

Short Duration Emerging Market Debt Fund

USD I Accumulating Class

29 April 2016

FUND OBJECTIVE

To increase the value of your shares through a combination of growth and income from hard currency denominated short duration investments in sovereign and corporate bonds (debt securities) issued in emerging market countries.

Short duration securities have a shorter maturity (the date on which a bond is repaid to the investor) and a lower duration (how long it takes in years for the bond to be repaid); with low duration classified as approximately two years relative to four years for the broader high yield universe.

Hard currency denominated investments refers to investments denominated in US Dollar, Euro, Sterling, Japanese Yen and Swiss Franc.

Investments may be made in investment grade, high yield or unrated debt securities.

Investment grade refers to sovereign and corporate issuers with a higher credit rating. High yield bonds have a lower credit rating because they carry a higher risk of not being paid back. High yield bonds typically offer a higher income to make them attractive to investors.

RISK CONSIDERATIONS

Economies in Emerging Markets are generally less well regulated and may be adversely affected by trade barriers, exchange controls, protectionist measures and political / social instability. There is a risk of volatility due to lower liquidity and the availability of reliable information.

Debt securities of Emerging Market Countries may be subject to greater risk of loss of principal and interest than debt securities issued by obligors in developed countries and may be considered to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal.

Investors who subscribe in a currency other than the base currency of the Fund are exposed to currency risk. Fluctuations in these exchange rates may affect the return on investment.
