INCOMETRIC FUND - ACCI Systematic Allocation A2, USD

A Sub-Fund of INCOMETRIC FUND, ISIN LU1913291552
This Fund is managed by Adepa Asset Management S.A.

Objectives and Investment Policy

The Sub-Fund is actively managed. The Investment Objective of the Sub-Fund is to achieve a total return via indirect investment in interest rates, dividends, and capital appreciation across the business cycle, understood as a time frame of 3-7 years. The Sub-Fund seeks to accomplish this objective through investing primarily in UCIs/UCITS, including eligible EU Exchange Traded Funds (EU ETFs), which invest in equity and fixed income mainly from issuers from OECD countries, but also in emerging markets (with a maximum exposure of 30% of the Sub-Fund total net assets).

Depending on the market environment, the Sub-Fund will seek to hold an optimal portfolio of UCIs/UCITS (holding both fixed income and/or equities) and, when the market environment and outlook changes, the Sub-Fund will change the allocation and weight of both equity and fixed income investments to adjust the risk profile of the Sub-Fund and achieve an optimal portfolio for the immediate future. The Sub-Fund can have an indirect equity allocation between zero and maximum 100%. The Sub-Fund may, if the Investment Manager deems it appropriate, through UCIs/UCITS invest as well in fixed income without any rating restrictions and with a maximum exposure of 50%* of the Sub-Fund total net assets. Nevertheless the focus of this Sub-Fund is on indirect equity investment. It is intended to leave to the Investment Manager the needed flexibility to take advantage of the opportunities the markets offer.

*The Sub-Fund may, if the Investment Manager deems it appropriate, through UCIs/UCITS invest as well in fixed income without any rating restrictions and with a maximum exposure of 70% of the Sub-Fund total net assets as from 29 July 2020.

For treasury purposes the Sub-Fund may also invest in liquid instruments according to the criteria of article 41(1) of the 2010 Law such as (but not limited to) money market instruments and money market funds and bank deposits. The Sub-Fund may hold ancillary liquid assets limited to bank deposits and cash on sight with a maximum of 20% of the net assets of the Sub-Fund in order to cover current or

exceptional payments, or for the time necessary to reinvest in eligible assets provided under article 41(1) of the Law of 2010 or for a period of time strictly necessary in case of unfavorable market conditions. Ancillary liquid assets do not include bank deposits, money market instruments, money market funds and other instruments that meet the criteria of article 41(1) of the 2010 Law.

Derivatives, included OTC derivatives traded with first class financial institutions, will be used only to hedge investment and currency risk, not for underlying investment exposure. According to the Investment Policy above and the non-intensive use of derivative instruments, the Sub-Fund employs the Commitment Approach as the global exposure determination methodology.

The performance fee is calculated in reference to a benchmark (Hurdle Rate). The Hurdle Rate is SOFR 1 Year + 5%. The benchmark is not used for investment purposes and the investment strategy of the subfund may deviate significantly from the index.

The Sub-Fund will capitalise its entire earnings following an income accumulation policy.

The Share Class's currency is USD. The Sub-Fund's reference currency is USD.

The aforementioned investment strategy corresponds to investors with a high-risk tolerance and high investment risk profile. The fund will be targeting an annualized average volatility of 10-15% across the business cycle and on a 5-year rolling basis and will seek to stay within limits of 10-25% annual volatility

This Sub-Fund may not be appropriate for investors who plan to withdraw their money within a five-year period.

The investors are able to redeem their units on a daily basis.

Risk and Reward Profile

The risk/return indicator shows the correlation between risk and returns. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'.

The risk category of the Sub-Fund is 5 and is calculated from historical data or simulated historical data of the underlying securities when the real data is not sufficient. Past performance is not necessarily a reliable indicator of the Sub-Fund's future risk and reward profile.

The following risks may materially impact the Sub-Fund but are not captured by the indicator:

Credit risk: The default of the issuer of a debt instrument held by the Sub-Fund.

Liquidity risk: Securities in the Sub-Fund may be sold below their

valuation due to insufficient liquidity in the market.

Counterparty risk: A counterpart may fail paying the proceeds related to the sale of securities by the Sub-Fund or may fail delivering the securities purchased by the Sub-Fund. A counterpart of the Sub-Fund in an OTC derivative may fail satisfying its obligations towards the Sub-Fund at any event of the OTC derivative agreement.

Operational risk: Failures or delays in operational processes may negatively affect the Sub-Fund.

Derivatives risk: Derivatives may be used to increase, lower or maintain the risk level of the Sub-Fund. The derivative strategy may fail resulting in significant losses for the Sub-Fund.

Currency risk: Exchange rate fluctuations may negatively affect the value of the Sub-Fund's investments.

Event Risk: The overall value of all types of investments may be affected by devaluations, political and governmental interventions in relevant markets or irregular and sudden market fluctuations.

The above mentioned list of risk factors is not exhaustive. Other factors may influence the pricing of the underlying securities and therefore the value of the Sub-Fund's investments.
