Market review information

The past year was perceived by most observers as historic. With the war in Ukraine, the sharp rise in inflation, the quick departure from the era of inexpensive money and the energy shock, there was a cornucopia of burdening factors for investors. In the capital markets, equities fared poorly, losing an average of 15 per cent, but except for overvalued technology stocks, this was not a disaster if compared with other stock market crashes of the recent past. Bond investors, on the other hand, experienced a perfect storm with losses of more than 17 percent on European government bonds, for example, which hit many unexpectedly in their supposed safe haven.

The themes of 2022 will continue to dominate the new year, albeit with diminishing force.

Inflation will come down faster in the US than in Europe. Core inflation (excluding energy and food prices) will be decisive for the further course of events. Only when this also falls will the central banks be able to end their restrictive monetary policy. The sensitivity of the markets to monetary policy was evident in December in the reaction to what was perceived as overly harsh communication in connection with the otherwise expected interest rate hikes. China's sudden departure from the zero-covid policy poses risks to supply chains in view of high infection figures but could also trigger a surge in growth and unfortunately also costs in a low-growth environment during the year. These uncertainties will be with us for a while, which is why many investors remain on a wait-and-see basis.

In terms of valuations, for several months now, short-term interest rates have been above long-term rates, usually read as a signal of an impending recession. The extent of this inversion has recently corrected somewhat, but investors still expect that a difficult economic environment could force the Fed to make its first rate cuts later this year. We do not expect this bet to work out. While caution is therefore still advisable with government bonds, corporate bonds again offer good yield opportunities. Despite the recent narrowing of spreads, yields are at historic highs and thus offer a buffer in case of further, even unexpected, interest rate hikes. Issuers in the investment grade segment have sufficient liquidity to weather more difficult phases. Equities are now also more attractively valued, but the correction has not been severe enough to remove all overvaluations.

Especially in the US, risk premiums are not too abundant. In currencies, Europe seems better equipped for a phase of further rising interest rate policies on both sides of the Atlantic could put an end to the dollar's surge.

In our view, the focus should be on bonds first, with a view to increasing equity ratios later in the year. In doing so, we would set the following priorities:

Bonds: Both investment-grade and high-yield bonds offer interesting entry prospects in our view. With a view to an attractive risk-return profile, we favor the Euro high-yield segment, where positive returns are still feasible even in extreme negative scenarios.

Equities: Within our baseline scenario of a moderate recession in Europe and a global economic slowdown, European equities, especially the still extremely undervalued value stocks, offer upside potential. European banks which are benefiting from rising interest rates, are also trading at a discount that cannot be justified solely by their lower profitability compared to US institutions. US technology stocks have meanwhile depreciated significantly. Market-leading companies in areas such as payment and financial services, e-commerce or AI / cloud computing are available at prices not seen for a long time. For the small caps that have recently been left behind, it is important to wait for the moment when interest rates peak. Finally, valuations and macro data for emerging markets have rarely been so favorable.

Outlook: The shock of 2022 is still reverberating in the new year. The new era ahead is slow in coming and requires patience. For a significant repositioning, inflation would have to reach its peak, an end to the rate hike cycle would have to be in sight, the yield curve would have to stabilize and key market indicators would have to reach lows. Negative surprises in inflation and monetary policy cannot be ruled out, but likely, we will be allowed to focus more on the opportunities than the risks of investing in the course of the new year.

REPORT OF THE *RÉVISEUR D'ENTREPRISES AGRÉÉ*

Opinion

We have audited the financial statements of SICAV ODDO BHF (the "Company") and of each of its sub-funds, which comprise the statement of net assets and the statement of investments and other net assets as at 31 October 2022 and the statement of operations and changes in net assets for the year then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company and of each of its sub-funds as at 31 October 2022 and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "*Commission de Surveillance du Secteur Financier*" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the *réviseur d'entreprises agréé*" for the Audit of the Financial Statements" section of our report. We are also independent of the Company in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the "*réviseur d'entreprises agréé*" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Company for the Financial Statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "*réviseur d'entreprises agréé*" for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "*réviseur d'entreprises agréé*" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.
- Conclude on the appropriateness of the Board of Directors of the Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "*réviseur d'entreprises agréé*" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "*réviseur d'entreprises agréé*". However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

2 - Principal accounting policies

2.1 - Presentation of financial statements

These financial statements are prepared in accordance with generally accepted accounting principles in the Grand Duchy of Luxembourg applicable to UCITS (Undertakings for Collective Investment in Transferable Securities).

2.2 - Portfolio valuation

The value of transferable securities, money market instruments and any financial assets listed or dealt in on a stock exchange or on a regulated market, or any other regulated market, are generally valued at the last available known price in the relevant market prior to the time of valuation. Fixed income securities not traded on such markets are generally valued at the last available price or yield equivalents obtained from one or more dealers or pricing services approved by the Board of Directors of the Company; if such prices are not representative of their value, such assets are stated at the fair value at which it is expected they may be resold, as determined in good faith by or under the direction of the Board of Directors of the Company.

All other transferable securities, money market instruments and any financial assets, including equity and debt securities, for which prices are supplied by a pricing agent but are not deemed to be representative of market value, are valued at fair value as determined by whom in good faith pursuant to procedures established by the Board of Directors of the Company.

Money market instruments with a remaining maturity of one year or less are valued by the amortized cost method, which approximates the market value.

Net realised gains/losses on sales of investment are determined on the basis of the average cost of securities sold.

2.3 - Foreign currency translation

The books and records of each Sub-Fund are denominated in the base currency of the corresponding Sub-Fund. Amounts denominated in other currencies are translated into the base currency on the following basis: (i) investment valuations and other assets and liabilities initially expressed in other currencies are converted each business day into the base currency on exchange rates prevailing on each business day; (ii) purchases and sales of foreign investments, income and expenses are converted into the base currency using currency exchange rates prevailing on the respective dates of such transactions.

2.6 - Valuation of futures contracts

A financial futures contract is an agreement to buy or sell a standard amount of a financial instrument at a final price and a fixed future date. Financial futures contracts are valued on 31 October 2022, which reflects the latest available price at close of business. The net unrealised gain or loss is shown in the statement of net assets under "Net unrealised appreciation on financial futures" or "Net unrealised depreciation on financial futures". Net realised gains and losses and the change in net unrealised appreciation/(depreciation) are included in the statement of operations and changes in net assets respectively under "Net realised profit/(loss) on financial futures" and "Movement in net unrealised appreciation/(depreciation) on financial futures".

