### SUMMARY OF INVESTMENT OBJECTIVE

The Wellington FinTech Fund seeks long-term total returns by investing primarily in companies globally that leverage technology to enhance or disrupt traditional financial services. Using fundamental, bottom-up, company specific analysis the Fund aims to invest in financial technology companies and/or companies where the key growth driver is to provide or use technology to deliver the next generation of financial services (FinTech). Although the Fund is not constructed relative to a benchmark, the MSCI All Country World Index will serve as a reference benchmark.

### FUND PERFORMANCE (%)

#### TOTAL RETURNS NET OF FEES AND EXPENSES

	YTD	1 MO	3 MOS	1 YR	3 YRS	5 YRS	10 YRS	SINCE INCEPTION
USD EN Acc	16.0	6.8	28.1	22.6	-	-	-	25.6

#### DISCRETE ANNUAL PERFORMANCE

	JUL '19 - JUN '20	JUL '18 - JUN '19	JUL '17 - JUN '18	JUL '16 - JUN '17	JUL '15 - JUN '16
USD EN Acc	17.6	-	-	-	-
MSCI AC World Net	2.1	-	-	-	-

#### Past results are not necessarily indicative of future results and an investment can lose value.

Your financial adviser or intermediary may charge fees in addition to those charged by the Fund, which will lower returns. The inception date of the USD EN Acc share class is 16 May 2019. | Fund returns shown are net of USD EN Acc share class fees and expenses. Fund returns shown are net of actual (but not necessarily maximum) withholding and capital gains tax but are not otherwise adjusted for the effects of taxation and assume reinvestment of dividends and capital gains. The index returns, where applicable, are shown net of maximum withholding tax and assume reinvestment of dividends. Periods greater than one year are annualised. If an investor's own currency is different from the currency in which the fund is denominated, the investment return may increase or decrease as a result of currency fluctuations. | Please note the fund has a swing pricing mechanism in place. | If the last business day of the month is not a business day for the Fund, performance is calculated using the last available NAV. This may result in a performance differential between the fund and the index. | Source: Fund - Wellington Management. Index - MSCI.

### FUND MANAGEMENT

**Bruce Glazer**  
28 years of experience  
**CITYWIRE** +

Wellington Management Company LLP (WMC) is an independently owned investment adviser registered with the US Securities and Exchange Commission. WMC, along with its affiliates (collectively, Wellington Management), provides investment management and investment advisory services to institutions around the world. | This material and its contents may not be reproduced or distributed, in whole or in part, without the express written consent of Wellington Management. This document is intended for marketing purposes only. It is not an offer or a solicitation by anyone, to subscribe for shares in Wellington Management Funds (Ireland) plc (the Fund). Nothing in this document should be interpreted as advice, nor is it a recommendation to buy or sell shares. Investment in the Fund may not be suitable for all investors. The Fund only accepts professional clients or investment through financial intermediaries. Any views expressed are those of the author at the time of writing and are subject to change without notice. Fund shares are made available only in jurisdictions where such offer or solicitation is lawful. Please read the latest Key Investor Information Document (KIID) Prospectus, and latest annual report (and semi-annual report) before investing. For each country where the Fund is registered for sale, the prospectus and the KIID are available respectively in English and in the official language(s). The prospectus and KIID are available at the Funds Transfer Agent State Street Fund Services (Ireland) Limited, 78 Sir John Rogerson's Quay, Dublin 2, Ireland; at the local paying agent, if any, and from [www.Wellington.com/KIIDs](http://www.Wellington.com/KIIDs). The Fund is authorised and regulated as a UCITS scheme by the Central Bank of Ireland. Complaints can be submitted to the Complaints Officer at Wellington Management Funds (Ireland) plc, 25-28 North Wall Quay, International Financial Services Centre, Dublin 1, Ireland, the complaint procedure is also available free of charge at this address. | In Switzerland, the Fund offering documents can be obtained from the local Representative and Paying Agent, BNP Paribas Securities Services, Selnastrasse 16, 8002 Zurich, Switzerland. The Prospectuses are available in English, French and Swiss French. | Manager ratings provided by Citywire @ for rolling 3-year risk-adjusted performance. Citywire's ratings are provided after month-end, therefore please review Citywire's website for current ratings. | Risk and Reward Profile: based on share class volatility. Historical data may not be a reliable indication for the future. Risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'. Please refer to page 2 for more details about risks.

## WHAT ARE THE RISKS?

**CAPITAL:** Investment markets are subject to economic, regulatory, market sentiment and political risks. All investors should consider the risks that may impact their capital, before investing. The value of your investment may become worth more or less than at the time of the original investment. The Fund may experience a high volatility from time to time.

**CONCENTRATION:** Concentration of investments within securities, sectors or industries, or geographical regions may impact performance.

**CURRENCY:** The value of the Fund may be affected by changes in currency exchange rates. Unhedged currency risk may subject the Fund to significant volatility.

**DERIVATIVES:** Derivatives may provide more market exposure than the money paid or deposited when the transaction is entered into (sometimes referred to as Leverage). Market movements can therefore result in a loss exceeding the original amount invested. Derivatives may be difficult to value. Derivatives may also be used for efficient risk and portfolio management, but there may be some mismatch in exposure when derivatives are used as hedges.

**EMERGING MARKETS:** Emerging markets may be subject to custodial and political risks, and volatility. Investment in foreign currency entails exchange risks.

**EQUITIES:** Investments may be volatile and may fluctuate according to market conditions, the performance of individual companies and that of the broader equity market.

**MANAGER:** Investment performance depends on the investment management team and their investment strategies. If the strategies do not perform as expected, if opportunities to implement them do not arise, or if the team does not implement its investment strategies successfully; then a fund may underperform or experience losses.

