

Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

LongRun Equity Fund

Class: P D USD (Unh) (Distribution) LU1302864373

This SICAV is managed by Luxcellence Management Company S.A

Objectives and investment policy

The investment objective of the Fund is to achieve long-term appreciation of the investor's capital.

The philosophy is to manage a concentrated portfolio (generally less than 40 stocks) of companies combining superior business quality and attractive valuations

Valuation is focused on the intrinsic value of a business for a long-term investor.

The Fund is actively managed and will invest primarily in equity securities, on a global basis. The investments are not subject to geographical or sectorial limitations. The Fund may invest in emerging markets which are part of the MSCI AC World Index NR. It is generally not anticipated that investments in emerging markets will be more than 30% of the net assets of the Fund.

The Fund may also invest up to 15% of its net assets in deposits, money market instruments, debt securities or UCITS (Undertakings for Collective Investment in Transferable Securities) investing in money market instruments or debt securities, in normal market conditions.

The Fund may use derivatives (such as options, forwards and futures) for hedging purposes only.

In order to generate additional revenues, the Fund may also engage in securities lending transactions. The MSCI index shall be understood as a reference to the geographical investment universe and not to the index as a benchmark for the implementation of the investment strategy of the Fund. Income generated by the Fund is paid out as dividends.

Investors may request redemptions of shares daily in line with the relevant section of the Fund's prospectus.

Risk and reward profile

Wit	h lower ris	sk,			With higher risk,			
pot	entially lo	wer reward	Is		ро	tentially hi	gher rewa	rds
	1	2	3	4	5	6	7	

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Lack of sufficient historical data, the risk indicator incorporates simulated data from a benchmark portfolio. Risk Category 6 reflects very high potential gains and/or losses for the portfolio. This is due to investments in equities without geographic constraints.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Concentration risk: To the extent that the Fund's investments are concentrated in a particular country, market, industry or asset class, the Fund may be susceptible to loss due to adverse occurrences affecting that country, market, industry or asset class.

Emerging market risk: The Fund may invest in developing overseas markets which carry a higher risk than investing in larger established markets. Investments in emerging markets are likely to experience greater rises and falls in value and may suffer trading problems

Investments into other UCI/UCITS: A Fund which invests in other collective investment schemes will not have an active role in the day-to-day management of the collective investment schemes in which it invests. Moreover, a Fund will generally not have the opportunity to evaluate the specific investments made by any underlying collective investment schemes before they are made. Accordingly, the returns of a Fund will primarily depend on the performance of these unrelated underlying fund managers and could be substantially adversely affected by the unfavourable performance.

Derivative for hedging purpose: The use of derivatives for hedging in a rising market may restrict potential gains.

Credit risk and interest rate risk: The Fund may invest in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade. An increase in interest rates may cause the value of fixed-income securities held by the Fund to decline. Bond prices and yields have an inverse relationship, when the price of a bond falls the yield rises.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices. This can be the result of shocks of unprecedented intensity and severity such as but not limited to pandemics and natural disasters.

For more information about the risks of the Fund, please refer to the risk section of the prospectus.

Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or a	after you invest				
Entry charge	3.00%				
Exit charge	None				
The percentage shown is the maximum amount that can be paid out of your investment. Your financial advisor or distributor can inform you of the associated entry and exit charges. Charges taken from the Fund over a year					
Ongoing charges	1.71%				
Charges taken from the Fund under specific conditions					
Performance fee	0.53% for the Fund's last financial year				

10% of the Fund's outperformance compared to the MSCI AC World Index NR return on the base period with relative High Water Mark.

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower.

Ongoing charges are based on the charges for the previous year, ending on 31 December 2020. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another Fund.

For more information about Fund charges, please refer to the relevant sections of the prospectus, which is available at www.luxcellence.com.

Past performance

The performance figures shown in the bar chart are not a reliable indication of future performance.

Annualised performance is calculated after deducting all charges taken from the Fund, taking into consideration the reinvested net dividends.

Fund creation date: 6 October 2015

Share class launch date: 17 November 2016

Base currency: US Dollar.
