

Neuberger Berman Uncorrelated Strategies Fund

GBP P Accumulating Class

28 February 2020

FUND OBJECTIVE

The fund aims to increase the value of your shares through capital appreciation with an emphasis on absolute returns from a diversified portfolio of alternative investment strategies. Advisers are selected with the goal of building a portfolio of strategies which the team expects to have low correlation to global equity and global fixed income markets over a full investment cycle.

²Performance for the current calendar year is the year to date performance up to the reporting month end.

³Performance from 02 October 2018 to latest month end.

[^]Performance shown is not the full calendar year. The period is from 02 October 2018 to calendar year end.

Fund performance is representative of the GBP P Accumulating Class and has been calculated to account for the deduction of fees. **Fund performance does not take account of any commission or costs incurred by investors when subscribing for or redeeming shares. These figures refer to the past. Past performance is not a reliable indicator of future results.** Where a benchmark is shown, the benchmark shown is provided in the base currency of the fund and therefore may not be a fair representative comparison to the hedged currency share class shown. The difference in the currency exposure and currency fluctuations in an unhedged benchmark may cause an unintended differential in any performance or risk comparison.

RISK CONSIDERATIONS

Market Risk: The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy.

Liquidity Risk: The risk that the Fund may be unable to sell an investment readily at its fair market value. In extreme market conditions this can affect the Fund's ability to meet redemption requests upon demand.

Derivatives Risk: The Fund is permitted to use certain types of financial derivative instruments ("FDI") (including certain complex instruments) which can give rise to particular risks, including market risk, liquidity risk and counterparty credit risk. This may increase the Fund's leverage significantly which may cause large variations in the value of your share.

Interest Rate Risk: The risk of interest rate movements affecting the value of fixed-rate bonds.

Credit Risk: The risk that bond issuers may fail to meet their interest repayments, or repay debt, resulting in temporary or permanent losses to the Fund.

Counterparty Risk: The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date.

Operational Risk: The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

Currency Risk: Investors who subscribe in a currency other than the base currency of the Fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. The past performance shown is based on the share class to which this factsheet relates. If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.

Indices are unmanaged and not available for direct investment.

An investment in the fund involves risks, with the potential for above average risk, and is only suitable for people who are in a position to take such risks. For more information please read the prospectus which can be found on our website at: www.nb.com/europe/literature.

Past performance is not a reliable indicator of current or future results. The value of investments may go down as well as up and investors may not get back any of the amount invested. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units.

The value of investments designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital.

Tax treatment depends on the individual circumstances of each investor and may be subject to change, investors are therefore recommended to seek independent tax advice.

Investment in the fund should not constitute a substantial proportion of an investor's portfolio and may not be appropriate for all investors. Diversification and asset class allocation do not guarantee profit or protect against loss.
