### Investment strategy

#### A responsible selection of Eurozone equities based on proprietary ESG analysis

Sycomore Sélection Responsable is a conviction-driven fund which aims to deliver financial returns above those of the EuroStoxx Total Return index over a minimum investment horizon of five years, by applying a multithemed socially responsible investment process (energy transition, health, nutrition, digital, etc.) in keeping with the United Nations' Sustainable Development Goals. The fund mainly invests in the capital of quality Eurozone companies, which benefit from sustainable development opportunities and whose intrinsic valuation is believed to be above their stock market value.

## Fund commentary

Consistently high inflation has led to a sharp increase in key interest rates across Europe and the United States and a surge in 10-year borrowing rates. Other developments made matters worse, including the escalating conflict between Russia and Ukraine (fake referendums for the annexation of several Ukrainian regions to Russia, massive call-up of Russian civilians), the downward revisions to economic growth for 2023, and political, economic, and financial tensions in the United Kingdom. This environment has had a deep impact on equity markets. The fund closed the month in line with its benchmark thanks to its under-exposure to most industrial sectors, which we have been trimming in recent months. In contrast, growth stocks derated as interest rates continued to rise.

The labels aim to guide investors in identifying sustainable and responsible investments. The composition of the management team is subject to change without notice. Before investing, first consult the Fund's KIID available on our <u>www.sycomore-am.com</u> website.

**ESG** follow-up, news and dialogues

#### **Dialogues and engagements**

#### Orange

Engagement with the IR team and top management on social risks, currently deemed to be high for Sycomore AM (see the ESG controversies section below).

#### **ESG** controversies

#### Orange

Social risks accrued in the context of the France Télécom appeal proceedings: 1/ Orange is in the process of recognising two suicides that took place in 2022 as "service accidents", 2/ the investigation associated with the social barometer was not carried out in 2021 despite the post-pandemic context and ongoing restructuring ("20,000 employee departures over the last 5 years) and 3/ the 5th three-yearly investigation into working conditions and stress showed several indicators deteriorated.

#### Votes

**0 / 0** voted general assembly over the month. Details on our votes are available here the day following the company's AGM <u>Here</u>. This chart represents the main UN's SDG exposures to its 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environnemental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

#### No significant exposure : 21%

#### **Deutsche Telekom**

Individual engagement - Objective: Disclose statistics on employees' access to training, in order to improve the group transparency on social topics.

Fund management decision: Considering the severity of the actual and potential negative impacts on people and the lack of significant progress mitigating the aforementioned risks so far, we have decided to divest.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determing factor. Marketing communication.
