INVESTMENT UNIVERSE

The fund invests mainly (at least 75% of net assets), without restriction as to sectors, in bonds and/or other debt securities, at fixed or floating rates, (in any currency), where payment of interest and/or repayment of capital depends on the evolution of inflation in a country or geographical region. These securities are issued (or guaranteed) by a State (including its regional public authorities) or by international or supranational public bodies or by institutions or agencies held by one or more public actors and charged with public or general interest missions or covered by a mechanism guaranteeing priority repayment in the event of the issuer's default. The fund may, on an optional basis, use derivatives in a bid to achieve its goals or for hedging. This is an actively managed fund. The benchmark is used to compare performance. The selection and weighting of the assets in the fund's portfolio may differ significantly from the composition of the benchmark.

RISKS

The risk indicator assumes that you will hold the product for at least 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Investing in this product also entails risks that are materially relevant but not included in the risk indicator:

- Concentration risk: The sub-fund's portfolio is largely composed of debt securities (any currency) whose interest payment and/or principal repayment depends on the development of inflation in a country or geographical region, which may make the portfolio particularly sensitive to the economic development of this zone.
- Risks associated with derivative products: The derivative products in the portfolio may be more volatile than the underlying instruments to which they relate, resulting in a decrease in the value of the portfolio.
- Sustainability risk: Environmental and/or social aspects are taken into consideration during the sub-fund's investment selection process. Nevertheless, the risk of sustainability remains. As a result, the sub-fund may have greater exposure to issuers that have a negative sustainability impact.

This product does not include any protection from future market performance so you could lose some or all of your investment.

We refer to the prospectus and KID for more explanation and a complete overview of the risks.
