ESG Pillar Score

A USD Class

3.10	8.37	6.65	0.48
Environmental	Social	Governance	Unallocated

ESG Pillar Scores are an objective way to assess the components of a portfolio's ESG risk through the traditional ESG thematic framework. ESG risk pillars and their contributions to the Portfolio Sustainability Score allows for comparison of the thematic risk drivers, as well as a deeper understanding of the ESG risk composition of portfolios. The pillar scores are calculated as an asset-weighted average of the corresponding company-level risk scores from Sustainalytics.

The Pillar Scores represent the amount of risk in the Portfolio's sustainability score attributed to each component (i.e. E, S or G). Unallocated: Unmanaged risk for companies with an ESG Risk rating which hasn't been broken out by Environmental, Social or Governance components.

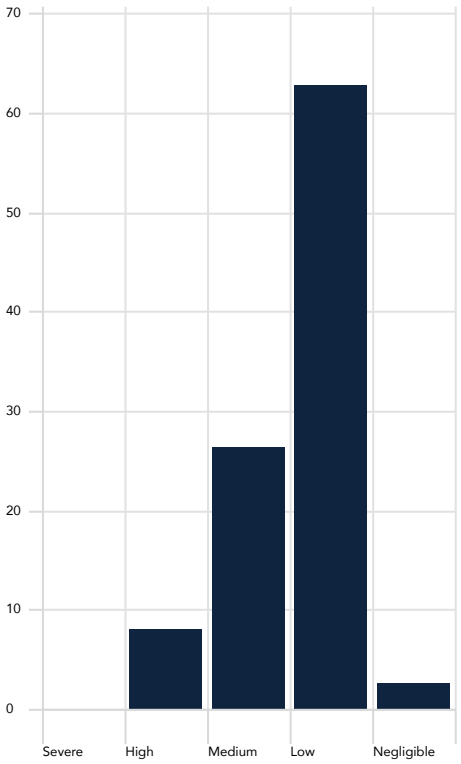

ESG information is provided with reference to a Morningstar Index which closely aligns to the Fund's Benchmark and is for illustrative purposes only.

Sustainability Score

The Morningstar Portfolio Corporate Sustainability Score is an asset-weighted average of Sustainalytics' company-level ESG Risk Score. The Sustainalytics' company-level ESG Risk Score measures the degree to which a company's economic value may be at risk driven by ESG factors. Like the ESG Risk Scores, the Portfolio Corporate Sustainability Score is rendered on a 0-100 scale, where lower scores are better, using an asset-weighted average of all covered securities. Morningstar determines whether each eligible portfolio holding can be classified under the corporate or sovereign framework. Each holding can only contribute an ESG Risk Score or a Country Risk score, not both. To receive a Corporate Sustainability Score, at least 67% of a portfolio's corporate assets under management (long positions only) must have a company ESG Risk Rating.

Corporate ESG Risk Distribution

The AUM distribution of corporate holdings by ESG Risk Classification as per Sustainalytics classification methodology.

Morningstar Sustainability Rating

The Fund has achieved a Morningstar Sustainability rating of , as at 31/12/2023 based on 96.93 AUM coverage and out of 3,190 funds in the EAA Fund USD Flexible Allocation category. Sustainalytics provides company-level analysis used in the calculation of Morningstar's Historical Sustainability Score. Data is based on long positions only.

Carbon Risk

Portfolio Date: 31/12/2023 **Carbon Risk Percentage of Eligible Portfolio Covered: 93.73%**

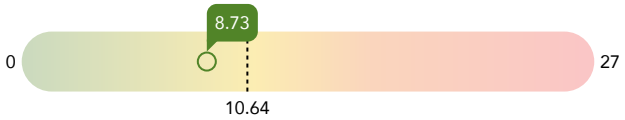

No Designation

Morningstar carbon metrics are asset-weighted portfolio calculations based on Sustainalytics' company Carbon Risk Rating. To receive the Morningstar® Low Carbon Designation™, a fund must have a 12-month average Portfolio Carbon Risk Score below 10 and a 12-month average Fossil Fuel Involvement of less than 7% of assets. This signal helps investors easily identify funds that are well-positioned to transition to a low-carbon economy.
