

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## GAM Multistock - Emerging Markets Equity,

a sub-fund of the SICAV GAM Multistock

(ISIN: LU1802378361, share class: I - USD)

GAM (Luxembourg) S.A., part of GAM Holding AG, manages this Fund

### Objectives and investment policy

- The aim of the sub-fund ("Fund") is to achieve long-term capital growth. For this purpose, the Fund invests in selected shares of companies in emerging economies.
- The Fund invests at least 70% of its assets in companies in emerging markets. Through the link between the Shanghai, Shenzhen and Hong Kong stock exchanges (Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect), the Fund can invest directly in Chinese A shares. In addition, investments in Chinese B and H shares can be built up.
- The Fund may use complex financial instruments to hedge the Fund assets and to profit from promising investments. These instruments entail additional leverage and, as a result, the Fund assets may fluctuate significantly up or down.

The Fund also has the following characteristics of importance to investors:

- The Fund follows the MSCI Emerging Markets as a benchmark index, which represents the market for shares in emerging economies. The Fund is actively managed and aims to outperform the benchmark index over the long term. In the selection and weighting of Fund investments, the Fund is independent of the benchmark index.
- Investors may buy or sell the Fund on any bank working day in Luxembourg.
- The Fund has several share classes. These may differ with regard to charges, currency and the use of revenues.
- Income is reinvested in the share class.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within five years.

### Risk and reward profile

The above indicator shows what risk and reward characteristics the Fund has, based on the Fund's historical performance over the last 5 years. Where a 5-year performance history is not available, the history has been simulated on the basis of an appropriate benchmark index.

- The Fund is assigned to the above category based on its historical fluctuations in value.
- The indicator helps investors to have a better understanding of the potential gains and losses related with the Fund. In this context, even the lowest category does not represent a risk-free investment.
- The past performance of the Fund provides no indication of its current or future performance.
- This allocation to a risk category may change over time because the future performance of the Fund may fluctuate differently than in the past.
- The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

The indicator takes account of the risks entailed in the Fund's net asset value. These mainly involve fluctuations in the value of the investments. In addition to the risks expressed through the indicator, the Fund's net asset value may also be significantly affected by the following factors:

- The Fund invests in assets which are generally easy to trade and may therefore be sold at their market value under normal circumstances. However, it cannot be ruled out that in certain extreme situations (e.g. market turbulences) the tradeability of the assets in the Fund may be limited. In such situations, the assets in the Fund may only be sold at a loss, which will reduce the value of the Fund.
- The Fund invests in complex financial instruments (e.g. derivatives), the value of which is connected to underlying assets. Certain of these financial instruments may entail a leverage effect which may have a sharp impact on the Fund's net asset value.
- If the Fund invests in non-standardised complex financial instruments, it is exposed to counterparty default risk.
- The political, legal and economic situation is often unstable in emerging economies and can be subject to rapid and unforeseen changes. This may have a negative impact on international investors as well as on the capital markets of such countries. Accordingly, the performance of Funds which invest in such countries may be negatively affected.
- Stock Connect – Stock Connect is a new trading programme, and the applicable regulations have not yet been proven in practice and thus may be subject to change. Investment through Shanghai-Hong Kong Stock Connect is exposed to additional risks, such as quota limitations, sales restrictions imposed by front-end surveillance, certain rules governing ownership of securities within the framework of Stock Connect, participation in capital measures and in unitholder meetings, a lack of compensation system to protect investors, differences in trading days, operating risk, the deletion of qualified shares and trade restrictions, trading costs (including taxes), rules in force on local markets, restrictions on the holding of foreign equities and reporting obligations, clearing, settlement and deposit risk, currency risk, and the risk of default.
- Stock Connect – Stock Connect is a new trading programme, and the applicable regulations have not yet been proven in practice and thus may be subject to change. Investment through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect is exposed to additional risks, such as quota limitations, sales restrictions imposed by front-end surveillance, certain rules governing ownership of securities within the framework of Stock Connect, participation in capital measures and in unitholder meetings, the lack of a compensation system to protect investors, differences in trading days, operating risk, the deletion of qualified shares and trade restrictions, trading costs (including taxes), rules in force on local markets, restrictions on the holding of foreign equities and reporting obligations, clearing, settlement and deposit risk, currency risk, and the risk of default.

## Charges

The costs borne by you are used to pay for the management of the Fund and its distribution and marketing. These costs reduce the Fund's performance.

One-off charges taken before or after you invest	
Issue fee	5.00%
Redemption fee	3.00%
Conversion fee	1.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.08%
Charges taken from the fund under certain specific conditions	
Performance fee	None

Both the issue and redemption fees and the conversion fees are maximum rates. You may be charged less than this. Your advisor will be able to provide you with further information.

Ongoing costs are calculated at the end of the financial year. The figure may differ from year to year. It does not include:

- Transaction costs, except if the Fund has to pay issue and redemption fees to buy or sell other collective investments.

Further information on costs is provided in the full prospectus. This can be downloaded from the websites [www.funds.gam.com](http://www.funds.gam.com) and [www.fundinfo.com](http://www.fundinfo.com).