**SMALL AND MID-CAP COMPANY:** Small and mid-cap companies' valuations may be more volatile than those of large cap companies. They may also be less liquid.

Before subscribing, please refer to the Fund offering documents/prospectus for further risk factors and pre-investment disclosures. For the latest NAV, please visit [www.fundinfo.com](http://www.fundinfo.com).

## REGIONAL DISTRIBUTION

### % OF EQUITY

Totals may not add up to 100% due to rounding.

## SECTOR DISTRIBUTION

### % OF EQUITY

Totals may not add up to 100% due to rounding. | Although the Fund is not constructed relative to a benchmark, the MSCI All Country World index can serve as a proxy for the broad equity market and is shown here for contextual purposes.

## GLOSSARY

**BENCHMARK:** A benchmark is the standard against which the performance of a fund can be measured. The investment objective of a fund sets out the extent to which (if any) a benchmark is considered when constructing the fund. When a fund is actively managed against the benchmark, the constituents of the benchmark are considered, with the investment manager seeking to outperform the benchmark through security selection. A reference benchmark is presented purely as a reference for performance, and the constituents of the benchmark are not considered when constructing the fund.

**BETA:** A measure of how a fund behaves relative to an index. A beta of  $< 1$  implies that the fund will typically move less than the index whilst a beta  $> 1$  implies the fund typically moves more than the index.

**CAPITALISATION:** The total market value of a company's outstanding shares.

**DERIVATIVES:** Financial instruments whose prices are dependent on one (or more) underlying assets. Derivatives can be used to gain exposure to, or to seek to protect against, expected changes in the value of the underlying assets. Information on the derivatives used by the fund is set out in the Prospectus and in the semi-annual and annual reports.

**DURATION:** A measure of the sensitivity of a fixed income security to changes in interest rates. A longer duration indicates greater sensitivity to interest rate movements.

**EFFECTIVE DURATION:** A duration calculation used for bonds that have embedded derivatives. It takes into account the fact that the embedded derivative means that the expected cash flows may change.

**EMERGING MARKETS:** Emerging markets are markets which the Investment Manager has identified as being developing economies based on the consideration of a number of factors including their classification by index providers and their integration into the global financial system.

**EXPOSURE:** The proportion of a fund exposed to a particular security or sector/ region, either via derivatives or via direct investments, usually expressed as a percentage of the overall fund.

**FRONTIER MARKETS:** MSCI, a widely used index provider, has established a framework for classifying countries as either 'Developed Markets', 'Emerging Markets' and 'Frontier Markets' based on the economic development, size and liquidity requirements and market accessibility of each country. They consider Frontier Markets to be less developed than countries they have assigned to the other categories.

**GROSS EXPOSURE:** Gross exposure refers to the sum of the absolute value of both a fund's long and short positions, usually expressed as a percentage of the net asset value.

**HEDGING:** A method used to seek to reduce unwanted or unintended risk where one or more investments are used to offset a particular risk to which a fund is exposed.

**INVESTMENT GRADE:** Debt securities that have a medium or high credit rating from a recognised credit rating agency, specifically a rating of Baa3 or higher from Moody's or BBB- or higher from Standard & Poor's or Fitch Ratings.

**LEVERAGE:** Leverage is the term given to any method by which the manager increases the exposure of a fund beyond the exposure created by its direct investments.

**LIQUIDITY:** The ease with which a security can be bought or sold in the market, without significantly affecting the price of the security.

**LONG POSITION:** Refers to direct or indirect ownership of a security. If the price rises, the holder of the security will benefit from the increase in value.

**LONG-SHORT FUND:** In a UCITS context, a fund that takes both long and short positions, the latter synthetically via derivatives in a group of assets or an index.

**NET ASSET VALUE (NAV):** A fund's net asset value is calculated by taking the current value of the fund's assets and subtracting its liabilities.

**NET EXPOSURE:** Net exposure is the absolute value of long positions less the absolute value of the short positions.

**ONGOING CHARGES FIGURE:** The Ongoing Charges Figure represents an estimate of the costs you can reasonably expect to pay as an investor from one year to the next, under normal circumstances.

**PERFORMANCE FEE:** A fee paid to the Investment Manager when a pre-agreed performance outcome is achieved. For further information, please refer to the Prospectus.

**PORTFOLIO TURNOVER:** An annualized measure of the rate of buying and selling of securities in a Fund.

**SHARE:** In relation to a Fund, means units, participations or shares (howsoever described) in that Fund's prospectus.

**SHORT POSITION:** In a UCITS fund, refers to the sale (synthetically via derivatives) of a security that is not owned. If the price of the underlying security falls, the holder of the short position will benefit.

**SWING PRICING:** A pricing mechanism adopted in certain circumstances to protect the interests of a fund's shareholders, the outcome of which is an adjustment of the price of a share, to pass on to purchasing or redeeming investors estimated transaction costs associated with their trading activity. Full details are set out in the fund's prospectus.

**TOTAL RETURN:** The term for the gain or loss derived from an investment over a particular period which includes income (for example in the form of interest or dividends) and capital gains/losses.

**TRACKING ERROR:** A measure of how much a fund's returns deviate from those of its benchmark. The lower the tracking error, the closer the fund's historic performance has followed that of its benchmark.

**VOLATILITY:** A measure of how much the price of a security, fund, or index fluctuates.

**YIELD TO MATURITY:** An estimate of the Total Return that could be received on bonds held by a Fund if the bonds are held until the end of their lifetime, assuming the issuer does not default.

**YIELD TO WORST:** An estimate of the lowest possible total return that could be received on bonds held by a Fund, without the issuer defaulting. It is used for bonds where the issuer has the right to redeem the bond prior to its maturity date. It is an estimate of the worst-case scenario for yield taking into account the rights of the issuer.
