- **Recommendation: The Fund may be suitable for Investors seeking capital appreciation with an investment horizon over the medium to long term.**

Risk and Reward Profile

- The lowest category does not mean a risk free investment.
- The risk and reward profile may change over time.
- Historical data may not be a reliable indication for the future.
- This Fund is in category 4, since the share price has a moderate volatility and therefore the risk of loss as well as the expected reward is generally medium.

The following risks may not be fully captured by the risk and reward indicator:

- **Credit Risk:** The Fund can invest a material part of its assets in bonds. Their issuers can become insolvent, thus their bonds can either partly or

entirely diminish in value.

- **Equity Risk:** The risk that investments depreciate because of stock market dynamics.
- **Market Risk:** The Fund's assets may decrease because of sovereign acts and political transformation, which may also influence free trade of currency. In addition, risks may arise because of restricted information possibilities in addition to less stringent supervision and control of certain markets. The performance of these markets may be subject to significant volatility.
- **Emerging Market Risk:** The risk that political or economic changes can arise from a period of instability within emerging markets. They can influence the value of investments.

A complete description of risk factors is set out in the Prospectus in the section entitled 'General risk factors'.
