

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Neuberger Berman Next Generation Mobility Fund ("Fund")

a sub-fund of Neuberger Berman Investment Funds plc

**USD C1 Accumulating Class (IE00BHR06368)**

This Fund is managed by Neuberger Berman Europe Limited

### OBJECTIVES AND INVESTMENT POLICY

The Neuberger Berman Next Generation Mobility Fund ("Fund") aims to increase the value of your shares over the long term by investing in a portfolio of global equity holdings that are involved with or derive benefit from Next Generation Mobility. The Fund invests in a mixture of companies of different sizes, from different industries and does not focus on any specific country. The Fund may invest in companies of any market capitalisation but shall typically invest in companies that have market capitalisation greater than USD 500 million at time of purchase.

The Fund selects investments based upon the following investment process:

- **Qualitative business analysis:** to identify companies which operate within the long-term trend of the proliferation of autonomous, electric and connected vehicles ("Next Generation Mobility"), as well as companies that are well-positioned to benefit from the new business models related to Next Generation Mobility;
- **Quantitative screening:** to identify stocks that may be too illiquid or have too small a market capitalisation;
- **Strategic valuation and analysis:** in-depth research and analysis of companies, including of company/business models, quality of management, competitive strength and record of success; and
- **Security selection and portfolio construction:** selects companies with the ability to provide solutions to drive Next Generation Mobility that are believed to have capital appreciation potential over three to five years.

The investments are mainly in publicly traded shares or related instruments. The Fund will mainly invest in:

- Equity-linked securities which are instruments that derive their value from equities using only a fraction of the money that would be needed to buy shares directly.

- Exchange Traded Funds ("ETFs") which are funds whose shares are bought and sold on a securities exchange and that track an index.
- Participatory notes, which are securities that allow indirect access to issuers and markets in countries which have local holding restrictions, and do not allow direct investments.
- Real Estate Investment Trusts ("REITs") which are real estate investment companies or trusts that invest mainly in income producing real estate.
- Financial Derivative Instruments ("FDI") that exaggerate the potential returns or potential losses to achieve more growth, reduce risk or increase operational efficiencies.

The Fund may invest directly in China A Shares through either Shanghai or Shenzhen Stock Connect.

The Fund does not track a benchmark. However, its performance may be compared against the MSCI All-Country World Index (ACWI) (Total Return, Net of Tax, USD), an index that measures the performance of companies listed on developed and emerging markets.

This Fund may not be appropriate for short-term investment and is more suitable as part of a diversified portfolio.

You may sell your shares on any day when the financial markets in London and New York are open for business.

Your shares do not pay you income, but returns are reinvested to grow capital.

Transaction costs will reduce the Fund's return.

### RISK AND REWARD PROFILE

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

This Fund is in category 5 due to its level of historical volatility. As the share class has less than 5 years of returns history, the historical volatility includes benchmark/representative portfolio returns. The Fund invests in a variety of investments, some of which can vary significantly in price from day to day due to a number of factors.

The main risks facing the Fund are:

- **Market Risk:** The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy. In addition, as the Fund invests in businesses that are connected with less advanced countries and economies, certain risks exist. The market for investments in such countries may be less developed making it difficult for the Fund to sell its investments in such markets and political and social instability may lead to a reduction in the value of the investments in such countries. Accounting and auditing standards and availability of financial information may vary across the markets in which the Fund invests.
- **Liquidity Risk:** The risk that the Fund may be unable to sell an investment readily at its fair market value. This may affect the value of the Fund and in extreme market conditions its ability to meet redemption requests upon demand. To counter this risk the Fund actively monitors the liquidity of its investments. Smaller companies' shares can be harder to sell and their prices more volatile.
- **Counterparty Risk:** The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date. The insolvency of any institution providing services such as the safekeeping of assets or acting as counterparty in respect of derivatives or other instruments may expose the Fund to financial loss.

- **Derivative Risk:** The Fund is permitted to use certain types of derivative instruments to seek to protect its assets against some of the risks outlined in this section. Their use will create leverage, an investment technique which gives an investor a larger exposure to an asset than the amount it invested. The Fund's use of leverage may result in greater variations (both positive and negative) in the value of your shares. However, leverage is limited to 100% of the Fund's assets and the Investment Manager will ensure that the Fund's use of derivatives does not materially alter the overall risk profile of the Fund. Please refer to the Prospectus for a full list of the types of derivative that the Fund may utilise.

- **Operational Risk:** The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

- **Currency Risk:** Investors who subscribe in a currency other than the base currency of the Fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.

- **Concentration Risk:** The Fund's investments may be concentrated in a small number of investments or in bonds issued by a small number of issuers and its performance may therefore be more variable than the performance of a more diversified fund.

For a more detailed explanation of risks, please refer to the "Investment Restrictions" and "Investment Risks" section of the Prospectus.

A category 1 fund is not a risk free investment - the risk of losing money is smaller than that of a category 7 fund, but the likelihood of making gains is also lower. The seven-category scale is complex: for example, a category 2 fund is not twice as risky as a category 1 fund.

The category is calculated using past data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time.

## CHARGES

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST	
Entry charge	1.00% *
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out	
CHARGES TAKEN FROM THE FUND OVER A YEAR	
Ongoing charge	3.00%
CHARGES TAKEN FROM THE FUND UNDER SPECIFIC CONDITIONS	
Performance fee	None

These charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it.

These charges reduce the potential growth of your investment.

The one-off charges shown are the maximum figures. In some cases they may be less. You can find out your actual charges from your financial adviser.

The ongoing charge shown is an estimate. This figure may vary from year to year.

You can find more details on these charges in the Fees and Expenses section of the prospectus and supplement.

\*A contingent deferred sales charge of up to 1% of your initial investment will be payable if you sell your shares within 1 year of purchase.

## PAST PERFORMANCE

There is insufficient data to provide a useful indication of past performance to investors.
---

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs.

The value of this class is calculated in US Dollars.

The Fund launched on 21 August 2018.

This class launched on 21 May 2019.

## PRACTICAL INFORMATION
