Janus Henderson INVESTORS

A sub-fund of Janus Henderson Fund, a Luxembourg SICAV managed by Janus Henderson Investors Europe S.A.

Objective and investment policy

Objective

The Fund aims to provide a positive (absolute) return, regardless of market conditions, over any 12 month period. A positive return is not guaranteed over this or any other time period and, particularly over the shorter term, the Fund may experience periods of negative returns. Consequently, your capital is at risk.

Performance target: To outperform the US Base Rate, after the deduction of charges, over any 3 year period.

Investment policy

The Fund invests in shares and makes extensive use of derivatives (complex financial instruments) to take both 'long' and 'short' positions in companies throughout the world that the investment manager believes will either rise in value (long positions) or fall in value (short positions) meaning that the Fund may benefit from either scenario.

Typically, the Fund will match each long position in a company with an equivalent sized short position in another company (known as a 'pair'), with the aim of benefitting from price divergence between the long and short exposures of the pair, while minimising the effect of wider market movements.

The Fund will hold a significant proportion of its assets in cash and money market instruments as a result of holding derivatives.

The investment manager may also use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the US Base Rate as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). For currency hedged Share Classes, the central bank rate that corresponds with the relevant Share Class currency is used as the basis of the performance comparison and for calculating performance fees. The investment manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark.

Strategy

The investment manager targets positive returns, with low correlation to movements in stock markets. Returns are sought through balancing positions in companies with attractive prospects (long positions) with positions in companies with unattractive prospects (short positions), thereby attempting to isolate the Fund from moves within equity markets more widely. The process captures the best ideas from across Janus Henderson's equity teams globally.

Other Information Environmental, social and governance (ESG) criteria are one of the components of management but their weight in the final decision is not defined in advance. The Fund promotes environmental and/or social characteristics as defined under Article 8 of the Sustainable Finance Disclosure Regulation (SFDR).

Transaction costs In addition to the charges set out in the Charges section below, the Fund involves a high level of buying and selling activity and will incur higher portfolio transaction costs which are paid from the assets of the Fund. These may have a material impact on your returns.

Distribution policy This share class accumulates income which is retained within the price of the share class.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Company's Prospectus.

Risk and reward profile

Potentially lower reward						Potentially higher reward
Lower risk						Higher risk
1	2	**3**	4	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on simulated historic volatility. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 3 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Equities Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Derivatives and Leverage The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share/unit class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Currency Hedging When the Fund, or a hedged share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.