2.7 - Valuation of swaps

Valuation of Credit Default Swaps ("CDS")

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a periodic payment for the specified life of the agreement. The other party makes no payment unless a credit event, relating to a predetermined reference asset, occurs. If such an event occurs, the party will then make a payment to the first party, and the swap will terminate. Credit default swaps are valued at their market value. The valuation method involves the current value of the interest rate series and the current value of the credit spread traded on the market converted into the currency of the Company on the closing date. The result of these revaluations is shown in the statement of net assets under "Net unrealised appreciation on swaps" or "Net unrealised depreciation on swaps". Net realised gains or losses and the change in net unrealised appreciation/(depreciation) are included in the statement of operations and changes in net assets respectively under "Net realised profit/(loss) on swaps" and "Movement in net unrealised appreciation/(depreciation) on swaps".

2.7 - Valuation of swaps

Valuation of Interest Rate Swaps ("IRS")

An interest rate swap is a bilateral agreement in which each of the parties agree to exchange a series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged. Interest rate swaps are valued at their market value. The valuation method involve a current value of each interest rate and capital series converted into the currency of the Company on the closing date. There is no outstanding interest rate swap as at 31 October 2022.

Valuation of Total Return Swaps ("TRS")

A total return swap is a transaction in which the buyer receives the performance of an underlying asset and in return the buyer pays funding costs and generally, an arrangement fee. The underlying asset may be, but not limited to, a specific security, basket of securities, other instruments and index. Total Return Swap contracts are valued by reference to the mark to market value based on the market value of the underlying asset. There is no outstanding total return swap as at 31 October 2022.

2.8 - Repurchase agreements / Reverse repurchase agreements

Repurchase agreements are equivalent to securities lending and guaranteed by underlying assets, presented in the securities portfolio of the Sub-Fund, which remains exposed to market risk. Reverse Repurchase agreements are equivalent to taking in securities. In this case, the Sub-Fund is not subject to the risk of an impairment loss for the underlying assets. The Repurchase/Reverse Repurchase agreements are respectively considered as borrowing and lending for the amount of cash received and/or paid.

Borrowings under the Repurchase agreements are recorded in the Statement of Net Assets at nominal value under the caption "Repurchase agreements", increased or decreased by accrued interests and expenses which are presented in the statement of operations and changes in net assets as "Interest on repurchase agreements" and "Expenses on repurchase agreements". Please refer to note 9 for the details of the outstanding Repurchase agreement as at 31 October 2022.

2.9 - Dividend and interest income

Securities transactions are recorded on a trade date basis. Dividend income is accrued on the ex-dividend date, net of withholding tax. Interest income is recorded on an accrual basis and disclosed net of withholding taxes, if any. Dividends and interest received by the Company on its investments may be subject to non-recoverable withholding or other taxes in the countries of origin.

2.10 - Formation expenses

The formation expenses are paid by the Company and will be amortised over a five-year period.

2.11 - Transaction fees

The transaction costs are costs incurred by the Sub-Funds in connection with transactions on securities and on financial futures contracts. They consist of commissions and taxes relating to these transactions.

There are no brokerage fees charged separately for transactions on fixed income instruments and derivatives (except for financial futures contracts and options contracts). These transaction costs are included in the transaction price, which is known as "marked up". Transaction costs are recorded in the statement of operations and changes in net assets under "Transaction fees".

3 - Management fees

The Management Company is paid, out of the assets of each of the Sub-Funds, an Investment Management fee, equal to a percentage per annum of the daily net asset value of each class of shares within each Sub-Fund and payable quarterly in arrears. The Management Company is responsible for paying the remuneration due to any Investment Manager out of its fees.

(*) Variable remuneration in respect of 2022 but paid in 2023 and subsequent years

2- Qualitative information

2.1. Fixed remuneration

Fixed remuneration is determined on a discretionary basis in line with the market. This allows us to meet our targets for the recruitment of qualified and operational staff.

2.2. Variable remuneration

Pursuant to the AIFM 2011/61 and UCITS V 2014/91 directives, ODDO BHF Asset Management SAS ("OBAM SAS") has established a remuneration policy intended to identify and describe the methods for implementing the variable remuneration policy, covering in particular the identification of the persons concerned, the establishment of governance, the remuneration committee and the payment terms for variable remuneration.

Variable remuneration paid within the Management Company is determined on a largely discretionary basis. As such, once fairly accurate estimates of the results for the year are available (mid-November), a budget for variable remuneration is determined and the various managers – in association with the group HRD – are invited to propose an individual budget breakdown.

This process takes place after the appraisal meetings, in which managers can discuss the quality of each employee's professional performance with them for the year under way (in relation to previously established targets) and set targets for the next year. This appraisal has a highly objective component that addresses whether responsibilities have been met (quantitative targets, sales figures or how the management places in a specific ranking, performance fees generated by the fund managed), as well as a qualitative component (the employee's attitude during the year).

It should be noted that, as part of their variable remuneration, some managers may receive a portion of the performance fees received by OBAM SAS. However, the amount to be allocated to each manager is determined in line with the abovementioned process and there are no individualised contractual packages that regulate the distribution and payment of these performance fees.

All OBAM SAS employees fall within the scope of application of the remuneration policy set out below, including employees who do not work in France.

3- Specific provisions for risk takers and deferred variable remuneration

3.1. Risk takers

Each year, OBAM SAS shall identify those persons who may be qualified as risk takers in accordance with the regulations in force. The list of employees thus identified as risk takers shall then be submitted to the Remuneration Committee and passed on to the relevant management body.

3.2. Deferred variable remuneration

OBAM SAS has set EUR 100,000 as the proportionality threshold triggering payment of a deferred variable remuneration amount.

As such, employees whose variable remuneration falls below this EUR 100,000 threshold will receive their variable remuneration immediately, regardless of whether or not they are risk takers. In contrast, an employee classed as a risk taker whose variable remuneration is more than EUR 100,000 must receive deferred payment of part of this variable remuneration in accordance with the terms set out below. To ensure consistency throughout OBAM SAS, a decision has been made to apply the same variable remuneration payment terms to all company employees, whether or not they are risk takers. An employee who is not a risk taker but whose variable remuneration exceeds EUR 100,000 will therefore receive deferred payment of part of this variable remuneration in accordance with the provisions set out below.

Deferred remuneration shall consist of 40% of the entire variable remuneration amount, from the first euro. All of this deferred portion will be subject to indexation as described below.

Remuneration policy

As regards the indexation of deferred remuneration, in accordance with the commitments made by OBAM SAS, the provisions relating to the deferred part of variable remuneration will be calculated using a tool introduced by OBAM SAS. This tool will consist of a basket of funds that are representative of each of OBAM's asset management strategies.

This indexation will not be capped, nor will a floor be applied. As such, provisions for variable remuneration will fluctuate in line with the outperformance or underperformance of the funds representing the OBAM SAS range against their benchmark, where applicable. Where no there is no benchmark, absolute performance is used.

4- Changes to the remuneration policy made during the last financial year

The management body of the management company met during the year to review the general principles of the remuneration policy with members of the Compliance team and in particular the calculation methods for indexed variable remuneration (composition of indexation basket).

There were no major changes made to the remuneration policy last year.

It can be consulted on the management company's website (in the Regulatory Information section).

SFDR (Sustainable Finance Disclosure Regulation)

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective; provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The Fund met its environmental and social characteristics during the period covered by this report based on the following actions:

- An effective application of ODDO BHF Asset Management exclusion policy (coal, UNGC, unconventional oil and gas, controversial weapons, tobacco, biodiversity destruction and fossil fuel production in the Arctic), and the Fund's specific exclusions.

The consideration of the Principal Adverse Impacts for thus Fund is based on negative screening for three PAI (7,10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

...AND COMPARED TO PREVIOUS PERIODS?

The information has been published this year for the first time.

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objectives of the sustainable investments were the following as indicated in the Fund prospectus:

1. EU Taxonomy: the contribution to climate adaptation and mitigation, and to the four other environmental objectives of the EU Taxonomy. This contribution is demonstrated by the weight-based sum of EU Taxonomy aligned revenue of each investment in the portfolio and based on the data published by investee companies. In the absence of investee companies' data, MSCI research may be used.

2. Environmental: the contribution to environmental impact as defined by MSCI ESG Research through its field "sustainable impact" in relation to the environmental objectives. It implies impacts on the following categories: alternative energy, energy efficiency, green building, sustainable water, pollution prevention and control, sustainable agriculture.

The Fund had 35.7% of sustainable investments and 0.0% of EU Taxonomy investments at the end of the year (Taxonomy objective came into effect on 01/01/2023).

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The do not significant harm on the sustainable investment objective of the Fund have been controlled based on 3 steps approach:

1. All companies with a very severe environmental, social or governance controversies are not considered sustainable.
2. All companies falling into ODDO BHF Asset Management exclusion policy (coal, UNGC, unconventional oil and gas, controversial weapons, tobacco, biodiversity destruction and fossil fuel production in the Arctic) are not considered sustainable and not investible.
3. Companies with exposures in controversial weapons and/or violating the UN Global principles are not considered sustainable and not investible.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Our controlling teams are responsible for controlling that the sustainable investments of the Fund respect our DNSH approach to be counted in the share of sustainable investments at the Fund's level. Our approach is based on controversies but also on exclusions (pre-trade).

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

We consider all PAI as long as we have sufficient data on it. The consideration of the Principal Adverse Impacts for this Fund is based on negative screening for three PAI (7,10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

The consideration is based on both exclusion lists (coal, UNGC, unconventional oil and gas, controversial weapons, tobacco, biodiversity destruction and fossil fuel production in the Arctic), the use of ESG ratings, dialogue, vote, and engagement.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Manager ensures that the sustainable investments of the Fund are aligned by applying its United Nations Global Compact (UNGC) exclusion list as detailed in the Manager's exclusion policy. The UN Guiding Principles on Business and Human Rights, as well as the OECD Guidelines for Multinational Enterprises, are reflected in the internal or external (MSCI ESG Research) ESG rating methodology that is used by the Fund as detailed in the pre-contractual information.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

HOW DID THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

The product considered PAI through exclusion with pre-trade and post-trade controls, dialogue, engagement and ESG analysis.

The consideration of the Principal Adverse Impacts for this Fund is based on negative screening for three PAI (7,10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

TO WHAT EXTENT WERE THE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

Given the data reported by investee companies and the Manager's data provider MSCI, the EU Taxonomy aligned investments reached at the end of the year Taxonomy-aligned 0.0% including sovereign, supranational and central banks bonds and Taxonomy-aligned 0.0% when they are excluded.

The compliance of those investments with the requirements laid down in Article 3 of Regulation (EU) 2020/852 was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY¹?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- turnover, reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

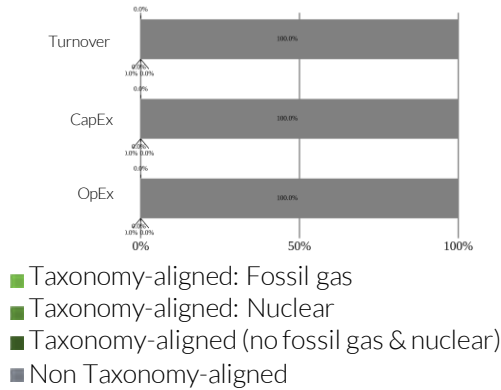

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

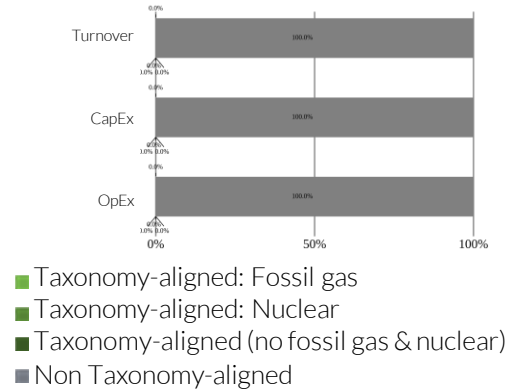

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

1. TAXONOMY-ALIGNMENT OF INVESTMENTS INCLUDING SOVEREIGN BONDS*

2. TAXONOMY-ALIGNMENT OF INVESTMENTS EXCLUDING SOVEREIGN BONDS*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

The proportion of investments made in transitional and enabling activities is 0%.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

Not applicable

WHAT WAS THE SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE NOT ALIGNED WITH THE EU TAXONOMY?

This investment didn't report in 2022 any EU-taxonomy aligned data due to a lack of data and because this assessment will come into force in 2023 only for this sub-fund.

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35.7%

WHAT WAS THE SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

There were no socially sustainable investments.

WHAT INVESTMENTS WERE INCLUDED UNDER "OTHER", WHAT WAS THEIR PURPOSE AND WERE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included under "#2 Other" are cash and derivatives and other ancillary assets to ensure optimal portfolio management.

There were not any environmental and social safeguards because these investments cannot be assessed against environmental or social criteria.

WHAT ACTIONS HAVE BEEN TAKEN TO MEET THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS DURING THE REFERENCE PERIOD?

