

Impax Global Equity Opportunities Fund

APRIL 2022

THIS DOCUMENT IS AN ADVERTISEMENT FOR MARKETING PURPOSES. BEFORE SUBSCRIBING, PLEASE READ THE PROSPECTUS AND THE KIID.

INVESTMENT OBJECTIVE

The Impax Global Equity Opportunities Fund ("IGEO") invests in companies possessing sustainable competitive advantages, across listed equity markets and sectors, in order to achieve long-term capital growth. The manager aims to invest in companies with track records of generating consistent returns, which demonstrate above average free cash flow predictability, and where we believe a company's long-term opportunities are not necessarily reflected in today's share price. The investment process includes a strong focus on risks arising from the transition to a more sustainable global economy, as well as seeking to harness the opportunities.

Please refer to Impax's [ESG Policy](#) for more details.

These figures refer to the past. Investments in funds are subject to risk. Past performance is not a guide to current or future performance and may not be repeated. The past performance does not take into account commissions and costs incurred on the issue and redemption of units. The money invested in a fund can increase and decrease in value and there is no guarantee that you will get back the full amount invested.

KEY RISK CONSIDERATIONS

Governmental liberalisation of basic services and increased environmental legislation may not occur at the anticipated rate. The costs of technology in environmental markets may not continue to fall or may not maintain price competitiveness.

IGEO's portfolio will include a number of relatively newly established companies and companies whose future is dependent on widespread adoption of their products and services.

Many of IGEO's investments will be denominated in currencies other than the currency of the Share class purchased by the investor and, therefore, the Net Asset Value of IGEO may be affected by currency movements.

The valuations of companies in environmental markets may remain at current levels or may fall. For information on additional risk factors facing IGEO your attention is drawn to the Prospectus.
