DB PWM I - Active Asset Allocation ESG Portfolio Plus 10 (Euro) Class WAM

DB PWM I

ISIN LU1878002697

Managed by Hauck & Aufhäuser Fund Services S.A. (HAFS). HAFS belongs to the Hauck Aufhäuser Lampe Group.

Objectives & Investment Policy

The strategy of the Fund is diversified into the following asset classes: cash (including FX transactions), fixed income, equity and commodity-linked investments (the "Asset classes"). In general, the portfolio represents a multi asset allocation approach with a Euro bias. The manager can achieve the Funds' strategy chosen by the client by either investing the portfolio into instruments, which are linked to the Asset classes (such as structured products or mutual funds including ETFs) or by investing in the Asset classes directly. The strategy of the Fund aims to decrease the client portfolio's downside risk by aiming to limit the maximum loss per annum according to the targeted loss limitation. The objective of the Fund is to achieve optimal growth/risk of the invested capital over the long-term. The portfolio transaction costs will have a material impact on performance. Income arising from the fund is accumulated. In order to achieve the aforementioned investment objective

the Sub-Fund will invest a maximum of 60% in equities and equity linked instruments like Equity-funds (incl. Index-Funds) and a minimum of 40% in bonds and bond linked instruments like bond funds (incl. Index-Funds). The Fund may make use of derivatives transactions to reduce any losses or to achieve higher growth. Returns may be accumulated. Investors are entitled to request redemption of shares from the Management Company on each Valuation Day. However, we may suspend redemptions in exceptional circumstances if suspension is deemed necessary in consideration of investor interests. Fees for the purchase and sale of securities shall be paid by the Sub-Fund. These fees are incurred in addition to the percentages listed under "Charges" and may negatively impact Sub-Fund returns. This fund is an actively managed fund, which is not benchmarked.

Risk and Reward Profile

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. Even the lowest category does not mean 'risk free'. The fund has been categorized SRRI 3 because its net asset value shows moderate volatility leading to adequate probabilities for losses as well as gains. Risks that could significantly affect fund performance and are not necessarily fully reflected in the risk and reward rating include: Issuer Risk - Bonds owned by the Fund may lose some or all of their value if the financial health of the bonds issuers declines or fails. Derivate Risk - Derivatives, especially when used to seek higher gains or to speculate on price movements, can expose the Fund to additional risk of loss. Counterparty Risk - The Fund's transactions with counterparties may be significant, increasing its exposure to losses if a counterparty becomes unable to meet its obligations to the Fund. Operational Risk - The Fund may be exposed to significant operational risks, such as processing errors, misconduct, communications failures or

misunderstanding on the part of those involved in fund management and administration.
