OBJECTIVE AND INVESTMENT POLICY

Objective

To increase the capital value of shareholders' investments while producing a higher dividend income than the benchmark.

Investment policy

- The fund is actively managed.
- The fund invests principally in equities of companies selected on a global basis that exhibit strong levels of free cashflow generation, dividend distribution and dividend progression.
- The fund may invest in ADRs, GDRs, participatory notes and contracts for difference. Participatory notes and contracts for difference will be used to access markets where direct access to purchase equities may be difficult. Their use is not intended to create leverage. Investments in participatory notes and contracts for difference shall not exceed 10% of the fund's Net Asset Value.
- The fund may invest up to 10% of its Net Asset Value in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect.
- The fund may use derivatives and other techniques for hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures and forward currency contracts.
- Subject to the limits set out in the 'Investment Restrictions' section of the fund's prospectus, the fund may also hold ancillary liquid assets for treasury purposes.
- Subject to the limits set out in the 'Investment Restrictions' section of the fund's prospectus, the fund may invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions.
- At times the fund may invest in fixed income securities, including high yield bonds and contingent convertible bonds, up to a maximum of 10% of the fund's Net Asset Value. The minimum credit rating for high yield bonds is B (Standard & Poor's or the equivalent from other rating agencies). These investments would be made in periods of volatile or falling equity markets, with the aim of preserving investors' capital and to maintain income. There is no guarantee that such an aim will be met.
- The fund may invest up to 10% of its Net Asset Value in other collective investment schemes.

Benchmark information

- MSCI AC World index
The benchmark is a point of reference against which the performance of the fund may be measured. Management of the fund is not restricted by this benchmark. The deviation from the benchmark may be significant and the portfolio of the fund may at times bear little or no resemblance to its benchmark.

RISK CONSIDERATIONS

To ensure you understand whether this fund is suitable for you, please read the Key Investor Information which is available, along with the fund's Prospectus, from www.artemisfunds.com or www.fundinfo.com.

The fund is exposed to the following risks:

Market volatility risk	The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
Currency risk	The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.
Charges from capital risk	Where charges are taken wholly or partly out of a fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.
Emerging markets risk	Compared to more established economies, investments in emerging markets may be subject to greater volatility due to differences in generally accepted accounting principles, less governed standards or from economic or political instability. Under certain market conditions assets may be difficult to sell.
Income risk	The payment of income and its level is not guaranteed.
