J O Hambro Capital Management Global Opportunities Fund

Z Euro IE00BDZD4M44

A sub-fund of Perpetual Investment Services Europe ICAV

Managed by Perpetual Investment Services Europe Limited

Objectives and investment policy

- The Fund's investment objective is to achieve long-term total returns from investing in a concentrated portfolio of listed global equity securities.
- At least 80% of the Fund's total net assets will be invested in such securities. It is anticipated that the Fund's portfolio will comprise fewer than 50 holdings. The Fund can hold up to 20% of its total net assets in cash or cash equivalents should the fund manager feel it appropriate. The Fund may on occasion invest in fixed and/or floating rate convertible bonds. Any such bonds will be rated within the four highest grades by one of the major ratings agencies.
- The Fund promotes environmental and social characteristics throughout the investment decision making process.
- The Fund is actively managed which means that the fund managers use their expertise to pick investments to achieve the objective of the Fund.
- Performance of the Fund may be measured against the MSCI ACWI NR Index (net dividends reinvested) (the "Index"). The Index is used as a target benchmark for the Fund as the Performance Fee for the Fund is payable when the performance of the Fund exceeds that of the Index. The use of the Index does not limit the investment decisions of the fund managers so the shareholdings of the Fund may differ significantly from those of the Index. The Index is used as it captures large and mid cap representation across 23 Developed Markets and 24 Emerging Markets countries. With 2,920 constituents, the Index covers approximately 85% of the global investable equity opportunity set.
- Any income the Fund generates for this share class will be reinvested annually to grow the value of your investment unless you elect for a cash dividend.
- You can buy and sell shares in the Fund on any day which is a working day in Dublin and the UK. Instructions received before 12:00 noon will be processed that day. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.
- Recommendation: The Fund may not be suitable for those investors who plan to withdraw their money within five years.
- The mid-day index is a customised variant designed and maintained by MSCI, for alignment with this Fund's mid-day valuation point.

Risk and reward profile

Lower risk Typically lower rewards						Higher risk Typically higher rewards
1	2	3	4	**5**	6	7

The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

The risk and reward indicator:

- is based on simulated historical performance data and may not be a reliable indication for the future;
- is not guaranteed and may change over time.
- As this share class has not been in existence for 5 years, simulated performance data has been used.
- The lowest category does not mean that a share class is risk free.

The share class category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.
- The Fund may invest in shares priced in currencies other than the currency of the share class. This may result in the value of the share class increasing or decreasing due to changes in foreign exchange rates.
- Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the Fund value may be affected by:

- Changes in exchange rates between currencies may cause the value of the investments to diminish or increase.
- Any change in the ICAV's tax status or in legislation could affect the value of investments held by the ICAV.
- Political and/or regulatory risks.
- Emerging markets risk: Investing in companies in emerging markets involves higher risk than investing in established economies or securities markets. Emerging markets may have less stable legal and political systems, which could affect the safe-keeping or value of assets. Investments in emerging markets' funds should not constitute a substantial portion of an investor's portfolio.

Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money. Consult your financial advisor or distributor for the actual amount they may charge.
