**Cullen ESG US Value (the "Sub-Fund") is a sub-fund of
Quaero Capital Funds (Lux) (the "Fund") Class A1 USD (the "Class") - ISIN: LU2004858408**
The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

The Sub-Fund's investment objective is to seek long-term capital appreciation through responsible investment in equities of U.S. (United States of America) companies, mainly which have favourable environmental, social and governance ("ESG") characteristics.

The Sub-Fund is actively managed. The Sub-Fund uses the index Russell 1000 Value Net Total Return USD for performance comparison only. The Sub-Fund does not track the index and can deviate significantly or entirely from the index.

The Sub-Fund will mainly invest in equities of companies across all market capitalizations

(i) with what the sub-investment manager believes is a relatively low price/earnings ratio,
(ii) that meet a minimum rating on MSCI's proprietary ESG ranking system (or other equivalent ranking system), and
(iii) which are domiciled, headquartered or exercise their main activity in the U.S.

The Sub-Fund intends to exclude companies from its investment universe that fall into the lowest two rankings MSCI's proprietary ESG ranking system. However, companies that fall into the two lowest rankings or that have not been evaluated or ranked by MSCI but which the sub-investment manager nevertheless believes demonstrate appropriate ESG characteristics may still be included in the portfolio.

On an ancillary basis, the Sub-Fund may invest in any other type of eligible assets, such as equities other than those above-mentioned, equity related securities (such as real estate investment trusts), money market instruments, cash and undertakings for collective investment (UCIs). However, the Sub-Fund will not invest more than 10% of its net assets in UCIs.

Except the geographical focus on the U.S., the choice of investments will not be limited by economic sector or the currency in which investments will be denominated. The Sub-Fund may invest up to 30% of its net assets in non-U.S. equities.

If the sub-investment manager considers it to be in the best interests of the shareholders, the Sub-Fund may also hold up to 100% of its net assets in cash and cash equivalents, on a temporary basis and for defensive purposes.

For hedging and for investment purposes, the Sub-Fund may use all types of financial derivative instruments traded on a regulated market and/or over-the-counter.

Why is this Sub-Fund in this category?

The portfolio of this Sub-Fund consists essentially of equities across all market capitalizations issued by companies that are domiciled, headquartered or exercise their main activity in United States of America. The objective of the Sub-Fund is to achieve long-term capital appreciation by using absolute return environmental, social and governance equity-linked investment characteristics. Hence, the risk/reward profile of the Sub-Fund should correspond to a High risk category on the risk/reward scale.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

- **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.
- **Counterparty risks:** The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent,

it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.

- **Risks from the use of derivatives:** The Sub-Fund may use financial derivatives instruments which may result in the Sub-Fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Sub-Fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the sub-fund being exposed to a greater loss than the initial investment.

- **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
- **ESG investment risk:** ESG investment risk is the risk that because investments are selected for reasons including non-financial, the Sub-Fund may underperform the broader value equity market or other funds that do not utilize ESG criteria when selecting investments and / or could cause the Sub-Fund to sell for ESG related concerns equities that both are performing and subsequently perform well. ESG investing is to a degree subjective and there is no guarantee that all investments made by the Sub-Fund will reflect the beliefs or values of any particular investor.
- **Sustainability risk:** This risk is any environmental social or governance event or condition that could impact the value of investments. The Investment Manager primarily relies on its ESG analysis and climate risk indicators to categorise the potential level of Sustainability risks in each fund. The level of sustainability risk may fluctuate depending on which investment opportunities the Investment Manager identifies. This means that the fund is exposed to Sustainability Risk which may impact the value of investments over the long term.
