OBJECTIVE AND INVESTMENT POLICY

Objective

To increase the value of shareholders' investments primarily through capital growth.

Investment policy

- The fund is actively managed.
- The fund invests principally (at least 80% of its assets) in equities of companies selected on a global basis.
- The Investment Manager aims to identify long-term growth trends that are not seasonal or cyclical or dependent on current economic events. Companies are sought which may benefit from these trends and which exhibit characteristics such as high and persistent barriers to entry, competent management teams whose remuneration is aligned to the success of the company, exposure to external factors, and high governance standards.
- Shares in the following types of companies (held either directly or indirectly via derivatives) are automatically excluded:
 - Tobacco: companies which derive more than 10% revenue from tobacco;
 - Gambling: companies which derive more than 10% of revenue from gambling;
 - Weapons: companies:
 - involved in the production of controversial weapons (including cluster munitions, landmines, biological and chemical weapons); or
 - which derive more than 10% revenue from conventional or nuclear weapons, related components and systems;
- Fossil fuels: companies which derive more than 10% revenue from:
 - mining or sale of thermal coal; or
 - extraction, production or refining of either oil or gas.
- The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. In that respect, the Investment Manager assesses the sustainability of each investment, including environmental, social and governance (ESG) factors such as a company's remuneration policy, energy and social supply policy, board diversity and any unequal voting rights alongside traditional financial metrics. However, investments are chosen on the basis of many quantitative (financial or ESG) or qualitative (e.g. quality and/or growth characteristics) attributes and need not rate highly on any or all of these sustainability factors to be included in the portfolio.
- In addition to ESG criteria considered during company selection, other sustainability criteria are taken into account in the thematic analysis at sector and company level.
- Stock selection is determined by the Investment Manager using information provided by the companies (for example company sustainability reports) and third-party data focusing on scores and metrics which the Investment Manager considers to be relevant.
- More information about the environmental or social characteristics for this fund is available in the pre-contractual disclosure for financial products referred to in Article 8 under SFDR in the fund's prospectus.
- At times the fund may invest in ADRs, GDRs, participatory notes and contracts for difference. Participatory notes and contracts for difference would be used to access markets where direct access to purchase equities may be difficult. Their use is not intended to create leverage. Investments in participatory notes and contracts for difference shall not exceed 10% of the fund's Net Asset Value.
- The fund may invest up to 10% of its Net Asset Value in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect.
- The fund may use derivatives and other techniques for hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures and forward currency contracts.
- Subject to the limits set out in the 'Investment Restrictions' section of the fund's prospectus, the fund may also hold ancillary liquid assets for treasury purposes.
- Subject to the limits set out in the 'Investment Restrictions' section of the fund's prospectus, the fund may invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. Higher levels of investments in bank deposits, money market instruments or money market funds may be held in periods of elevated equity market valuations to reduce risk.
- The fund may invest up to 10% of its Net Asset Value in other collective investment schemes.

Benchmark information

- MSCI AC World index
- The benchmark is a point of reference against which the performance of the fund may be measured. Management of the fund is not restricted by this benchmark. The deviation from the benchmark may be significant and the portfolio of the fund may at times bear little or no resemblance to its benchmark.
- The benchmark does not take into account environmental and/or social characteristics promoted by the fund.

RISK CONSIDERATIONS

To ensure you understand whether this fund is suitable for you, please read the Key Investor Information which is available, along with the fund's Prospectus, from www.artemisfunds.com or www.fundinfo.com.

The fund is exposed to the following risks:

Market volatility risk	The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
Currency risk	The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.
Emerging markets risk	Compared to more established economies, investments in emerging markets may be subject to greater volatility due to differences in generally accepted accounting principles, less governed standards or from economic or political instability. Under certain market conditions assets may be difficult to sell.
ESG risk	The fund may select, sell or exclude investments based on ESG criteria; this may lead to the fund underperforming the broader market or other funds that do not apply ESG criteria. If sold based on ESG criteria rather than solely on financial considerations, the price obtained might be lower than that which could have been obtained had the sale not been required.