...AND COMPARED TO PREVIOUS PERIODS?

The information has been published this year for the first time.

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objectives of the sustainable investments were the following as indicated in the Fund prospectus:

1. EU Taxonomy: the contribution to climate adaptation and mitigation, and to the four other environmental objectives of the EU Taxonomy. This contribution is demonstrated by the weight-based sum of EU Taxonomy aligned revenue of each investment in the portfolio and based on the data published by investee companies. In the absence of investee companies' data, MSCI research may be used.
2. Environmental: the contribution to environmental impact as defined by MSCI ESG Research through its field "sustainable impact" in relation to the environmental objectives. It implies impacts on the following categories: alternative energy, energy efficiency, green building, sustainable water, pollution prevention and control, sustainable agriculture.

The Fund had 19.6% of sustainable investments and 0.0% of EU Taxonomy investments at the end of the year (Taxonomy objective came into effect on 01/01/2023).

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The do not significant harm on the sustainable investment objective of the Fund have been controlled based on 3 steps approach:

1. All companies with a very severe environmental, social or governance controversies are not considered sustainable.
2. All companies falling into ODDO BHF Asset Management exclusion policy (coal, UNGC, unconventional oil and gas, controversial weapons, tobacco, biodiversity destruction and fossil fuel production in the Arctic) are not considered sustainable and not investible.
3. Companies with exposures in controversial weapons and/or violating the UN Global principles are not considered sustainable and not investible.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Our controlling teams are responsible for controlling that the sustainable investments of the Fund respect our DNSH approach to be counted in the share of sustainable investments at the Fund's level. Our approach is based on controversies but also on exclusions (pre-trade).

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

We consider all PAI as long as we have sufficient data on it. The consideration of the Principal Adverse Impacts for this Fund is based on negative screening for three PAI (7,10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

The consideration is based on both exclusion lists (coal, UNGC, unconventional oil and gas, controversial weapons, tobacco, biodiversity destruction and fossil fuel production in the Arctic), the use of ESG ratings, dialogue, vote, and engagement.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Manager ensures that the sustainable investments of the Fund are aligned by applying its United Nations Global Compact (UNGC) exclusion list as detailed in the Manager's exclusion policy. The UN Guiding Principles on Business and Human Rights, as well as the OECD Guidelines for Multinational Enterprises, are reflected in the internal or external (MSCI ESG Research) ESG rating methodology that is used by the Fund as detailed in the pre-contractual information.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

HOW DID THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

The product considered PAI through exclusion with pre-trade and post-trade controls, dialogue, engagement and ESG analysis.

The consideration of the Principal Adverse Impacts for this Fund is based on negative screening for three PAI (7,10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Other investments included 5.1% as cash, 0.1% as derivatives.

This investment doesn't meet the minimum EU-taxonomy aligned percentage due to a lack of data and because this assessment, stated in the pre-contractual report, will come into force in 2023 only for this sub-fund.

TO WHAT EXTENT WERE THE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

Given the data reported by investee companies and the Manager's data provider MSCI, the EU Taxonomy aligned investments reached at the end of the year Taxonomy-aligned 0.0% including sovereign, supranational and central banks bonds and Taxonomy-aligned 0.0% when they are excluded.

The compliance of those investments with the requirements laid down in Article 3 of Regulation (EU) 2020/852 was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management objective.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY¹?

- ☐ Yes
 ☐ In fossil gas
 ☐ In nuclear energy
- ☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory not on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover, reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

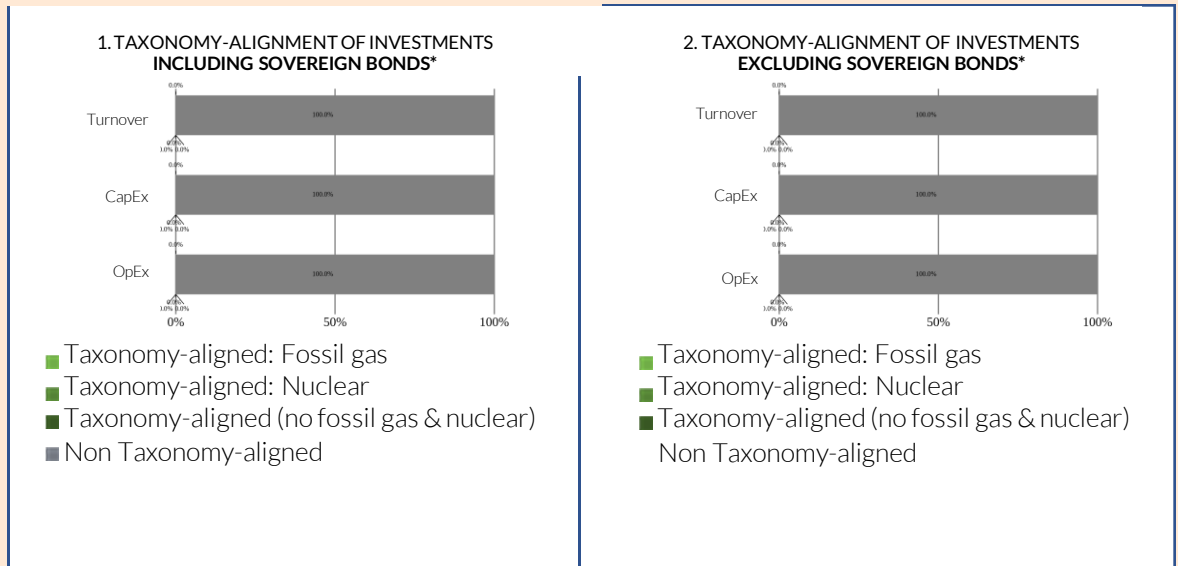

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

The proportion of investments made in transitional and enabling activities is 0%.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

Not applicable.

WHAT WAS THE SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE NOT ALIGNED WITH THE EU TAXONOMY?

This investment didn't report in 2022 any EU-taxonomy aligned data due to a lack of data and because this assessment will come into force in 2023 only for this sub-fund.

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 19.6%

WHAT WAS THE SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

There were no socially sustainable investments.

WHAT INVESTMENTS WERE INCLUDED UNDER "OTHER", WHAT WAS THEIR PURPOSE AND WERE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included under "#2 Other" are cash and derivatives and other ancillary assets to ensure optimal portfolio management.

There were not any environmental and social safeguards because these investments cannot be assessed against environmental or social criteria.

The Fund has used derivatives whose goal was to lower the impact of rising interest rates and to ease large market movements. Given the role of these derivatives, we consider that they did not influence negatively the Fund's capacity to meet its environmental and social characteristics.

WHAT ACTIONS HAVE BEEN TAKEN TO MEET THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS DURING THE REFERENCE PERIOD?

The Manager has applied its active ownership strategy based on:

1. Voting at annual general assembly if the Fund meet the requirements of the Manager's voting policy
2. Dialogue with companies
3. Engagement with companies according to the Manager's engagement policy
4. Applying the ODDO BHF Asset management exclusion policy and the Fund's specific exclusions
5. Considering the PAI according to the Manager's PAI policy

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED TO THE REFERENCE BENCHMARK?

To appreciate the overall performance, please refer to the table below.

HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

The fund follows the 100.00% BofAMLE HY NF FI&FL Rate HY Constrained as its benchmark indices.

The above indexes are broad market indexes that do not necessarily consider in their composition or calculation methodology the ESG characteristics promoted by the Fund.

HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

The reference benchmarks are not aligned with the environmental or social characteristics promoted by the Fund as they may contain companies that the Manager excludes. Furthermore, these benchmarks are not defined based on environmental or social factors.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

TO WHAT EXTENT WERE THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT MET?

The Fund met its environmental and social characteristics during the period covered by this report based on the following actions:

- An effective application of ODDO BHF Asset Management exclusion policy (coal, UNGC, unconventional oil and gas, controversial weapons, tobacco, biodiversity destruction and fossil fuel production in the Arctic), and the Fund's specific exclusions.
- The integration of ESG Ratings, as described in the fund's prospectus (investment strategy) and extern ESG data from data providers.
- The application of the Manager's policy should the Fund meet the requirements of the policy.
- The application of dialogue and engagement according to the Manager's dialogue and engagement policy.
- The consideration of principal adverse impacts according to the Manager's Article 4 SFDR policy.
- The application of the Managers does not significant harm approach to the investments considered sustainable.

The consideration of the Principal Adverse Impacts for thus Fund is based on negative screening for three PAI (7,10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

...AND COMPARED TO PREVIOUS PERIODS?

The information has been published this year for the first time.

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objectives of the sustainable investments were the following as indicated in the Fund prospectus:

1. EU Taxonomy: the contribution to climate adaptation and mitigation, and to the four other environmental objectives of the EU Taxonomy. This contribution is demonstrated by the weight-based sum of EU Taxonomy aligned revenue of each investment in the portfolio and based on the data published by investee companies. In the absence of investee companies' data, MSCI research may be used.
2. Environmental: the contribution to environmental impact as defined by MSCI ESG Research through its field "sustainable impact" in relation to the environmental objectives. It implies impacts on the following categories: alternative energy, energy efficiency, green building, sustainable water, pollution prevention and control, sustainable agriculture.

The Fund had 22.5% of sustainable investments and 0.0% of EU Taxonomy investments at the end of the year (Taxonomy objective came into effect on 01/01/2023).

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The do not significant harm on the sustainable investment objective of the Fund have been controlled based on 3 steps approach:

1. All companies with a very severe environmental, social or governance controversies are not considered sustainable.
2. All companies falling into ODDO BHF Asset Management exclusion policy (coal, UNGC, unconventional oil and gas, controversial weapons, tobacco, biodiversity destruction and fossil fuel production in the Arctic) are not considered sustainable and not investible.
3. Companies with exposures in controversial weapons and/or violating the UN Global principles are not considered sustainable and not investible.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Our controlling teams are responsible for controlling that the sustainable investments of the Fund respect our DNSH approach to be counted in the share of sustainable investments at the Fund's level. Our approach is based on controversies but also on exclusions (pre-trade).

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

We consider all PAI as long as we have sufficient data on it. The consideration of the Principal Adverse Impacts for this Fund is based on negative screening for three PAI (7, 10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

The consideration is based on both exclusion lists (coal, UNGC, unconventional oil and gas, controversial weapons, tobacco, biodiversity destruction and fossil fuel production in the Arctic), the use of ESG ratings, dialogue, vote, and engagement.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Manager ensures that the sustainable investments of the Fund are aligned by applying its United Nations Global Compact (UNGC) exclusion list as detailed in the Manager's exclusion policy. The UN Guiding Principles on Business and Human Rights, as well as the OECD Guidelines for Multinational Enterprises, are reflected in the internal or external (MSCI ESG Research) ESG rating methodology that is used by the Fund as detailed in the pre-contractual information.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

HOW DID THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

The product considered PAI through exclusion with pre-trade and post-trade controls, dialogue, engagement and ESG analysis.

The consideration of the Principal Adverse Impacts for this Fund is based on negative screening for three PAI (7, 10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Other investments included 10.9% as cash, 0.7% as derivatives.

This investment doesn't meet the minimum EU-taxonomy aligned percentage due to a lack of data and because this assessment, stated in the pre-contractual report, will come into force in 2023 only for this sub-fund.

TO WHAT EXTENT WERE THE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

Given the data reported by investee companies and the Manager's data provider MSCI, the EU Taxonomy aligned investments reached at the end of the year Taxonomy-aligned 0.0% including sovereign, supranational and central banks bonds and Taxonomy-aligned 0.0% when they are excluded.

The compliance of those investments with the requirements laid down in Article 3 of Regulation (EU) 2020/852 was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY¹?

- ☐ Yes
 ☐ In fossil gas
 ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover, reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

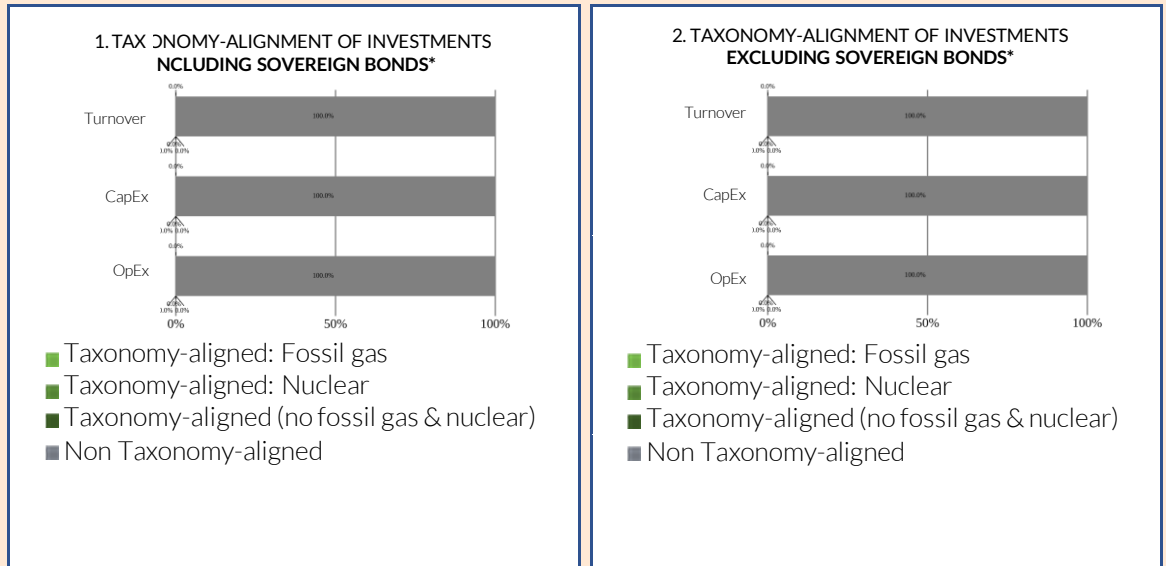

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

The proportion of investments made in transitional and enabling activities is 0%.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

Not applicable

WHAT WAS THE SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE NOT ALIGNED WITH THE EU TAXONOMY?

This investment didn't report in 2022 any EU-taxonomy aligned data due to a lack of data and because this assessment will come into force in 2023 only for this sub-fund.

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 22.5%

WHAT WAS THE SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

There were no socially sustainable investments.

WHAT INVESTMENTS WERE INCLUDED UNDER "OTHER", WHAT WAS THEIR PURPOSE AND WERE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included under "#2 Other" are cash and derivatives and other ancillary assets to ensure optimal portfolio management.

There were not any environmental and social safeguards because these investments cannot be assessed against environmental or social criteria.

The Fund has used derivatives whose goal was to manage duration positioning and to hedge currency and credit risks. Given the role of these derivatives, we consider that they did not influence negatively the Fund's capacity to meet its environmental and social characteristics.

WHAT ACTIONS HAVE BEEN TAKEN TO MEET THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS DURING THE REFERENCE PERIOD?

The Manager has applied its active ownership strategy based on:

1. Voting at annual general assembly if the Fund meet the requirements of the Manager's voting policy
2. Dialogue with companies
3. Engagement with companies according to the Manager's engagement policy
4. Applying the ODDO BHF Asset management exclusion policy and the Fund's specific exclusions
5. Considering the PAI according to the Manager's PAI policy

...AND COMPARED TO PREVIOUS PERIODS?

The information has been published this year for the first time.

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objectives of the sustainable investments were the following as indicated in the Fund prospectus:

1. EU Taxonomy: the contribution to climate adaptation and mitigation, and to the four other environmental objectives of the EU Taxonomy. This contribution is demonstrated by the weight-based sum of EU Taxonomy aligned revenue of each investment in the portfolio and based on the data published by investee companies. In the absence of investee companies' data, MSCI research may be used.
2. Environmental: the contribution to environmental impact as defined by MSCI ESG Research through its field "sustainable impact" in relation to the environmental objectives. It implies impacts on the following categories: alternative energy, energy efficiency, green building, sustainable water, pollution prevention and control, sustainable agriculture.

The Fund had 38.3% of sustainable investments and 0.0% of EU Taxonomy investments at the end of the year (Taxonomy objective came into effect on 01/01/2023).

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The do not significant harm on the sustainable investment objective of the Fund have been controlled based on 3 steps approach:

1. All companies with a very severe environmental, social or governance controversies are not considered sustainable.

3. Companies with exposures in controversial weapons and/or violating the UN Global principles are not considered sustainable and not investible.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Our controlling teams are responsible for controlling that the sustainable investments of the Fund respect our DNSH approach to be counted in the share of sustainable investments at the Fund's level. Our approach is based on controversies but also on exclusions (pre-trade).

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

We consider all PAI as long as we have sufficient data on it. The consideration of the Principal Adverse Impacts for this Fund is based on negative screening for three PAI (7,10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

The consideration is based on both exclusion lists (coal, UNGC, unconventional oil and gas, controversial weapons, tobacco, biodiversity destruction and fossil fuel production in the Arctic), the use of ESG ratings, dialogue, vote, and engagement.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

HOW DID THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

The product considered PAI through exclusion with pre-trade and post-trade controls, dialogue, engagement and ESG analysis.

To appreciate the overall performance, please refer to the table below.

HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

The fund follows the 100% MSCI World as its benchmark indices.

The above indexes are broad market indexes that do not necessarily consider in their composition or calculation methodology the ESG characteristics promoted by the Fund.

HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

The reference benchmarks are not aligned with the environmental or social characteristics promoted by the Fund as they may contain companies that the Manager excludes. Furthermore, these benchmarks are not defined based on environmental or social factors.

TO WHAT EXTENT WAS THE SUSTAINABLE INVESTMENT OBJECTIVE OF THIS FINANCIAL PRODUCT MET?

The objective of the Fund is to invest in companies benefitting from the ecological transition and whose business model is contributing to energy efficiency, sustainable mobility, low carbon energy, and the protection of natural resources. These themes are part of the analysis done by MSCI to assess the sustainable revenue (in %) of companies. The Managers uses this % to compute its sustainable investments exposure. As a result, the objective was met because all investments except cash and derivatives showed at least 5% of sustainable impact revenue or were considered as sustainable by the Manager's internal ESG research team.

The underlying investments except cash and derivatives were considered sustainable investments contributing to the environmental objective detailed in the Fund's pre-contractual information because they showed a minimum sustainable impact revenue of at least 5% according to MSCI ESG Research or a clear business-model relevance within the global ecological transition according to the Manager's internal ESG team. Furthermore, these investments were not on the do not significant harm list that has been defined based on PAI-based pre-trade exclusions and very severe controversies.

The Fund has not contributed to the Regulation (EU) 2020/852 EU (EU Taxonomy) because there were EU Taxonomy alignment in 2022.

The Fund did not have carbon emissions as its objective.

HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

All investments with more than 5% of sustainable impact revenue were considered sustainable investments if they met the requirements as well of our do not significant harm approach.

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective; provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

	31/10/2022
Sustainable investments	90,3%
Not sustainable investments (cash, derivatives, and other ancillary assets)	9,7%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... AND COMPARED TO PREVIOUS PERIODS?

The information has been published this year for the first time.

HOW DID THE SUSTAINABLE INVESTMENTS NOT CAUSE SIGNIFICANT HARM TO ANY SUSTAINABLE INVESTMENT OBJECTIVE?

