AXIOM OBLIGATAIRE

A Compartment of AXIOM LUX

Share Class: Z (EUR), ISIN code: LU1876461382
This SICAV is managed by Axiom Alternative Investments

Objectives and investment policy

The main characteristics of the Fund are:

- The objective of this Fund is to achieve, over a minimum 3-year investment horizon, a return (net of management fees) similar to or greater than that of its benchmarks (ICE BofAML Euro Financial Index (40%), ICE BofAML Euro Corporate Index (40%) and ICE BofAML Contingent Capital Index (20%) (together the "Benchmarks")). The Fund is actively managed and references the Benchmarks for comparative purposes only. The management company has full discretion over the composition of the portfolio of the Fund and may take exposure to companies, countries or sectors not included in the Benchmarks, even though the Benchmarks constituents may be representative of the Fund's portfolio.
- The investment policy of the Fund consists of selecting bonds or debt securities issued by European financial institutions.
- Only issues of companies with a long history and a strong market presence are taken into consideration.
- The acquisition or disposal of bonds or debt securities is based on an internal analysis of the issuer's credit risk.
- Transferable debt securities and bonds rated below B- by Standard and Poor's, or B3 by Moody's, or B- by Fitch Ratings, or B Low by DBRS (the highest rating will be applied), or a rating considered equivalent by the management company, or which have no rating, shall not exceed 20% of the Fund's net asset value. These securities fall into the speculative category. The Fund is not sector-specific.
- Within the limit of maximum 50% of the NAV, the Compartment invests in contingent convertible bonds, hybrid debt securities designated to absorb the loss of capital for issuers, this implies that this bonds are slightly different to regular convertible bonds in that the likelihood of the bonds converting into equity when a certain trigger CET1 relative to risk weighted assets is reached.

- The selection may lead to a 100% exposure of the Fund in the same sector of activity.
- The Fund may hedge its credit risk through CDS (Credit Default Swap) or expose its cash pocket to the credit market with CDS.
- The Fund is permanently exposed in interest rate markets in OECD countries; Particularly in the euro area, the United Kingdom, Switzerland and the United States. The exposure in each of these markets may be 100%.

Other information:

- A part of the assets may be denominated in currencies other than the reference currency, the fund will be hedged against this risk. However, a residual risk remains.
- Management is fully discretionary. Arbitrage operations can be executed depending on market conditions and opportunities.
- The Fund is managed within a 0 to 10 sensitivity scale.
- The recommended investment horizon is at least three years.
- The UCITS reinvests its income.
- Share subscription and redemption orders can be placed at any time and are centralised no later than noon on every valuation day and executed daily.

- This indicator represents the annual historical volatility of the Fund over a 5-year period.
- The Level 4 Risk and Return indicator reflects the Fund's exposure to international bond markets with currency hedging.
- Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.
- The risk category associated with the Fund is not guaranteed and may change over time.
- The lowest risk category does not mean "risk free".
- Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

- Credit risk:** Investors are exposed to the risk of defaults on the bonds included in the portfolio. This risk may affect up to 100% of the portfolio. The materialisation of this risk may lead to a fall in the Fund's net asset value.
- Counterparty risk:** The Fund may suffer losses as a result of a counterparty failing to meet its contractual obligations.
- Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices. This can be the result of shocks of unprecedented intensity and severity such as but not limited to pandemics and natural disasters.
