\*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the FUNDS section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It rangesfrom 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved. (2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

### ASSET ALLOCATION

#### MONTHLY MANAGEMENT COMMENT

Prices on the stock markets rose across the board in March. Hopes of greater productivity and growth through AI continued to play a role, although traditional companies recently caught up with technology stocks. Both the US Federal Reserve and the ECB left key interest rates unchanged, but signalled their willingness to cut rates if the trend towards falling inflation rates is confirmed by further data. On the bond markets, the trend towards rising yields on safe government bonds continued. Spreads on corporate bonds narrowed further. We managed the portfolio with a steady hand and left its basic orientation unchanged. The net equity allocation is around 88 per cent. We added a smaller position in BE Semiconductor to the portfolio. The company specialises in systems to produce particularly powerful semiconductor chips, which are therefore required for AI applications. The share has recently come under pressure because the latest production technology developed by BE Semiconductor is not penetrating the market as quickly as expected. However, we are convinced of the long-term growth opportunities and took advantage of the price decline to build up an initial position in the stock.

| Asset allocation breakdown |          |        |

### SUSTAINABLE REPORT - METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

### ESG integration at ODDO BHF Asset Management | 3 systematic steps

### ESG rating methodology

#### Exclusions

- Norm-based: exclusion of companies that do not comply with certain international standards.(chemical weapons, anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based: total or partial exclusion of sectors or activities based
  on ethical considerations (tobacco, gambling, weapon, adult
  entertainment / pornographie and Coal...)

#### ESG ratings

• Usage of MSCI data based on a « Best-in-Class » approach: a bottomup, stock-picking approach that favors top-rated companies in their peer group.

#### **Dialogue and engagement**

- Systematic dialogue with low-ESG rated issuer
- Engagement for upgrade

#### **RISKS**:

The fund is exposed to the following risks : operational risks including custody risk, target fund risk, currency risk, Sustainability risk

#### SFDR CLASSIFICATION<sup>2</sup>

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
