

KEY INVESTOR INFORMATION

This document provides you with key investor information about the Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in the Fund. You are advised to read it so you can make an informed decision about whether to invest.

Alpine Merger Arbitrage Fund, a sub-fund of Strategic Investment Funds UCITS Plc. Representative Class - Class A (EUR) Share Class - (ISIN IE00BG7PPR18) The Fund is managed by Bridge Fund Management Limited (the “Manager”)

Objectives and Investment Policy

The investment objective is to seek capital appreciation. The Fund aims to achieve this by utilizing a merger arbitrage strategy. This strategy involves investing in a globally diversified portfolio of companies which are involved in, or which are linked to, mergers and acquisitions. The Fund shall primarily gain exposure to the global equity securities of the companies, either directly or indirectly via derivatives. Also due to the nature of the strategy, and to a limited extent, the Fund may also receive other instruments including corporate bonds, private stock, warrants and rights, etc.

The Fund is an actively managed fund which is not managed in reference to a benchmark. The Fund may invest in emerging markets, but no more than 20% is expected. The Fund may invest in other funds, but only up to a limit of 10% of NAV. The Fund will take long and short exposures which is typical of a merger arbitrage strategy.

The Fund's performance may be strongly influenced by movements in FX rates. Please refer to the supplement and the prospectus for more information. Leverage is employed by the Fund, the degree of which is calculated using the absolute Value at Risk (VaR) methodology.

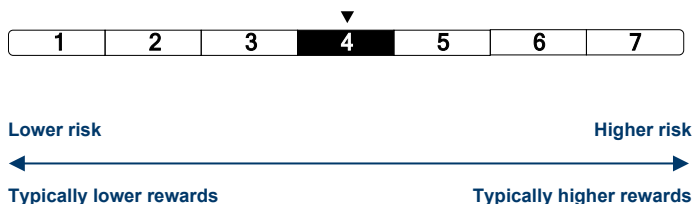

The Fund may invest in financial derivative instruments (which are

contracts between two or more parties whose price is determined upon the future performance or outcome of a particular underlying asset or group of assets). These are used to achieve indirect exposure to a market, to achieve synthetic shorting, and are also used to manage risk. These financial derivative instruments may include, but are not limited to equity swaps, contracts for difference (CFDs), forwards and futures. Please refer to the supplement of the prospectus for more information.

The units in the Fund are accumulating units. Income from the Fund's investments will be included in the value of the units rather than being paid out as a dividend. Investors may subscribe or redeem on a daily basis. Please refer to the definition of Dealing Day in the supplement.

In light of the investment policies of the Fund, an investment in the Fund is suitable only for those persons and institutions for whom such investment does not represent a complete investment program, who understand the degree of risk involved, who can tolerate a medium to high level of volatility, and who believe that the investment is suitable based upon their investment objectives and financial needs. An investment in the Fund should be viewed as medium to long-term. This Document can also be obtained in the following translated versions: German and Spanish.

Risk and Reward Profile

The risk category is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category, 1, does not mean risk free. The Fund is rated 4 due to the nature of its investments which include the risks listed. The Fund is invested in financial markets and uses techniques and instruments that are subject to moderate levels of variation up and down under normal market conditions.

There is no guarantee that the investment objective of the Fund will be achieved. The Fund is not capital guaranteed. Investors are depending on the ability of the Investment Manager with respect to the selection of the Fund's investments.

Additional Risks

Merger Arbitrage Risk: The principal risk involved in merger arbitrage is that mergers and other arbitrage transactions may not be completed.

Investment in Equity Securities: Equity securities will be subject to

risks including fluctuations in market prices, adverse issuer or market information and the fact that equity interests are subordinate in the right of payment to other corporate securities, including debt securities. The value of these securities varies with the performance of the respective issuers and movements in the equity markets generally.

Derivatives Risk: Derivative transactions will be used to a significant extent and prices may be volatile. Leverage strategies may be used which increases the effect of market movements and may result in significant losses. The use of over the counter (OTC) derivatives results in counterparty risk.

Liquidity Risk: The risk that a given security or asset cannot be traded quickly enough in the market to prevent a loss (or make the required profit).

Currency Risk: Movements in FX rates may negatively affect the Fund's performance.

Emerging Markets Risk: Risk arising from investing in countries with less investor protection and more volatility than developed markets.

Political Risk: Risk arising from changes in government policies such as Tax, restrictions on foreign investment, or any other political changes that may affect the value of the Fund's assets.
