

abrdn SICAV I - Diversified Growth Fund

This is a marketing communication. Please refer to the Prospectus of the UCITS/Information document and the Key Investor Information Document (KIID) or Key Information Document (KID) as applicable before making any final investment decisions.

I Acc Hedged USD

March 31, 2024

Objective

The Fund aims to achieve a combination of growth and income by actively managing allocations in investments in a broad range of global assets.

The Fund aims to exceed the return on cash deposits (as currently measured by a benchmark of Euro Short Term Rate ("ESTR")) by 5% per annum over rolling five year periods (before charges). There is however no certainty or promise that the Fund will achieve this level of return.

Portfolio securities

- The Fund is a global fund insofar as its investments are not confined to or concentrated in any particular geographic region or market.
- The Fund's investments include, but are not limited to, shares of companies, bonds (which are loans that can pay a fixed or variable interest rate) issued by Governments, banks and international companies.
- The Fund may also invest in other Funds (including those managed by abrdn), money-market instruments, and cash.
- The Fund may have exposure to currencies other than the Base Currency of up to 100% of its Net Asset Value.

Costs may increase or decrease as a result of currency and exchange rate fluctuations. This may impact what you might get back. "Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the performance target / performance comparator / portfolio constraining benchmark. All return data includes investment management fees, operational charges and expenses, and assumes the reinvestment of all distributions. The returns provided do not reflect the initial sales charge and, if included, the performance shown would be lower. This Base Currency Exposure shareclass does not have a benchmark with the equivalent level of currency hedging to the shareclass. Please see the factsheet of the primary shareclass for the performance relative to benchmark.

Past performance does not predict future returns.

Risk and reward profile

This indicator reflects the volatility of the fund's share price over the last five years. See the relevant UCITS Key Investor Information Document (KIID) or PRIIP Key Information Document for details.

Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.

Management process

- The Fund is actively managed.
- The Fund's investment exposures and returns may differ significantly from the benchmark.
- Our investment team use their discretion to identify a diverse mix of investments which they believe are most appropriate for the Investment Objective. As a result of this diversification, and during extreme equity market falls, losses are expected to be below those of conventional global equity markets, with a volatility (a measure of the size of changes in the value of an investment) typically less than two thirds of equities.
- abrdn integrate environmental, social and governance (ESG) considerations within the investment process. Details of the Multi-Asset ESG Integration Approach are published at www.abrdn.com under "Sustainable Investing".

- (d) The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- (e) Dividend payment policies of the REITs in which the fund invests are not representative of the dividend payment policy of the fund.
- (f) Emerging markets are countries generally considered to be relatively less developed or industrialized, and investments in emerging markets countries are subject to a magnification of the risks that apply to foreign investments. These risks are greater for securities of companies in emerging market countries because the countries may have less stable governments, more volatile currencies and less established markets.
- (g) The fund invests in mortgage and asset-backed securities (which may include collateralised loan, debt or mortgage obligations (respectively CLOs, CDOs or CMOs)). These are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- (h) The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- (i) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- (j) The shares of small and mid-cap companies may be less liquid and more volatile than those of larger companies.

Derivative usage

- The Fund may use investment techniques (including Derivatives) to seek to protect and enhance the value of the Fund and to manage the Fund's risks. Derivatives, such as futures, options and swaps, are linked to the rise and fall of other assets. In other words, they 'derive' their price from another asset. They can generate returns when share prices and/or indices fall.

¹These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

²The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.50% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds. There are other applicable costs. The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Fund offering Documents will be updated to reflect current changes.

Hedged share classes aim to reduce the effect of exchange rate movements between the Fund base currency and the currency of the share class. Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

The fund is a Luxembourg-domiciled UCITS fund, incorporated as a Société Anonyme and organized as a Société d'Investissement à Capital Variable (a "SICAV"). The fund has been authorised for public sale in certain jurisdictions and private placement exemptions may be available in others.
