CURRENCY: The value of the Fund may be affected by changes in currency exchange rates. Unhedged currency risk may subject the Fund to significant volatility

EMERGING MARKETS: Emerging markets may be subject to custodial and political risks, and volatility Investment in foreign currency entails exchange risks. HEDGING: Any hedging strategy using derivatives may not achieve a perfect hedge.

INTEREST RATES: The value of bonds tends to decline as interest rates rise. The change in value is greater for longer term than shorter term bonds

LEVERAGE: The use of leverage can provide more market exposure than the money paid or deposited when the transaction is entered into. Losses may therefore exceed the original amount invested.

If the strategies do not perform as expected, if opportunities to implement them do not arise, or if the team does not implement its investment strategies successfully; then a fund may underperform or experience losses.
