

Mirabaud - Emerging Market 2024 Fixed Maturity N cap. EUR

30 April 2024

Investment Overview

We invest in a diversified portfolio of emerging market fixed income debt securities, seeking to generate an attractive yield until termination at the end of 2024. The focus is on USD-denominated debt instruments, or securities hedged against the USD, in emerging market sovereign and corporate debt. With an active, unconstrained approach, we do not reference any benchmark.

Approach to Sustainability

We encourage responsible and sustainable industry practices, and assess how material ESG issues can positively and negatively impact the overall credit profile. The integration of ESG and extra-financial considerations into financial analysis is key to the understanding of risk and long-term opportunity. We engage with issuers to support their commitment to improve their ESG practices. We follow a three step process: 1. Exclusion – we apply an exclusion filter for controversial activities; 2. ESG integration – we assign a credit-specific ESG score to companies; 3. Engagement (post-investment), the investment and SRI teams continue to monitor issuers and ensure compliance with ESG standards, including climate goals, through engagement and dialogue.

Risk Information

Investments in debt securities are subject to interest rate, credit and default risk. The fund will primarily invest in emerging markets that may be more volatile and generate higher operational risks than equity markets of well established economies. The fund may invest in lower rated securities that are subject to higher credit risk and are more volatile than higher rated securities. The fund may invest in asset backed instruments that would lose their value if their underlying assets value was to diminish or if their issuer was to default and be unable to meet its contractual obligations. The fund may invest in securities that are less liquid because buyers/sellers are not always in sufficient numbers to trade these securities readily. Financial derivative instruments may be used as part of the investment process, which may increase the fund volatility and expose the fund to the risk of default of its counterparties. Currency forwards will be used to reduce the currency risk generated by investments in share-classes or instruments that are not denominated in the fund base currency. The effectiveness of that hedging process will be subject to counterparty and operational risk. Cash placed in time deposits or money market funds are exposed to their issuer default risk.

IMPORTANT INFORMATION

This marketing material contains or may incorporate by reference information concerning certain collective investment schemes ("funds") which are only available for distribution in the registered countries. It is for your exclusive use only and it is not intended for any person who is a citizen or resident of any jurisdiction where the publication, distribution or use of the information contained herein would be subject to any restrictions. It may not be copied or transferred.

This material is provided for information purposes only and shall not be construed as an offer or a recommendation to subscribe, retain or dispose of fund units or shares, investment products or strategies. Before investing in any fund or pursuing any investment strategy, potential investors should take into account all their characteristics or objectives as well as consult the relevant legal documents. Potential investors are recommended to seek prior professional financial, legal and tax advice. The sources of the information contained within are deemed reliable. However, the accuracy or completeness of the information cannot be guaranteed and some figures may only be estimates. In addition, any opinions expressed are subject to change without notice. There is no guarantee that objectives and targets will be met by the portfolio manager.

All investment involves risks, returns may decrease or increase because of currency fluctuations and investors may lose the amount of their original investment. Past performance is not indicative or a guarantee of future returns.

This communication may only be circulated to Eligible Counterparties and Professional Investors and should not be circulated to Retail Investors for which it is not suitable.
