

## Nordea 1 - Global Diversity Engagement Fund (E-USD)

Any investment decision in the sub-funds should be made on the basis of the current prospectus and the Key Information Document (KID). Advertising Material

### Investment strategy

The sub-fund targets investments on companies that meet our expectations on diversity, such as but not limited to Gender, Ethnicity, Age and Socio-economic Status. The sub-fund will have a special focus on companies that are working actively to improve, for instance through shareholder engagement, in one or several of the diversity areas, and that appear to offer superior growth prospects and investment characteristics. Actively managed. Benchmark used for performance comparison only. Risk characteristics of the fund's portfolio may bear some resemblance to those of the benchmark.

### ESG Investment Strategy Summary

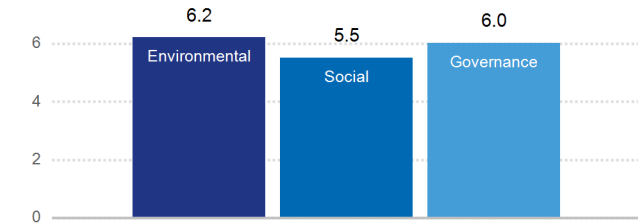

The fund invests in companies that are demonstrating a sufficient level of diversity in upper leadership levels. It also invests in companies that are actively working to improve upper leadership level diversity. Diversity is secured by screening the investment universe and identifying companies that comply with the specific thresholds as described in the below section on 'binding measures'. Current focus is mainly on gender diversity, however, other diversity measures such as ethnicity, age, socioeconomic status etc. may be considered subject to improving availability of data and company reporting on non-financial metrics. Within the defined diversity universe, the investment process then combines financial analysis with diversity analysis, both relative to industry peers.

### Portfolio exposure by ESG pillar

Source: All data is from MSCI ESG Fund Ratings as of 28/03/2024, based on holdings as of 29/02/2024.

### ESG Scores per pillar

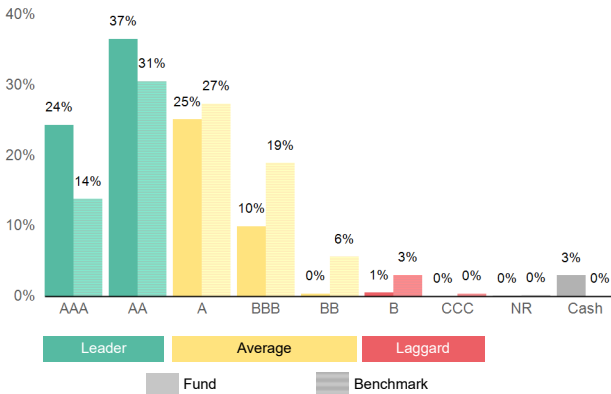

Source: All data is from MSCI ESG Fund Ratings as of 28/03/2024, based on holdings as of 29/02/2024. The overall portfolio rating is calculated on an industry relative basis while the underlying individual E, S and G ratings are absolute. Hence, the overall rating cannot be seen as an average of the individual E, S and G ratings. Rated on a scale of 0 to 10, where 0 is very poor and 10 is very good.

### ESG rating

The coverage rate is insufficient to provide a useful sustainability score for the fund

### Weighted average carbon intensity

(In Tons of CO2 equivalent per dollar millions of sales). Source: Data sourced from MSCI Inc. for equities and ISS Ethix for fixed Income. For sovereigns (countries) turnovers is replaced by GDP. Weighted Average Carbon Intensity, is calculated as the sum of each portfolio weight multiplied by the Co2e per \$M of Revenue of each holding. This metric provides a snapshot of the fund's exposure to carbon-intensive companies and includes scope 1 and scope 2 carbon emissions. For carbon data, the coverage of underlying securities must be over 50% for data to be shown.

## ESG legend

---

Scope 1 refers to direct GHG emissions, Scope 2 refers to indirect GHG emissions from the consumption of purchased electricity and Scope 3 refers to other indirect emissions that occur from sources not owned or controlled by the company.

## Risk & Reward Profile (RRP)

---

The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Fund's capacity to pay you. Be aware of currency risk. In some circumstances you will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. For more information on risks the fund is exposed to, please refer to the section "Risk Descriptions" of the prospectus. Other risks materially relevant to the PRIIP not included in the summary risk indicator:

**Depository receipt risk:** Depository receipts (certificates that represent securities held on deposit by financial institutions) carry illiquid securities and counterparty risks.

**Derivatives risk:** Small movements in the value of an underlying asset can create large changes in the value of a derivative, making derivatives highly volatile in general, and exposing the fund to potential losses significantly greater than the cost of the derivative.

**Emerging and frontier markets risk:** Emerging and frontier markets are less established, and more volatile, than developed markets. They involve higher risks, particularly market, credit, legal and currency risks, and are more likely to experience risks that, in developed markets, are associated with unusual market conditions, such as liquidity and counterparty risks.

**Securities handling risk:** Some countries may restrict securities ownership by outsiders or may have less regulated custody practices.

**Taxation risk:** A country could change its tax laws or treaties in ways that affect the fund or shareholders.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Glossary / Definition of Terms

---

### Absolute contribution

Total contribution of a security or fund achieved over a specific period, it is not measured relative to a benchmark.

### Alpha

The risk-adjusted excess return relative to the benchmark, resulting from portfolio active management. It reflects the portion of the excess return that is not explained by systemic risk.

### Beta

A measurement of the volatility of returns relative to the overall market beta equal to one. A security with beta higher (lower) than one has greater (lower) risk relative to the broad market.

### Commitment

Represented by the sum of notional, or the sum of the commitments of individual derivatives after netting and hedging.

### Correlation

The degree to which two variables move together. The metric assumes values between -1 and 1. A positive (negative) correlation means that variables move in the same (opposite) direction(s). If there is no relationship between each other, the correlation will be close to zero.

### Dividend Yield

Annual dividends per share divided by share price.

### Forward Earning Per Share

Net earnings (12M forward) available to common shareholders divided by the weighted average number of common shares outstanding.

### Forward Price to Earning Ratio

The ratio of share price to forecasted 12M earnings per share.

### Fund VaR

The probability-based estimate of the minimum loss over a period of time (horizon), given a certain confidence level, presented as percentage of the assets under management of the fund.

### Information ratio

A measure of risk-adjusted return that is defined as the excess annual return of the portfolio over its benchmark (active return) relative to the variability of that excess return (tracking error). It is used to assess the added value of the active management.

### Market Capitalisation

Total value of all company's outstanding shares at the current market price.

### Maximum Drawdown

The largest loss measured from peak to trough until a new peak is attained. Note it only measures the size of the largest loss, without taking into consideration the frequency of large losses.

### NAV

Net Asset Value, the total value of a fund's assets less its liabilities.

### Ongoing charges

It is an estimate of the charges that excludes performance related fees and transaction costs including third party brokerage fees and bank charges on securities transactions.

### Physical instruments

An item of economic, commercial or exchange value that has a material existence.

### Price to book Ratio

A valuation ratio calculated as price per share divided by book value per share.

### Sharpe Ratio

A risk adjusted performance measure calculated as the portfolio's excess return relative to the risk-free rate divided by its volatility. The greater the ratio, the better its risk-adjusted performance has been.

### Tracking error

The volatility of the difference between the returns of an investment and its benchmark. The lower the number, the closer the fund's historic performance has followed the benchmark performance.

### Volatility

A statistical measure of the fluctuations of a security's price. It can also be used to describe fluctuations in a particular market. High volatility is an indication of higher risk.
