

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## **UBS (Lux) Key Selection SICAV - Global Multi Income (USD), class (EUR hedged) P-4%-qdist (ISIN: LU1669356955), EUR**

a sub-fund of UBS (Lux) Key Selection SICAV

This sub-fund is managed by UBS Fund Management (Luxembourg) S.A (the Fund Management Company).

### **Objectives and investment policy**

This fund aims to generate income by means of actively managing a global and diversified portfolio. The sub-fund invests in a range of asset classes, mainly focusing on equities and bonds. The fund manager combines carefully selected securities from a diverse mix of countries, sectors and companies with the aim of exploiting attractive return opportunities while maintaining risk control.

The actively managed fund uses a composite benchmark as a reference for risk management, consisting of 60% MSCI All Country World Index (net div. reinvested) (hedged in USD) / 40% Bloomberg Barclays Global Aggregate Total Return Index (hedged in USD).

In principle, investors may ask the Management Company to redeem their units on any business day in Luxembourg.

This share class pays a dividend. Dividends can comprise income and capital and may be paid exclusive of fees.

This share class pays a monthly variable dividend, calculated at a constant annual percentage rate of the NAV. The annual percentage rate is stated in the share class name.

The dividend paid is unrelated to expected or past income or return of the share class or the fund, but is calculated as a percentage of the

Total Net Asset value of the share class.

Dividend payments might, in certain circumstances, include a portion of capital, therefore this share class is not designed for investors who want to build wealth.

The exchange rate risk of the share class currency is to a large extent hedged against the currency of the fund.

### **Risk and reward profile**

#### **More about the risk category**

- The risk category is based on the estimated future volatility of the fund. The method used for this estimate depends on the fund type and historical data.
- Historical performance is not a reliable indicator for future performance.
- The risk category allocated is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this fund is free of risk.

#### **Why is the fund in this category?**

- The fund is in risk category 4 because the volatility of its returns is moderate.  
The fund may invest in bonds of varying credit quality, money market securities and equities on a global basis and may be subject to high volatility. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price.

#### **Further material risks**

- Investment grade bonds are usually considered as carrying low to medium credit risk (i.e. potential loss due to failure of issuer).
- The fund can invest in less liquid assets that may be difficult to sell in distressed markets.
- The fund may use derivatives, which can reduce or increase investment risk (including the risk of loss due to the bankruptcy of the counterparty).
- It is possible that the distributions result in an erosion of assets and a reduction of invested capital.
- Sub-investment grade bonds are usually subject to a high credit risk (i.e. potential loss due to failure of issuer).
- Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus.

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	4.00%
Exit charge	0.00%
Conversion fee	4.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charges	1.56%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

The **entry charge** shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** are estimated in the absence of historical data or when the calculated figure is considered unsuitable because of a material change. As soon as available or suitable, the calculated ongoing charges are reported and may differ from the estimate. They generally exclude:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at [www.ubs.com/funds](http://www.ubs.com/funds).

## Past performance

The class was launched in 2019. The fund was launched in 2015

Where shown, the benchmark is a reference point to which the performance of a share class can be compared. The subfund does not intend to replicate the benchmark.

## Practical information

### Depository

UBS Europe SE, Luxembourg Branch
