Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund. The fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the fund.

Fund Strategy

We seek to invest in companies for significantly less than they are worth. Our search for undervaluation leads us to look for new ideas in unloved areas of the market. At the same time, we have a clear preference for cash-generative companies with strong balance sheets, as these attributes suggest sustainable business models and conservative management. The Fund invests at least 80% of its assets in shares or other equity related securities of companies incorporated, domiciled or carrying out the main part of their economic activity in Emerging Markets excluding China.