The Manager applied its do not significant screening based on the following criteria:

- Investments with severe controversies according to MSCI (<1 for social and governance, and =1 for the Environments) are not considered sustainable
- Investments with MSCI ratings below CCC and B are not considered sustainable and not allowed
- Investments excluded by ODDO BHF Asset Management exclusion policy are not considered sustainable and not allowed
- Investments contributing negatively (exposure of the Fund >0%) to the PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons) are not considered sustainable and not allowed.

All PAI are monitored because the PMs have access to the MSCI's PAI database and the MSCI ESG Ratings that integrate some of the PAI, but only three of the core PAI are the object of investment constraints (exclusions).

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

Some indicators (PAI 7, PAI 10, PAI 14) were based on negative exclusion lists that forbid any investments, while other PAI (PAI 1, PAI 2, PAI 3, PAI 5, PAI 6, and PAI 9) are monitored by portfolio managers in the due-diligence process and improved as much as possible throughout the management of the Fund but without any specific constraints.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

Yes, the investments were aligned with the UN Global compact based on an internal exclusion list relying on external and internal assessments. Nevertheless, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and human rights are not directly considered, but indirectly through MSCI ESG ratings methodology. More information on the methodology is available here: <https://www.msci.com/our-solutions/esg-investing/esg-ratings>.

HOW DID THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

The portfolio managers have a direct access to principal adverse impacts data from the data provider MSCI. The due diligence process before each investment integrates and PAI overview to mitigate the negative impacts of investment decisions on sustainability factors. More precisely, the PAI 7, 10 and 14 are based on negative lists that forbids any investments in the companies present on these lists. Given the environmental objectives of the Fund, the mitigations on the PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG

intensity of investee companies), (PAI 5 (Share of non-renewable energy consumption and production), and PAI 6 (Energy consumption intensity per high impact climate sector) are regularly monitored compared to the benchmark. Furthermore, the Fund has the Towards Sustainability that lays great emphasis on the PAI 4 (Exposure to companies active in the fossil fuel sector), so the mitigation of fossil fuels investments is thoroughly monitored. The Fund has also the FNG label that forbids nuclear energy investments from a specific revenue threshold, which in returns allows the Fund to consider the PAI 9 to some extent (Hazardous waste and radioactive waste ratio).

Furthermore, dialogue, engagement, and voting contributed to the consideration of the PAI.

The Fund obtained the following results for the PAI:

1. Scope 1 GHG emissions	64,96	90,30%

TO WHAT EXTENT WERE THE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

Based on the data available, 0.0% was aligned with the EU Taxonomy according to data published by companies or made available by the Manager's data provider (MSCI).

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover, reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objectives of the sustainable investments were the following as indicated in the Fund prospectus:

1. EU Taxonomy: the contribution to climate adaptation and mitigation, and to the four other environmental objectives of the EU Taxonomy. This contribution is demonstrated by the weight-based sum of EU Taxonomy aligned revenue of each investment in the portfolio and based on the data published by investee companies. In the absence of investee companies' data, MSCI research may be used.
2. Environmental: the contribution to environmental impact as defined by MSCI ESG Research through its field "sustainable impact" in relation to the environmental objectives. It implies impacts on the following categories: alternative energy, energy efficiency, green building, sustainable water, pollution prevention and control, sustainable agriculture.

The Fund had 29.2% of sustainable investments and 0.0% of EU Taxonomy investments at the end of the year (Taxonomy objective came into effect on 01/01/2023).

HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The do not significant harm on the sustainable investment objective of the Fund have been controlled based on 3 steps approach:

1. All companies with a very severe environmental, social or governance controversies are not considered sustainable.
2. All companies falling into ODDO BHF Asset Management exclusion policy (coal, UNGC, unconventional oil and gas, controversial weapons, tobacco, biodiversity destruction and fossil fuel production in the Arctic) are not considered sustainable and not investible.
3. Companies with exposures in controversial weapons and/or violating the UN Global principles are not considered sustainable and not investible.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Our controlling teams are responsible for controlling that the sustainable investments of the Fund respect our DNSH approach to be counted in the share of sustainable investments at the Fund's level. Our approach is based on controversies but also on exclusions (pre-trade).

HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

We consider all PAI as long as we have sufficient data on it. The consideration of the Principal Adverse Impacts for thus Fund is based on negative screening for three PAI (7,10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

The consideration is based on both exclusion lists (coal, UNGC, unconventional oil and gas, controversial weapons, tobacco, biodiversity destruction and fossil fuel production in the Arctic), the use of ESG ratings, dialogue, vote, and engagement.

WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Manager ensures that the sustainable investments of the Fund are aligned by applying its United Nations Global Compact (UNGC) exclusion list as detailed in the Manager's exclusion policy. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

HOW DID THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

The product considered PAI through exclusion with pre-trade and post-trade controls, dialogue, engagement and ESG analysis.

The consideration of the Principal Adverse Impacts for thus Fund is based on negative screening for three PAI (7,10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

TO WHAT EXTENT WERE THE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

Given the data reported by investee companies and the Manager's data provider MSCI, the EU Taxonomy aligned investments reached at the end of the year Taxonomy-aligned 0.0% including sovereign, supranational and central banks bonds and Taxonomy-aligned 0.0% when they are excluded.

The compliance of those investments with the requirements laid down in Article 3 of Regulation (EU) 2020/852 was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management objective.

Taxonomy-aligned activities are expressed as a share of:

- turnover, reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

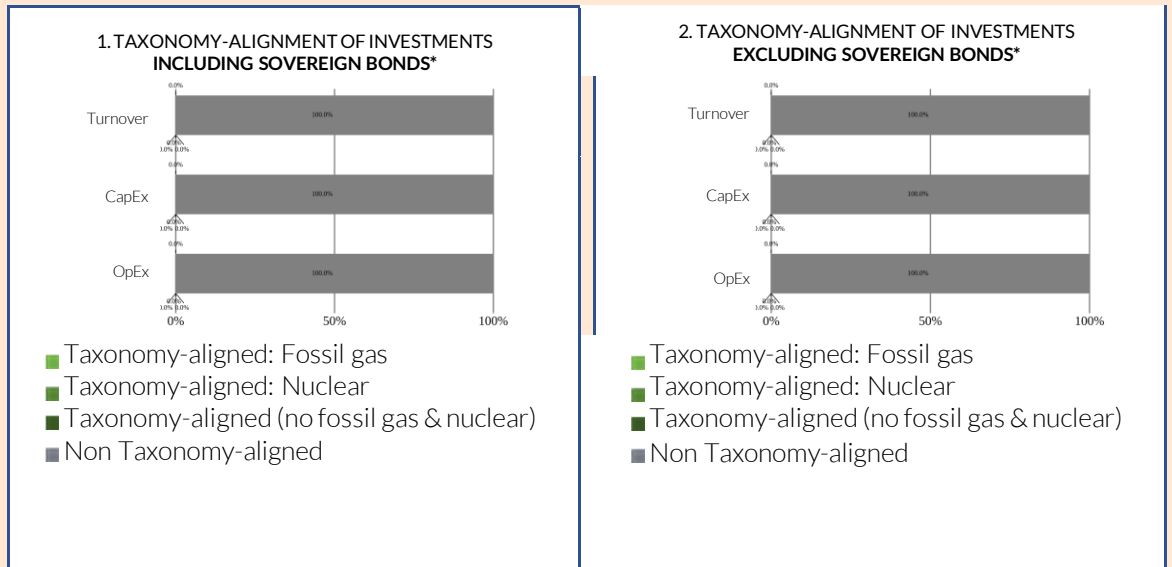

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY¹?

