Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

U Access (IRL) GCA Credit Long/Short UCITS ("Fund")
A sub-fund of U ACCESS (Ireland) UCITS P.L.C ("Company")

Class: B USD (ISIN IE00BH47QP24)

The Fund is managed by Carne Global Fund Managers (Ireland) Limited (the "Manager")

Objectives and Investment Policy

The investment objective of the Fund is to seek to achieve superior risk adjusted returns by exploiting fundamental and technical valuation aberrations in the credit markets.

The Fund is actively managed and not with reference to a benchmark. In order to achieve its investment objective, the Fund may invest in fixed income type instruments such as U.S. and non-U. S government debt, high yield, distressed and investment grade corporate debt and debt-related instruments and convertible bonds. Such instruments may be fixed and /or floating rate, either rated or unrated with a minimum credit quality at the time of purchase of D as rated by Standard & Poor (or equivalent). The Fund will also gain exposure to equity related instruments such as common stocks, equity securities of real estate investment trusts (REITS), preferred stocks, preferred convertible stocks and American Depositary Receipts (ADRs) and/or Global Depositary Receipts (GDRs). However, exposure to equity securities is not expected to be significant.

Financial derivative instruments (FDIs) such as swaps, credit default swaps, or options for example, may be used for investment purposes, hedging and efficient portfolio management purposes. The Fund may create synthetic short positions (i.e.: short positions achieved only through the use of FDIs). Such positions may be used to benefit from falling prices. Long positions will be used to benefit from an upturn in prices. The Fund's portfolio may consist generally of 50 to 150 long positions and 50 to 150 short positions. The Fund may also hold cash and invest in money market instruments. Any investment in other funds will not exceed 10% of the Fund's Net Asset Value ('NAV').

The Fund may gain exposure to financial indices. All financial indices to which the Fund is exposed will be compliant with the UCITS Regulations.

The portfolio manager will undertake fundamental and comparative research to identify securities in which it will invest, to achieve its investment objective. The Fund will tend to invest in companies with changes in balance sheet leverage, operating margins, cash flow or market share.

The base currency of the Fund is USD. Any non-base currency share classes will be currency hedged to hedge against the currency exposure between the denominated currency of the share class and the base currency of the Fund.

The Fund is an accumulating fund. All income will be reinvested in the Fund.

You can buy, sell and exchange shares on each Wednesday on which commercial banks are open for business in Dublin, Ireland, New York & U.S.A (or if Wednesday is not a Business Day, the next Business Day). You must submit your application to the Fund's Administrator before 5.00p.m. (Irish time) on the Business Day that is three Business Days prior to the Dealing Day.

The Fund is suitable for investors seeking a long-term investment who are willing to accept a high volatility due to the Fund's investment policy. Investors should note holding a substantial proportion of their investment policy in the Fund may not be appropriate.

For further information, please refer to the section entitled "Funds – Investment Objective and Policies" in the Prospectus and the sections entitled "Investment Objective" and "Investment Policies" in the Supplement for the Fund.

Risk and Reward Profile

Lower risk | Higher risk

Typically lower rewards | Typically higher rewards

1	2	**3**	4	5	6	7

The indicator above illustrates the position of this Fund on a standard Risk/Reward category scale. The category is chosen based on the volatility of returns. The category shown is not guaranteed to remain unchanged and may vary over time. Historical data is used in calculating the synthetic risk and reward indicator and may not be a reliable indication of the future risk profile of the Fund. The Fund does not provide its investors with any capital guarantee on performance, nor the monies invested in it, so investors can lose the whole of their investment.

A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 fund is not twice as risky as a category 1 fund.

Risks materially relevant to the Fund which are not captured by the Indicator:

Operational Risk : The Fund and its assets may experience material losses as a result of technology/system failures, human error, policy breaches, and/or incorrect valuation of units.

Derivative and Counterparty Risk: The Fund may enter into various financial contracts (derivatives) with other parties. There is a risk that the other party to a derivative will become insolvent or fail to make its payments which may result in the Fund and the investment suffering a loss. Investments in a derivative will not necessarily generate the same return as a direct investment in the underlying asset on which the derivative is based.

Liquidity Risk: The Fund can from time to time be invested in financial instruments that may have low levels of liquidity.

Currency Risk: The Fund has exposure to securities that are issued in currencies other than the base currency of the Fund. The Fund is therefore subject to currency risk, which arises from changes in exchange rates. The Fund will attempt to hedge against exchange rate risk in non-USD denominated classes, however there is no guarantee that such attempts at hedging will be successful.

Concentration Risk: The Fund's portfolio may, at times, be highly concentrated. Such concentration may increase the losses suffered by the Fund or reduce its ability to hedge its exposure and to dispose of depreciating assets.

Default and Interest Rate Risk: The Fund may invest in bonds and types of debt securities which may be below investment grade or non investment grade. The Fund may invest in distressed securities, which may result in significant returns but also substantial risk. These securities are subject to the risk of the issuer's inability to meet principal and interest payments. By purchasing debt instruments, the Fund will assume this interest risk.

Leverage Risk: The Fund implements a high use of leverage which may reach 600% of the total NAV of the Fund. Leverage presents opportunities for increasing both returns and losses because any event which affects the value of an investment is magnified to the extent leverage is employed.

For more information on risks, please see the section entitled "Risk Factors" in the Prospectus of the Company and the section entitled "Risk Factors" in the Supplement for the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:
