## M&G (Lux) Global Sustain Paris Aligned Fund

a sub-fund of M&G (Lux) Investment Funds 1  
USD Class CI – Accumulation shares ISIN no. LU1866905323  
Managed by M&G Luxembourg S.A.

### Objective and investment policy

The fund aims to:

- financial objective: provide a combination of capital growth and income to deliver a higher return than the global stock market over any five-year period; and
- sustainable objective: invest in companies that contribute towards the Paris Agreement climate change goal.

**Core investment:** at least 80% of the fund is invested directly in the shares of companies, across any sector and of any size, from anywhere in the world, including emerging markets. The fund usually holds shares in fewer than 40 companies. The Fund invests in securities that meet the ESG Criteria, applying an Exclusionary Approach and Positive ESG Outcome, in addition to its sustainable investment strategy in pursuit of the sustainable investment objective, as described in the precontractual annex.

**Other investments:** the fund may also invest in other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

**Derivatives usage:** To reduce risk and costs.

**Strategy in brief:**

- Investment approach: the fund makes long-term investments in undervalued companies, applying a sustainable investment strategy, as described in the precontractual annex.
- Investment manager's ESG classification: Planet+ / Sustainable, as defined in the Prospectus.

**Benchmark:** MSCI World Net Return Index

The benchmark is a comparator used solely to measure the fund's performance. The investment manager considers the fund's weighted average carbon intensity against the benchmark, which does not otherwise constrain portfolio construction. The benchmark has been chosen as it best reflects the scope of the fund's financial objective. The fund is actively managed. The investment manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

### Risk and reward profile

■ The above risk and reward indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 6 because its simulated Net Asset Value has shown high rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

**The main risks that could affect performance are set out below:**

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- The fund holds a small number of investments, and therefore a fall in the value of a single investment may have a greater impact than if it held a larger number of investments.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.
- ESG information from third-party data providers may be incomplete, inaccurate or unavailable. There is a risk that the investment manager may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the portfolio of the fund.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)
