companies are best managed by regional specialists and that only regional asset allocation should be decided at a global level. Investment decisions are based on views and perspectives on individual companies, where the regional managers find value and identify stock opportunities. A dual fund manager/analyst role within the Group provides both ownership and accountability for each investment decision and the performance of each regional element. The lead manager appraises the attractiveness of each region based primarily on valuation, but also considers the outlook for geographic region globally.

Past performance does not predict future returns. The performance period shown here starts on the last day of the first indicated month and ends on the last day of the last indicated month.
