- When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Risk Considerations" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:
- The fund can experience significant losses when an issuer or a counterparty is unable to fulfil its obligations or simply when its creditworthiness worsens.
  - Using derivatives generally creates leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
