

U.S. Sustainable Growth Fund

March 2024: Fund Factsheet

FOR MARKETING PURPOSES

ISIN: IE00BF1T6S03

Fund Objective

The Fund aims to achieve capital appreciation over the long term.

The U.S. Sustainable Growth Fund seeks to invest in companies with outstanding business models, attractive valuations and sustainability drivers that we believe can directly benefit financial performance by specifically driving **revenue growth**, **cost improvements** and **enhanced franchise value**. We define these as *Sustainable Business Advantages* (SBA).

We believe that sustainable strategies can drive a company's financial performance and long-term equity valuation leading to attractive returns for shareholders as well as benefits for the environment and society globally.

Screens

The Fund intends to invest in companies that promote environmental and social characteristics, as determined by Brown Advisory, and seeks to screen out particular companies and industries. In addition to our in house and qualitative sustainable investment research, we rely on a third-party provider to apply a rules-based screening process which seeks to identify companies that may have controversial business involvement, as determined by Brown Advisory. For example, the Fund seeks to exclude knowingly owning companies that may defy the United Nations Global Compact Principles and seeks to impose investment guidelines on possible business practices including, but not limited to, weapons, animal testing, fossil fuels, adult entertainment, alcohol, tobacco and gambling. The Fund is an Article 8 financial product for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector (SFDR).

Note: For further information please contact us. It is important for investors to understand that the data informing this process is derived from third party sources, including companies themselves. Although we believe our process is reasonably designed, such data is inherently subject to interpretation, restatement, delay and omission outside of our control.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication for the future risk profile of the Fund.

- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean your investment is risk-free. The Fund's investments are subject to normal market fluctuations and other risks inherent in equities.
- The Fund is in category 6 as it mostly invests in equities, which typically experience higher levels of price fluctuation than other types of instruments.
- For a more detailed explanation of these and other risk factors, please refer to the section entitled Risk Factors in the prospectus and supplement.

REWARDS:

- U.S. large-cap sustainable as well as U.S. large-cap growth investment solution with exposure to long-term investment opportunities.
- The manager combines proprietary sustainability research with fundamental business analysis in order to seek companies that are providing solutions for some of the greatest sustainability challenges our society faces.

RISKS:

- **Equities Risk:** Equity investments are subject to greater fluctuation in market value than other asset classes as a result of such factors as a company's business performance, investor perceptions, stock market trends and several economic conditions. This may cause the Fund's share price to fluctuate. For this reason, a long-term investment horizon is recommended.
- **Geographic Concentration Risk:** The Fund's assets are concentrated in the United States market which may lead to greater price fluctuations than if it were invested in securities of a broader geographic base.
- **Liquidity Risk:** The Fund may invest in securities that may, due to negative market conditions, become difficult to sell or may need to be sold at an unfavorable price. This may affect the overall value of the Fund.
- **Currency Risk:** Where the share class is denominated in a currency other than the investor's home currency, fluctuations in exchange rates may result in an increase or decrease in investment returns.
- **Other Risks:** The Fund may also experience operational and counterparty risks.

Sustainable investment considerations are one of multiple informational inputs into the investment process, alongside data on traditional financial factors, and so are not the sole driver of decision-making. Sustainable investment analysis may not be performed for every holding in the strategy. Sustainable investment considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The Fund seeks to identify companies that it believes may be desirable based on our analysis of sustainable investment related risks and opportunities, but investors may differ in their views. As a result, the Fund may invest in companies that do not reflect the beliefs and values of any particular investor. The Fund may also invest in companies that would otherwise be excluded from other funds that focus on sustainable investment risks. Security selection will be impacted by the combined focus on sustainable investment research assessments and fundamental research assessments including the return forecasts. The Fund incorporates data from third parties in its research process but does not make investment decisions based on third-party data alone.

Brown Advisory relies on third parties to provide data and screening tools. There is no assurance that this information will be accurate or complete or that it will properly exclude all applicable securities. Investments selected using these tools may perform differently than as forecasted due to the factors incorporated into the screening process, changes from historical trends, and issues in the construction and implementation of the screens (including, but not limited to, software issues and other technological issues). There is no guarantee that Brown Advisory's use of these tools will result in effective investment decisions.

The Fund uses the Russell 1000® Growth Net Index as a comparator benchmark to compare performance. The Fund is actively managed and is not constrained by any benchmark. The Russell 1000® Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values. It is constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics. The Russell 1000® Growth index and Russell® are trademarks/service marks of the London Stock Exchange Group companies. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers.
