NEUBERGERBERMAN

# Neuberger Berman Uncorrelated Strategies Fund

USD C1 Accumulating Class

28 March 2024

## FUND OBJECTIVE

The fund aims to achieve a target average return of 5% over the benchmark after Portfolio Costs (as defined in the prospectus supplement), over a market cycle (typically 3 years) from a diversified portfolio of uncorrelated investment strategies. Correlation is the relationship or connection between different investments. The fund allocates assets to multiple investment advisors that employ a variety of investment strategies and invest globally without a focus on any particular industrial sector. There can be no guarantee that the fund will ultimately achieve its investment objective and capital invested is at risk.

## RISK CONSIDERATIONS

**Market Risk:** The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy.

**Liquidity Risk:** The risk that the fund may be unable to sell an investment readily at its fair market value. In extreme market conditions this can affect the fund's ability to meet redemption requests upon demand.

**Derivatives Risk:** The fund is permitted to use certain types of financial derivative instruments (including certain complex instruments). This may increase the fund's leverage significantly which may cause large variations in the value of your share. Investors should note that the fund may achieve its investment objective by investing principally in Financial Derivative Instruments (FDI). There are certain investment risks that apply in relation to the use of FDI. The fund's use of FDI can involve significant risks of loss.

**Interest Rate Risk:** The risk of interest rate movements affecting the value of fixed-rate bonds.

**Credit Risk:** The risk that bond issuers may fail to meet their interest repayments, or repay debt, resulting in temporary or permanent losses to the fund.

**Counterparty Risk:** The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date.

**Operational Risk:** The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

**Currency Risk:** Investors who subscribe in a currency other than the base currency of the fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. Where past performance is shown it is based on the share class to which this factsheet relates. **If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.**

For full information on the risks please refer to the fund prospectus and offering documents, including the KID or KIID, as applicable.