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

The proportion of investments made in transitional and enabling activities is 0%.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

Not applicable

WHAT WAS THE SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE NOT ALIGNED WITH THE EU TAXONOMY?

WHAT WAS THE SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

There were no socially sustainable investments.

HOW DID THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

The product considered PAI through exclusion with pre-trade and post-trade controls, dialogue, engagement and ESG analysis.

The consideration of the Principal Adverse Impacts for thus Fund is based on negative screening for three PAI (7,10, and 14) and on ESG ratings, dialogue, engagement, and voting (should the Fund vote) for the other PAI as described in the PAI policy available on the regulatory information webpage of ODDO BHF Asset Management.

Please see details below.

WHAT WAS THE ASSET ALLOCATION?

Asset Allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Other investments included 11.4% as cash, -0.1% as derivatives.

This investment doesn't meet the minimum EU-taxonomy aligned percentage due to a lack of data and because this assessment, stated in the pre-contractual report, will come into force in 2023 only for this sub-fund.

TO WHAT EXTENT WERE THE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

Given the data reported by investee companies and the Manager's data provider MSCI, the EU Taxonomy aligned investments reached at the end of the year Taxonomy-aligned 0.0% including sovereign, supranational and central banks bonds and Taxonomy-aligned 0.0% when they are excluded.

The compliance of those investments with the requirements laid down in Article 3 of Regulation (EU) 2020/852 was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management objective.

Taxonomy-aligned activities are expressed as a share of:

- turnover, reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

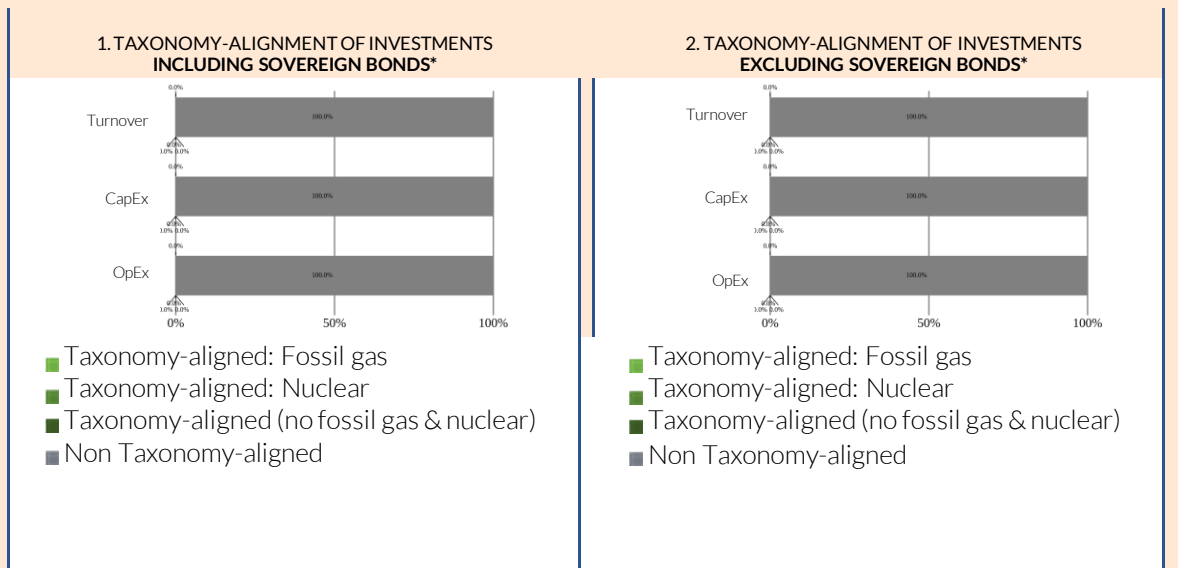

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY¹?

- ☐ Yes ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

The proportion of investments made in transitional and enabling activities is 0%.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

Not applicable

WHAT WAS THE SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE NOT ALIGNED WITH THE EU TAXONOMY?

This investment didn't report in 2022 any EU-taxonomy aligned data due to a lack of data and because this assessment will come into force in 2023 only for this sub-fund

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35.4%

WHAT WAS THE SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

There were no socially sustainable investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

WHAT INVESTMENTS WERE INCLUDED UNDER “OTHER”, WHAT WAS THEIR PURPOSE AND WERE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included under “#2 Other” are cash and derivatives and other ancillary assets to ensure optimal portfolio management.

There were not any environmental and social safeguards because these investments cannot be assessed against environmental or social criteria.

The Fund has used derivatives whose goal was to actively manage the equity exposure and to hedge foreign currency risk. Given the role of these derivatives, we consider that they did not influence negatively the Fund’s capacity to meet its environmental and social characteristics.

WHAT ACTIONS HAVE BEEN TAKEN TO MEET THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS DURING THE REFERENCE PERIOD?

The Manager has applied its active ownership strategy based on:

1. Voting at annual general assembly if the Fund meet the requirements of the Manager’s voting policy
2. Dialogue with companies
3. Engagement with companies according to the Manager’s engagement policy
4. Applying the ODDO BHF Asset management exclusion policy and the Fund’s specific exclusions
5. Considering the PAI according to the Manager’s PAI policy

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED TO THE REFERENCE BENCHMARK?

To appreciate the overall performance, please refer to the table below.

HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

The fund follows the 100% MSCI ACWI Net Total Return EUR as its benchmark indices.

The above indexes are broad market indexes that do not necessarily consider in their composition or calculation methodology the ESG characteristics promoted by the Fund.

HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

The reference benchmarks are not aligned with the environmental or social characteristics promoted by the Fund as they may contain companies that the Manager excludes. Furthermore, these benchmarks are not defined based on environmental or social factors.
