Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

MONTHLY MANAGEMENT COMMENT

In November 2023, the European High Yield market (HEAG) gained +2.87% with spreads tighter by 57 bps ending at a level of 379 bps.

All international credit markets showed a positive performance in USD terms during November 2023. The US High Yield market (HUCO) was up +4.57% in USD terms with spreads 61 bps tighter at 384 bps. The Asia High Yield index (ANHLY) gained +4.57% in USD with spreads 49 bps tighter to a level of 847 bps. The Asia Investment Grade index (ACIG) made +3.55% in USD terms with spreads tighter 17 bps to a level of 121 bps. In LatAM the High Yield market (EMHL) won +4.32% in USD terms with spreads tighter by 14 bps to a level of 555 bps. The LatAM Investment Grade market (EMIL) was up +5.13% in USD terms with spreads tighter by 14 bps to a level of 199 bps.

In November, the fund selectively participated in new issues, increased exposure to issuers showing a solid credit trend while decreasing exposure to weaker names. On average the fund holds an allocation of about 70% High Yield issuers with the remainder being invested in Investment Grade bonds and held in cash. About 50% are allocated to European issuers, 33% to American issuers, and the remainder to issuers from the Middle East and from Asia. The fund maintains a low duration.

Going forward, credit markets are expected to be influenced by the evolution of monetary policy, economic growth and company results, the interest burden of sovereigns as well as geopolitics. In this market environment credit selection is essential.

RISKS:

The fund is exposed to the following risks : risk of capital loss, interest rate risk, credit risk, risk associated with discretionary management, risk associated with commitments on forward financial instruments, counterparty risk, liquidity risk of underlying assets, risk associated with high yield bonds, emerging markets risk, volatility risk, risks linked to the use of overexposure, Sustainability risk and on an ancillary basis currency risk

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
